SEVENTY YEARS OF FARM TRACTORS 1930-2000

Fox Chapel Publishing By the end of the twentieth century there were some half-million tractors on British farms - more machines than people to drive them. Brian Bell's encyclopaedic book traces the evolution of the farm tractor from the days of starting handle and pan seat to current 4-wheel drive machines with air-conditioned cabs and computer management systems. He deals in particular with developments of the classic period from the 1950s to the 1990s. The book is arranged alphabetically by manufacturer from Allis-Chalmers to Zetor, one hundred marques in total. These are all machines to be found on British farms irrespective of their country of manufacture. Brian runs concisely through the histories of the companies and their major models, illustrated with a wealth of photographs and extracts from sales literature. He adds some special features on items such as hydraulic systems and cold-starting aids. He includes a glossary and full index. This book replaces the author's earlier, successful, *Fifty Years of Farm Tractors*. Many of the photographs are new and the text has been brought up to date to include developments of the early twenty-first century.

FLYING CANUCKS

FAMOUS CANADIAN AVIATORS

Dundurn Flying Canucks tells the fascinating story of aviation in Canada through this collection of 37 biographies of important aviators in our nation's history. As early as 1908, having read the Wright brothers' invention, Alberta farm boys and mechanics in Quebec villages were constructing large kites, attempting to fly them. Within a decade, Canadian air aces, like Bishop and Barker, swept the wartime skies over Frances, piloting deadly machines in mortal combat. Through the 20s, that very Canadian breed of adventurer, the bush pilot, ventured over the desolate tundra, delivering medicine and missionaries, mail and Mounties to remote communities as far as Ellesmere Island and Ungava Bay. Members of the Royal Canadian Air Force fought with distinction during the Second world War. Titles such as The Saviour of London and The Angel of Ceylon seem like wartime hype, but the skill and courage that those pilots displayed half a century ago set them apart still. For the six Canadian airmen who won the Victoria Cross, there were thousands who flew into the meat grinder that was the Allies' strategic air offensive over Europe. This book chronicles the exploits of only a few men and women - but it truly celebrates the spirit and resolve of countless brave Canadians who are proud part of aviation in this country.
