THE RAINBOW

ABSOLUTELY HEARTBREAKING WORLD WAR 2 HISTORICAL FICTION BASED ON A TRUE STORY

Bookouture *There, on the dusty floorboards, was a piece of paper, folded neatly. A newspaper article, written in German, alongside a faded picture of two men in Nazi uniforms staring at the camera. I was about to place it back in the box of forgotten things when something in the text jumped out at me. My breath caught in my chest. I know that name. London, present day. Isla has grown up hearing her beloved grandad's stories about his life as a child in pre-war Poland and as a young soldier bravely fighting the Germans to protect his people. So she is shocked and heartbroken to find, while collecting photos for his 95th birthday celebration, a picture of her dear grandfather wearing a Nazi uniform. Is everything she thought she knew about him a lie? Unable to question him due to his advanced dementia, Isla wraps herself in her rainbow-coloured scarf, a memento of his from the war, and begins to hunt for the truth behind the photograph. What she uncovers is more shocking than she could have ever anticipated - a tale of childhood sweethearts torn apart by family duty, and how one young man risked his life, his love and the respect of his own people, to secretly fight for justice from inside the heart of the enemy itself... An heartbreaking novel of love, betrayal and a secret passed down through a family. Inspired by an incredible true story. Perfect for fans of The Tattooist of Auschwitz, We Were the Lucky Ones and The Alice Network. DATABASE OF PROMPT GAMMA RAYS FROM SLOW NEUTRON CAPTURE FOR ELEMENTAL ANALYSIS

IAEA Neutron-capture prompt-gamma activation analysis (PGAA) is particularly valuable as a non-destructive nuclear method in the measurement of elements that do not form neutron capture products with delayed gamma ray emissions. Inaccurate and incomplete data have been a significant hindrance in the qualitative and quantitative analysis of complicated capture gamma spectra by means of PGAA. This database was produced to improve the quality and quantity of required data in order to make possible the reliable application of PGAA in fields such as materials science, geology, mining, archaeology, environment, food analysis and medicine. The database provides a variety of tables for all natural elements (from H to U) including the following data: isotopic composition, thermal radiative cross-section (total and partial), Westcott g-factors, energy of the gamma rays (prompt and delayed), decay mode, half-life and branching ratios. The CD-ROM included in this publication contains the database, the retrieval system and important electronic documents related to the project.--Publisher's description.

TOWARDS EFFECTIVE DISEASE CONTROL IN GHANA: RESEARCH AND POLICY IMPLICATIONS

VOLUME 2 OTHER INFECTIOUS DISEASES AND HEALTH SYSTEMS

Sub-Saharan Publishers The Noguchi Memorial Institute for Medical Research (NMIMR) was established in 1979 as a semi autonomous Institution of the University of Ghana. In 2000 it became one of the six founding constituent institutions of the College of Health Sciences. Its original mandate, to research into infectious tropical diseases of public health importance in Ghana, has lately been expanded to include non-communicable diseases. The Institute since its inception has offered undergraduate and graduate research opportunities, and training to numerous students and scientists as well as specialized diagnostic services to support national health programmes. The varied papers presented in these two volumes show that the Noguchi Memorial Institute for Medical Research has a diverse research portfolio aimed at supporting health care policy formulation and delivery in Ghana. It envisaged that students in tertiary institutions, especially those contemplating a career in biomedical research, research scientists as well as the general public, will come to appreciate the broad field of research being conducted in the Institute. Policy makers should also find the readers useful as they provide data, which could underpin health policies in the country. Volume one presents papers on malaria while volume two covers other research areas including TB, neglected tropical diseases, diarrhoea and viral infections as well as phyto-medicines and health systems.

CONSOLIDATED GUIDELINE ON SEXUAL AND REPRODUCTIVE HEALTH AND RIGHTS OF WOMEN LIVING WITH HIV

World Health Organization The starting point for this guideline is the point at which a woman has learnt that she is living with HIV, and it therefore covers key issues for providing comprehensive sexual and reproductive health and rights-related services and support for women living with HIV. As women living with HIV face unique challenges and human rights violations related to their sexuality and reproduction within their families and communities, as well as from the health-care institutions where they seek care, particular emphasis is placed on the creation of an enabling environment to support more effective health interventions and better health outcomes. This guideline is meant to help countries to more effectively and efficiently plan, develop and monitor programs and services that promote gender equality and human rights and hence are more acceptable and appropriate for women living with HIV, taking into account the national and local epidemiological context. It discusses implementation issues that health interventions and service delivery must address to achieve gender equality and support human rights.

This book examines the three generations of Subaru Impreza WRX and WRX STI from 1992 - 2012, including how the roadgoing cars were developed from the successful rally models, production history and specification details. Topics covered include: History of the Impreza, and early days in competition with the Leone and the Legacy models. Construction and derivatives of the distinctive flat-four engine.
