Saginaw in Vintage Postcards

Arcadia Publishing *Because of its excellent river system, Saginaw developed from an Indian village into a bustling lumber town. In its early days, investors came from eastern cities and became wealthy lumber barons. They built beautiful mansions, hotels, and public buildings while they also supported civic projects. Before consolidating, there were two cities: East Saginaw and Saginaw City, separated by the Saginaw River. Many German societies, schools, and churches were organized in the area, due to the large number of residents with a German heritage. The early residents survived fires, floods, and the end of the lumber boom. Other industries developed and the city continued to grow. The rare postcards that appear in this book depict many historical buildings, the two separate cities, the German influence, and the philanthropy of the lumber barons. Join author Roberta Morey on a journey through Saginaw's rich industrial and cultural history.*

A Memoir by the Cofounder of Microsoft

Penguin *By his early thirties, Paul Allen was a world-famous billionaire-and that was just the beginning. In 2007 and 2008, Time named Paul Allen, the cofounder of Microsoft, one of the hundred most influential people in the world. Since he made his fortune, his impact has been felt in science, technology, business, medicine, sports, music, and philanthropy. His passion, curiosity, and intellectual rigor-combined with the resources to launch and support new initiatives-have literally changed the world. In 2009 Allen discovered that he had lymphoma, lending urgency to his desire to share his story for the first time. In this classic memoir, Allen explains how he has solved problems, what he's learned from his many endeavors-both the triumphs and the failures-and his compelling vision for the future. He reflects candidly on an extraordinary life. The book also features previously untold stories about everything from the true origins of Microsoft to Allen's role in the dawn of private space travel (with SpaceShipOne) and in discoveries at the frontiers of brain science. With honesty, humor, and insight, Allen tells the story of a life of ideas made real.*

Bird Skin Coat

Univ of Wisconsin Press *Bird Skin Coat* is brimming with startling moments of beauty found within a rusty and decayed landscape. With wild lyrical images of ascent and descent—doves and dives, sparrows and slugs, attics and cellars—this collection reflects Sorby's keen eye for blending images. As they shuttle between the Upper Midwest and the Pacific Northwest, these poems explore how the radical instability of the world is also the source of its energy. Honorable Mention, Posner Book-Length Poetry Award, Council for Wisconsin Writers Winner, Best Book of Poetry, Midwest Book Awards Winner, Lorine Niedecker Poetry Award, Council for Wisconsin Writers

Historic Landscape Design and Construction

JHU Press *The Office of Strategic Services, the forerunner of the Central Intelligence Agency, was founded in 1942 by William 'Wild Bill' Donovan under the direction of President Roosevelt, who realized the need to improve intelligence during wartime. A rigorous recruitment process enlisted agents from both the armed services and civilians to produce operational groups specializing in different foreign areas including Italy, Norway, Yugoslavia and China. At its peak in 1944, the number of men and women working in the service totaled nearly 13,500. This intriguing story of the origins and development of the American espionage forces covers all of the different departments involved, with a particular emphasis on the courageous teams operating in the field. The volume is illustrated with many photographs, including images from the film director John Ford who led the OSS Photographic Unit and parachuted into Burma in 1943.*
