THE 50 YEAR DEVELOPMENT HISTORY AS TOLD BY DAVE MCLELLAN, CORVETTE'S CHIEF ENGINEER, 1975-1992

Bentley Pub Celebrations begin this year to mark the 50th Anniversary of the Chevrolet Corvette. There's no one more qualified than Dave McLellan to reflect upon the remarkable endurance of this legendary American icon. Dave McLellan belongs to a select group by having been the second of only three Corvette Chief Engineers to date. He is also the very first Corvette Chief Engineer to sit down and write his view of the incredible story of America's foremost sports car. In *Corvette from the Inside* Dave McLellan talks about his years at the center of Corvette Engineering, his take on Corvette history and many of the details that have made the Corvette a perennial favorite with millions of Americans. As McLellan describes the incredible highs and lows in the life of the Corvette, he also paints the bigger picture of the American auto industry's ability to rebuild itself whenever its survival is threatened. McLellan uses every tool at his disposal to tell his story, including original sketches and charts drawn by him exclusively for this book, scores of archival photos from GM, photos from his personal collection, and of course his own first-hand memories of 32 years at General Motors. Whether you're interested in the Corvette from an engineering perspective or simply a fan of the celebrated sports car, you'll want to own a copy of Dave McLellan's *Corvette from the Inside*.

MUNCIE 4-SPEED TRANSMISSIONS

HOW TO REBUILD & MODIFY

CarTech Inc The Muncie 4-speeds, M20, M21, and M22 are some of the most popular manual transmissions ever made and continue to be incredibly popular. The Muncie was the top high-performance manual transmission GM offered in its muscle cars of the 60s and early 70s. It was installed in the Camaro, Chevelle, Buick GS, Pontiac GTO, Olds Cutlass, and many other classic cars. Many owners want to retain the original transmission in their classic cars to maintain its value. Transmission expert and veteran author Paul Cangialosi has created an indispensable reference to Muncie 4-speeds that guides you through each crucial stage of the rebuild process. Comprehensive ID information is provided, so you can positively identify the cases, shafts, and related parts. It discusses available models, parts options, and gearbox cases. Most important, it shows how to completely disassemble the gearbox, identify wear and damage, select the best parts, and complete the rebuild. It also explains how to choose the ideal gear ratio for a particular application. Various high-performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight, and achieving race-specific clearances. Muncie 4-speeds need rebuilding after many miles of service and extreme use. In addition, when a muscle car owner builds a high-performance engine that far exceeds stock horsepower, a stronger high-performance transmission must be built to accommodate this torque and horsepower increase. No other book goes into this much detail on the identification of the Muncie 4-speed, available parts, selection of gear ratios, and the rebuild process.

BUILDING A SPECIAL WITH ANT ANSTEAD MASTER MECHANIC

FOLLOWING THE BUILD OF ANT'S OWN CLASSIC F1 SINGLE-SEATER SPECIAL

Haynes Manuals Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant

Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.
