### LEMON-AID NEW CARS AND TRUCKS 2011

---

Dundurn As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

### THE HACK MECHANIC GUIDE TO EUROPEAN AUTOMOTIVE ELECTRICAL SYSTEMS

---

Bentley Publishers Electrical issues in European cars can be intimidating. The Hack Mechanic Guide to European Automotive Electrical Systems shows you how to think about electricity in your car and then take on real-world electrical problems. The principles discussed can be applied to most conventional internal-combustion-engined vehicles, with a focus on European cars spanning the past six decades. Drawing on The Hack Mechanic's wisdom and experience, the 38 chapters cover key electrical topics such as battery, starter, alternator, ignition, circuits, and relays. Through a practical and informal approach featuring hundreds of full-color illustrations, author Rob Siegel takes the fear-factor out of projects like making wire repairs, measuring voltage drops, or figuring out if you have a bad fuel pump relay. Essential tools such as multimeters (DVOM), oscilloscopes, and scan tools are discussed, with special attention given to the automotive multimeter needed to troubleshoot many modern sensors. You'll get step-by-step

troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed sensors, fuel pumps, solenoids, and actuators. Reading wiring diagrams and decoding the German DIN standard are also covered. Whether you are a DIY mechanic or a professional technician, *The Hack Mechanic Guide to European Automotive Electrical Systems* will increase your confidence in tackling automotive electrical problem-solving. This book applies to gasoline and diesel powered internal combustion engine vehicles. Not intended for hybrid or electric vehicles.

## **THE YUGO**

---

### **THE RISE AND FALL OF THE WORST CAR IN HISTORY**

---

Hill and Wang Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
