The Hydrogen Age

Empowering a Clean-energy Future

Gibbs Smith "Hydrogen linked with clean, renewable sources of energy provides the prescription for the ills of an ailing planet. Geoffrey B. Holland and James J. Provencano's hallmark book 'The hydrogen age' details just how this remarkable energy carrier has been vital to the workings of the universe since the beginning of time, and why it is now ready to play a central part in healing our Earth, our atmosphere, and the world's economies as a clean-energy commodity." - book jacket.

David Lean's Dedicated Maniac

Memoirs of a Film Specialist

Austin Macauley Pub Limited **From blowing up the bridge on the River Kwai to covering the Spanish countryside in fake snow for Doctor Zhivago, Eddie Fowlie led a remarkable career. From modest beginnings in a quiet London suburb, he broke into the movie industry during Hollywood's golden era to work with some of the world's leading directors, setting new standards as a film specialist and all-round troubleshooter. But it was his unique relationship with David Lean that provided him some of the most cherished years of his career. The two were a perfect foil for each other, becoming close friends until the end of the director's life. Fowlie's candid life-story is also a hilarious roller coaster ride by one of life's mavericks - a true dedicated maniac.**

Conflict Without Casualties

A Field Guide for Leading with Compassionate Accountability

Berrett-Koehler Publishers **Make Conflict Your Partner for Positive Change!** Clinical psychologist and transformative communication expert **Dr. Nate Regier** believes that the biggest energy crisis facing our world is the misuse of conflict. Most organizations are terrified of conflict, seeing it as a sign of trouble. But conflict isn't the problem, says Regier. It's all about how we use the energy. When people misuse conflict energy, it becomes drama: they struggle against themselves or each other to feel justified about their negative behavior. The cost to companies, teams, and relationships is staggering. The alternative, says Regier, is **compassionate accountability: struggling with others through conflict.** Discover the **Compassion Cycle**, an elegant model for balancing empathy, care, and transparency with boundaries, goals, and standards. Provocative, illuminating, and highly practical, this book helps us avoid the casualties of conflict through openness, resourcefulness, and persistence.

How to Build a High-Performance

Mazda Miata MX-5

Motorbooks The Mazda Miata is one of the most popular sports cars on the road today. In production for more than 20 years, the Miata's popularity has grown, and the number of aftermarket components available to the Miata enthusiast has grown, too. This immense selection of parts has made it difficult for many would-be modifiers to choose the proper combination that will help them reach the goals they have set for their two-seaters. Author and Miata expert Keith Tanner has been modifying, repairing, building, and racing Miatas for years, and he will guide you through how to best modify your car to suit your needs, starting with an explanation on how everything works and how the various parts will interact. You'll not only learn what upgrades will help you reach your goals, but also how to adjust or modify what you have to make your car work at its best. From autocross to cross-country touring, the Miata can do it all. Keith Tanner tells you how to make it happen!

Biodiesel

Growing a New Energy Economy, 2nd Edition

Chelsea Green Publishing **For anyone who is trying to keep up with the extremely rapid developments in the biodiesel industry, the second edition of *Biodiesel: Growing a New Energy Economy* is an invaluable aid. The breathtaking speed with which biodiesel has gained acceptance in the marketplace in the past few years has been exceeded only by the proliferation of biodiesel production facilities around the United States--and the world--only to confront new social and environmental challenges and criticisms. The international survey of the biodiesel industry has been expanded from 40 to more than 80 countries, reflecting the spectacular growth of the industry around the world. This section also tracks the dramatic shifts in the fortunes of the industry that have taken place in some of these nations. The detailed chapters that cover the industry in the United States have also been substantially rewritten to keep abreast of its many new developments and explosive domestic growth. An expanded section on small-scale, local biodiesel production has been added to better represent this small but growing part of the industry. Another new section has been added to more fully explore the increasingly controversial issues of deforestation and food versus fuel, as well as GMO crops. The second edition concludes with updated views on where the industry is headed in the years to come from some of its key players.**
