Auto Repair For Dummies

John Wiley & Sons **Auto Repair For Dummies, 2nd Edition (9781119543619)** was previously published as **Auto Repair For Dummies, 2nd Edition (9780764599026)**. While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Antistatic Sprays

Independently Published Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is

not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

Highway 61 Resurfaced

A Novel

Harper Collins **FM rock deejay and private investigator Rick Shannon is back in a big way in the second novel of a series that began with the rollicking *Radio Activity*. *Highway 61 Resurfaced* kicks off when a woman named Lollie Woolfolk sashays into the offices of *Rockin' Vestigations* and says she wants to find her long lost granddaddy, blues producer Tucker Woolfolk. Before it's over, Rick Shannon has crisscrossed the sweltering Mississippi Delta in search of the thread that connects a dead man in Yazoo City found with a fork stuck in his back to an old man known as Pigfoot Morgan who was just released from Mississippi State Penitentiary after serving fifty years for murder. Further complicating matters is the lovesick Crail Pitts, onetime Ole Miss football star who is driving around the Magnolia State with a noisy lawyer in his trunk, and Cuffie LeFleur, one of four generations of a cotton dynasty that may be on its last legs. In the end, everything points to one of the great mysteries in blues lore: whether Blind Buddy Cotton, Crippled Willie Jefferson, and Crazy Earl Tate ever recorded together. When Rick starts a rumor that he's found the tapes from the legendary Blind, Crippled, and Crazy sessions, a killer is sent to collect them and Rick starts singing the PI blues.**

Advanced Electric Drive Vehicles

CRC Press **Electrification is an evolving paradigm shift in the transportation industry toward more efficient, higher performance, safer, smarter, and more reliable vehicles. There is in fact a clear trend to move from internal combustion engines (ICEs) to more integrated electrified powertrains. Providing a detailed overview of this growing area, *Advanced Electric Drive Vehicles* begins with an introduction to the automotive industry, an explanation of the need for electrification, and a presentation of the fundamentals of conventional vehicles and ICEs. It then proceeds to address the major components of electrified vehicles—i.e., power electronic converters, electric machines, electric motor controllers, and energy storage systems. This comprehensive work: Covers more electric vehicles (MEVs), hybrid electric vehicles (HEVs), plug-in hybrid electric vehicles (PHEVs), range-extended electric vehicles (REEVs), and all-electric vehicles (EVs) including battery electric vehicles (BEVs) and fuel cell vehicles (FCVs) Describes the electrification technologies applied to nonpropulsion loads, such as power steering and air-conditioning systems Discusses hybrid battery/ultra-capacitor energy storage systems, as well as 48-V electrification and belt-driven starter generator systems Considers vehicle-to-grid (V2G) interface and electrical infrastructure issues, energy management, and optimization in advanced electric drive vehicles Contains numerous illustrations, practical examples, case studies, and challenging questions and problems throughout to ensure a solid understanding of key concepts and applications *Advanced Electric Drive Vehicles* makes an ideal textbook for senior-level undergraduate or graduate engineering courses and a user-friendly reference for researchers, engineers, managers, and other professionals interested in transportation electrification.**

Automotive News

Tall Life

This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things? And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this? These questions and more will all be answered by a tall protagonist over eight chapters: Evolution, Scaling, Spine, Manufactured, Ergonomics, Growth, Longevity, and Society.

Elementary Chemical Reactor Analysis

Butterworths Series in Chemical Engineering

Butterworth-Heinemann **Elementary Chemical Reactor Analysis** focuses on the processes, reactions, methodologies, and approaches involved in chemical reactor analysis, including stoichiometry, adiabatic reactors, external mass transfer, and thermochemistry. The publication first takes a look at stoichiometry and thermochemistry and chemical equilibrium. Topics include heat of formation and reaction, measurement of quantity and its change by reaction, concentration changes with a single reaction, rate of generation of heat by reaction, and equilibrium of simultaneous and heterogeneous reactions. The manuscript then offers information on reaction rates and the progress of reaction in time. Discussions focus on systems of first order reactions, concurrent reactions of low order, general irreversible reaction, variation of reaction rate with extent and temperature, and heterogeneous reaction rate expressions. The book examines the interaction of chemical and physical rate processes, continuous flow stirred tank reactor, and adiabatic reactors. Concerns include multistage adiabatic reactors, adiabatic stirred tank, stability and control of the steady state, mixing in the reactor, effective reaction rate expressions, and external mass transfer. The publication is a dependable reference for readers interested in chemical reactor analysis.

50 Years Of Transportation In Singapore: Achievements And Challenges

World Scientific This unique volume presents the achievements of the land, sea and air transport industry of Singapore in the last 50 years after Singapore gained its independence in 1965. It provides a comprehensive overview of Singapore's progress in transportation from a typical third world system in the 1960s to one that is currently in the top league globally in all aspects of passenger and freight transportation. Singapore's successes in land transport planning, urban traffic management, and public transport systems provide valuable experience for major cities worldwide. The emergence of the Singapore Port as the most efficient container port in the world is another success

story that inspires both established and up-and-coming port operators alike. The ambitious goal of Singapore to develop itself into a maritime knowledge hub of the future is a bold and exciting undertaking catching worldwide attention. In air transport, Singapore is well known for its efficiency as a major regional hub. This book examines in detail the important milestones and background developments that have led to the highly advanced state of transportation systems in the land, sea and air transport of Singapore today. Each chapter is written by professionals who are themselves part of the success stories presented. The chapter authors are specially invited to provide a professional account of the topics of their expertise. The authors have been able to draw on extensive amounts of published and unpublished documents and reports to present a comprehensive picture for the subject of interest in each chapter. As a whole, the book offers a holistic and informative professional reference book on the major happenings and achievements of Singapore in the transportation sector.

The Garden of Evil

Pan Macmillan The Garden of Evil is the sixth in the Nic Costa series, David Hewson's detective novels of love and death in the Eternal City. The picture possessed a frightful beauty, one which burned so brightly that, once witnessed, could never be unseen . . . Even the presence of two corpses, one clearly murdered, the other dead through strange and suspicious circumstances, did nothing to distract their attention from the canvas . . . In a hidden studio in an area of Rome where the Vatican liked to keep an eye on the city's prostitutes, an art expert from the Louvre is found dead in front of one of the most beautiful paintings that Nic Costa has ever seen - an unknown Caravaggio masterpiece. But before long tragedy will strike Nic far closer to home. The main suspect's identity is known, but he remains untouchable - protected in his grand palazzo by a fleet of lawyers and a sinister cult known as the Ekstasists. If Costa and his team can crack the reasons for the cult's existence, he may well stand a chance of nailing the double-killer. But the mystery will take him right back to Caravaggio himself and the reasons he had to flee Rome all those centuries before . . .

Animals Don't Blush

A. V. Harrison Publishing **The confluence of the Yellowstone and Missouri Rivers is a region of the USA steeped in histories of the mountain man, fur traders and the northern upper plains nomadic tribes. I joined a veterinary practice there in 1960, directly out of veterinary school. Our clients included townspeople, river valley farmers, high prairie dry land wheat farmers and ranchers, and North Dakota Badlands ranchers, the later doing their best to wrest a living from government grazing leases and their too small homesteads. All were determined, independent-minded folks who expected their veterinarian to be physically tough, knowledgeable about all species of animals, and skilled in the practice of the profession. Our animal patients were the same as they are today prone to the same illnesses and injuries. They were for the most part stoic and never embarrassed by anything they did or that was done to them. The characters in this book are those people, those animals, and that time and place. This is also the story of the personal relationship between my new bride and me as we learn to cope with being away from family, making new friends in a community foreign to us, and being Jewish in an area of the country with few Jews and a history of anti-Semitism. The story is complicated by the strained relationship between the veterinarian I work for and his wife and her family.**
