If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments

are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time. **The last Shelby Cobra My times with Carroll Shelby** Veloce Publishing Ltd Carroll Shelby, legendary driving ace, race team owner, and designer of Shelby Cobra, Daytona, and Mustang GT350 classics is revered by automotive enthusiasts, yet little has been written about the last quarter century of Carroll Shelby's life. During that time Chris Theodore, VP at Chrysler and Ford, developed a close personal friendship with Carroll. The Last Shelby Cobra chronicles the development of the many vehicles they worked on together (Viper, Ford GT, Shelby Cobra Concept, Shelby GR1, Shelby GT500 and others). It is an insider's story about how Shelby came back to the Ford family, and the intrigue behind the five-year journey to get a Shelby badge on a Ford Production Vehicle. The author provides fresh insight and new stories into Shelby's larger-than-life personality, energy, interests and the many unpublished projects Carroll was involved with, up to his passing. Finally, the book describes their unfinished project, the Super Snake II Cobra, and the serendipitous circumstances that allowed to the author to acquire 'Daisy,' the last Shelby Cobra. To his many fans, Carroll Shelby was truly 'the most interesting man in the world.'

The YF-17 was one of the two prototypes tested in the U.S. Air Force Air Combat Fighter competition, a program which attempted to reverse the trend of increasing cost and complexity of new fighter aircraft, and which resulted in the selection and manufacture of the F-16 as the next generation free world fighter. Even though the YF-17 lost the USAF competition, it was the prototype for the U.S. Navy's F/A-18 aircraft. Don Logan is also the author of *Rockwell B-1B: SAC's Last Bomber*, *The 388th Tactical Fighter Wing: At Korat Royal Thai Air Force Base 1972*, and *Northrop's T-38 Talon: A Pictorial History*(all three available from Schiffer Publishing Ltd.). **Visionary Ayahuasca A Manual for Therapeutic and Spiritual Journeys** Simon and Schuster A "what to expect" guide for first-time ayahuasca users paired with accounts from the author's extensive shamanic experiences in the Amazon • Describes how to prepare for the first ceremony, what to do in the days afterward, and how to maintain a shamanic healing diet • Details some of the author's own ayahuasca experiences, including an intensive trip in 2009 when he underwent 17 ceremonies • Explores the many other plants that are part of the ayahuasca healer's medicine cabinet as well as the icaros, healing songs, of the ayahuasca shaman Since 1999 Jan Kounen has regularly traveled to the Peruvian Amazon to participate in ayahuasca ceremonies. At first only a curious filmmaker, over multiple trips he transformed from explorer to apprentice to ayahuasquero and often found himself surrounded by other foreigners coming to the jungle for their first taste of ayahuasca medicine. Knowing how little guidance is available on how to prepare or what to expect, he naturally offered them advice. Part visionary ayahuasca memoir and part practical guide, this book contains the same step-by-step advice that Kounen provides first-time ayahuasca users in the jungle. He describes how to prepare for the first ceremony and what to do in the days afterward. He explores how to deal with the nausea and details the special preparatory diets an ayahuasca shaman will put you on, often lasting for months but necessary for life-transforming results and teachings from the plant spirits. He also explains how it is far easier to maintain these restrictions in the jungle than in the city. Detailing his own ayahuasca experiences over hundreds of sessions, including a trip in 2009 when he underwent 17 ceremonies in 25 days, Kounen describes how ayahuasca transformed him. He tells of his meetings with Shipibo healers, including Kestenbetsa, who opened the doors of this world for him, and Panshin Beka, the shaman to whom Kounen became an apprentice. He details the many other plants and foods that are part of the ayahuasca healer's medicine cabinet, such as toé and tobacco, as well as their icaros, or healing songs. A veritable "what to expect" guide, this book should be your first step prior to committing to ayahuasca. **How to Rebuild the Small-Block Ford** CarTech Inc This revised and updated color edition of *How to Rebuild the Small-Block Ford* walks you step by step through a rebuild, including: planning your rebuild, disassembly and inspection, choosing the right parts, machine work, assembling your engine, and first firing and break-in. **Parachute Rigger Handbook Roadway Lighting Design Guide AASHTO Street Design Manual** "The Street Design Manual is New York City's comprehensive resource on street design guidelines, policies, and processes. Have you read (or stumbled into) one too many irrational online debates? Ali Almossawi certainly had, so he wrote *An Illustrated Book of Bad Arguments!* This handy guide is here to bring the internet age a much-needed dose of old-school logic (really old-school, a la Aristotle). Here are cogent explanations of the straw man fallacy, the slippery slope argument, the ad hominem attack, and other common attempts at reasoning that actually fall short—plus a beautifully drawn menagerie of animals who (adorably) commit every logical faux pas. Rabbit thinks a strange light in the sky must be a UFO because no one can prove otherwise (the appeal to ignorance). And Lion doesn't believe that gas emissions harm the planet because, if that were true, he wouldn't like the result (the argument from consequences). Once you learn to recognize these abuses of reason, they start to crop up everywhere from congressional debate to YouTube comments—which makes this geek-chic book a must for anyone in the habit of holding opinions. **V-8 Horsepower Performance Handbook** Motorbooks International Approaching the high-performance engine as a whole--system of interdependent components--this book provides the know-how for keeping your V-8 in top form. **Myasthenia Gravis A Manual for the Health Care Provider** **MerCruiser Stern Drive Shop Manual 1998-2004** Haynes Manuals N.
