THE HIGH SCHOOL YEAR BOOK

A GUIDE TO TEACHING IN THE ACTIVE LEARNING CLASSROOM

HISTORY, RESEARCH, AND PRACTICE

Stylus Publishing, LLC While Active Learning Classrooms, or ALCs, offer rich new environments for learning, they present many new challenges to faculty because, among other things, they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed. The importance of learning how to use these classrooms well and to capitalize on their special features is paramount. The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls. This book provides an introduction to ALCs, briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based, practical guidance on how to use these unfamiliar spaces effectively. Among the questions this book addresses are: • How can instructors mitigate the apparent lack of a central focal point in the space? • What types of learning activities work well in the ALCs and take advantage of the affordances of the room? • How can teachers address familiar classroom-management challenges in these unfamiliar spaces? • If assessment and rapid feedback are critical in active learning, how do they work in a room filled with circular tables and no central focus point? • How do instructors balance group learning with the needs of the larger class? • How can students be held accountable when many will necessarily have their backs facing the instructor? • How can instructors evaluate the effectiveness of their teaching in these spaces? This book is intended for faculty preparing to teach in or already working in this new classroom environment; for administrators planning to create ALCs or experimenting with provisionally designed rooms; and for faculty developers helping teachers transition to using these new spaces.

SECONDARY SCHOOL READING, PROCESS, PROGRAM, PROCEDURE

[Allyn & Bacon](#) Secondary School Reading presents carefully thought out, practical strategies for promoting the development of reading skills at the post-elementary level. Practical applications are presented through their relationship to the theoretical conception of the total reading-learning process as they relate to the learner's needs. Reading instruction in the secondary school is essentially different than elementary instruction in the school. The older young people have different needs and interests and utilize different cognitive strategies. This volume presents strategies for older learners which reflects a thorough knowledge of both reading and teaching, as well as many years of experience in teaching this level. Secondary School Reading is a good blend of theoretical constructs and practical application. Its examples offer the teacher many ideas for learning activities. Its appendices direct the reader to many sources of information and teaching materials.

READING BEYOND THE BOOK

THE SOCIAL PRACTICES OF CONTEMPORARY LITERARY CULTURE

[Routledge](#) Literary culture has become a form of popular culture over the last fifteen years thanks to the success of televised book clubs, film adaptations, big-box book stores, online bookselling, and face-to-face and online book groups. This volume offers the first critical analysis of mass reading events and the contemporary meanings of reading in the UK, USA, and Canada based on original interviews and surveys with readers and event organizers. The resurgence of book groups has inspired new cultural formations of what the authors call "shared reading." They interrogate the enduring attraction of an old technology for readers, community organizers, and government agencies, exploring the social practices inspired by the sharing of books in public spaces and revealing the complex ideological investments made by readers, cultural workers, institutions, and the mass media in the meanings of reading.
