Incidence of Pedestrian and Bicyclist Crashes by Hybrid Electric Passenger Vehicles

Technical Report

DIANE Publishing Examines the incidence rates of pedestrian and bicyclist crashes that involved hybrid electric vehicles (HEV) and compares the results to internal combustion engine (ICE) vehicles under similar circumstances. State crash files from the Nat. Highway Traffic Safety Admin.'s State Data System were used to measure the incidence rates of pedestrian and bicyclist crashes by HEVs and to compare the incidence rate with their peer ICE vehicles. This study found that pedestrian and bicyclist crashes involving both HEVs and ICE vehicles commonly occurred on roadways, in zones with low speed limits, during daytime and in clear weather, with higher incidence rates for HEVs when compared to ICE vehicles. Charts and tables.

Green Transportation Basics

A Green Energy Guide

New Society Publishers Our automobile culture is devastating for the environment, but private passenger vehicles are unlikely to disappear from our roads anytime soon. Greener cars and fuels will be a necessity for many years to come. Green Transportation Basics is a guide to greening your personal driving habits by dramatically improving the efficiency of an existing vehicle using simple measures such as trip planning and regular maintenance to improve fuel economy. This handy guide also explores the most promising new green cars and trucks, including electric vehicles, hybrids, plug-in hybrids, and natural-gas cars. And it critically examines sustainable fuels including ethanol, biodiesel, straight vegetable oil, hydrogen, and biomethane, evaluating each according to a set of established criteria. Each green fuel source must: Be socially, economically, and environmentally sustainable Have a high net energy yield Be clean, abundant, renewable, and affordable Don't let your dream of greening your transportation idle—Green Transportation Basics will guide you through the myths and misconceptions and provide clear options for the road to a more sustainable future. Dan Chiras is a respected educator and author who has published nearly thirty books on renewable energy and sustainable living, including Power from the Sun and Power from the Wind. He is the director of the Evergreen Institute, where he teaches workshops on green transportation, including green fuels and vehicles and electric car conversion.

Parentology

Everything You Wanted to Know about the Science of Raising Children but Were Too Exhausted to Ask

Simon and Schuster An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Days of Fear

A Firsthand Account of Captivity Under the New Taliban

Penguin On March 5, 2007, Daniele Mastrogiacomo, his driver, and his interpreter were captured by the Taliban. His captors threatened to execute him if Italy did not immediately withdraw its troops from Afghanistan. When Italy refused this demand, the driver, twenty-five-year old Sayed Agha, was decapitated before Mastrogiacomo's eyes. A video of this horrifying event was shown around the world, and Mastrogiacomo spent the rest of his time in captivity, convinced that a similar fate would soon befall him. His jail, however, was not a dark room hidden away in some urban periphery, but a kind of open-air prison: to escape detection, his captors dragged him from village to village, through opium plantations, along dusty roads and over rugged mountains, from one end of Afghanistan to the other. It was a captivity that consisted in a continuous and nerve-racking confrontation with a world that bore no resemblance to that which he had ever known. Mastrogiacomo draws from his experience not only a hostage's tale of captivity but also a story that lies at the heart of the eternal human drama: that of a man's encounter with The Other. As brilliantly crafted as a first-rate suspense novel and with the kind of emotional impact associated with the best literary fiction, Mastrogiacomo's story of courage and tenacity in the face of imminent danger is unforgettable.

Angel on My Shoulder

I've Joined the Lucky Bastard Club

Author House Harley Hamilton Tuck decided when he was a teenager he wanted to leave the world a better place than it was when he got here. He flew combat during World War II as a radio operator aboard a B-17 bomber, completing twenty-seven missions before bailing out of a flaming ship over France to spend a year in Austria's infamous Stalag 17B as a Prisoner of War. Tuck took the opportunity to begin educating himself in the field of agriculture, attended college when he returned to the States, and started teaching a few years later. Tuck took his skills around the world over the course of his career, training outreach workers among the remote Hill Tribes near the Laotian border for a decade, joining the United Nations Food and Agriculture Organization and relocating to Afghanistan in 1972, where he supervised a fleet of United Nations vehicles and farm equipment, working with Afghan mechanics who taught him as much as he taught them. When he accepted a UN position in Indonesia, Tuck continued training teachers, working through various programs in rural areas to improve and modernize agricultural practices. He eventually created his own Indonesian corporation to provide consulting services in his field, learning, growing, and teaching until his retirement in the late 1990s. Tuck credits the "Angel" on his shoulder for escorting him through the harrowing collection of hazards and close calls he encountered in his extensive travels. Hitch a ride from a fruit ranch in central Washington state through the fiery skies of the European War Theater, tour the back-country of Thailand, the noisy streets of Kabul and Java's steamy jungles with Tuck for a first-class adventure with a generous-hearted and unusual man whose desire was to leave a positive mark on this world.

Emily Post's Etiquette, 19th Edition

Manners for Today

HarperCollins Completely revised and updated with a focus on civility and inclusion, the 19th edition of Emily Post's Etiquette is the most trusted resource for navigating life's every situation From social networking to social graces, Emily Post is the definitive source on etiquette for generations of Americans. That tradition continues with the fully revised and updated 19th edition of Etiquette. Authored by etiquette experts Lizzie Post and Daniel Post Senning—Emily Post's great-great grandchildren—this edition tackles classic etiquette and manners advice with an eye toward diversity and the contemporary sensibility that etiquette is defined by consideration, respect, and honesty. As our personal and professional networks grow, our lives become more intertwined. This 19th edition offers insight and wisdom with a fresh approach that directly reflects today's social landscape. Emily Post's Etiquette incorporates an even broader spectrum of issues while still addressing the traditions that Americans appreciate, including: Weddings Invitations Loss, grieving, and condolences Entertaining at home and planning celebrations Table manners Greetings and introductions Social media and personal branding Political conversations Living with neighbors Digital networking and job seeking The workplace Sports, gaming, and recreation Emily Post's Etiquette also includes advice on names and titles—including Mx.—dress codes, invitations and gift-giving, thank-you notes and common courtesies, tipping and dining out, dating, and life milestones. It is the ultimate guide for anyone concerned with civility, inclusion, and kindness. Though times change, the principles of good etiquette remain the same. Above all, manners are a sensitive awareness of the needs of others—sincerity and good intentions always matter more than knowing which fork to use. The Emily Post Institute, Inc., is one of America's most unique family businesses. In addition to authoring books, the Institute provides business etiquette seminars and e-learning courses worldwide, hosts the weekly Q&A podcast Awesome Etiquette and trains those interested in teaching Emily Post Etiquette.

The Origin of Competitive Strength

Fifty Years of the Auto Industry in Japan and the U.S.

Springer Science & Business Media When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.

Paper Towns

A&C Black Special edition slipcase edition of John Green's Paper Towns, with pop-up paper town. From the bestselling author of The Fault in our Stars, Quentin Jacobsen has always loved Margo Roth Spiegelman, for Margo (and her adventures) are the stuff of legend at their high school. So when she one day climbs through his window and summons him on an all-night road trip of revenge he cannot help but follow. But the next day Margo doesn't come to school and a week later she is still missing. Q soon learns that there are clues in her disappearance . . . and they are for him. But as he gets deeper into the mystery - culminating in another awesome road trip across America - he becomes less sure of who and what he is looking for. Masterfully written by John Green, this is a thoughtful, insightful and hilarious coming-of-age story.

Mom vs. Dad

The Not-So-Serious Guide to the Stuff We're All Fighting About

Worthy Books The not so serious guide to the stuff we're all fighting about. While a husband and wife's parenting styles may be worlds apart, they both have the same goal: to raise happy kids who feel unconditionally loved. Mom vs. Dad is packed with sidesplitting and vulnerable personal essays from the trenches of parenthood. In this book, Lucy and Tom Riles tackle relatable topics such as: Is bringing a toaster oven to a 5-star resort tacky or genius? Is it appropriate to lick your plate clean at a restaurant? Does the expiration date on food really matter? Illustrations of family life will also be included in this intimate and inspiring narrative about the challenges and triumphs of raising children. Mom vs. Dad is the perfect gift for anyone who needs a relatable couple to guide them through some of the toughest (and funniest) issues parents face today.

Ford 351 Cleveland Engines

How to Build for Max Performance

CarTech Inc Ford's 351 Cleveland was designed to be a 'mid-sized' V-8 engine, and was developed for higher performance use upon its launch in late 1969 for the 1970 models. This unique design proved itself under the hood of Ford's Mustang, among other high performance cars. The Cleveland engine addressed the major shortcoming of the Windsor engines that preceded it, namely cylinder head air flow. The Windsor engines just couldn't be built at the time to compete effectively with the strongest GM and Mopar small blocks offerings, and the Cleveland engine was the answer to that problem. Unfortunately, the Cleveland engine was introduced at the end of Detroit's muscle car era, and the engine, in pure Cleveland form, was very short lived. It did continue on as a low compression passenger car and truck engine in the form of the 351M and 400M, which in their day, offered little in the way of excitement. Renewed enthusiasm in this engine has spawned an influx of top-quality new components that make building or modifying these engines affordable. This new book reviews the history and variations of the 351 Cleveland and Ford's related engines, the 351M and 400M. Basic dimensions and specifications of each engine, along with tips for identifying both design differences and casting number(s) are shown. In addition to this, each engine's strong points and areas of concern are described in detail. Written with high performance in mind, both traditional power tricks and methods to increase efficiency of these specific engines are shared. With the influx of aftermarket parts, especially excellent cylinder heads, the 351 Cleveland as well as the 351M and 400M cousins are now seen as great engines to build. This book will walk you through everything you need to know to build a great street or competition engine based in the 351 Cleveland platform.

Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles

National Academies Press The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.
