21st Century Sports

How Technologies Will Change Sports in the Digital Age

Springer Nature This book outlines the effects that technology-induced change will have on sport within the next five to ten years, and provides food for thought concerning what lies further ahead. Presented as a collection of essays, the authors are leading academics from renowned institutions such as Massachusetts Institute of Technology, Queensland University of Technology, and the University of Cambridge, and practitioners with extensive technological expertise. In their essays, the authors examine the impacts of emerging technologies like artificial intelligence, the Internet of Things, and robotics on sports and assess how they will change sport itself, consumer behavior, and existing business models. The book will help athletes, entrepreneurs, and innovators working in the sports industry to spot trendsetting technologies, gain deeper insights into how they will affect their activities, and identify the most effective responses to stay ahead of the competition both on and off the pitch.

Agro-industries for Development

CABI The development of competitive agro-industries is crucial for creating employment and income opportunities as well as enhancing the quality of and demand for farm products. Agro-industries can have a real effect on international development by increasing economic growth and reducing poverty in both rural and urban areas of developing countries. However, in order to avoid adverse effects to vulnerable countries and people, sound policies and strategies for fostering agro-industries are needed. Agro-Industries for Development highlights the current status and future course for agro-industries and brings attention to the contributions this sector can make to international development. The book includes contributions from agro-industry specialists, academic experts and UN technical agencies, chapters address the strategies and actions required for improving agro-industrial competitiveness in ways that can create income, generate employment and fight poverty in the developing world. This book is a co-publication with FAO and UNIDO.

Source Code China

The New Global Hub of IT (Information Technology) Outsourcing

John Wiley & Sons "The next five years will be [...] a period of opportunity for China to speed up the growth of software and information services outsourcing. China will continue to generate strong market demand for the global software industry." -H.E. Bo Xi Lai Minister, China Central Ministry of Commerce (MOFCOM) Praise for Source Code China The New Global Hub of IT Outsourcing "Cyrill Eltschinger's Source Code China examines the depths of a remarkable shift towards a value-added economy. After reading this book, you'll see once again how China is positioning itself for leadership in this growing area." -William G. Parrett Chief Executive Officer, Deloitte, May 2007 "In his book, Cyrill Eltschinger addresses an important perspective: China is not only 'the factory of the world,' it is also becoming a major technology services hub. For all of us, it is a fascinating experience to participate in this impressive evolution." -Josef M. Mueller Chairman & CEO, Nestle (China) Ltd "Source Code China provides an insightful touch with the reality of how China is reshaping the global market for offshore IT services." -Prof. Dr. Klaus Wucherer Executive Vice President, SIEMENS "This is a must-read to understand IT outsourcing in China and its impact on the rest of the world." -Dr. Andrew Lai VP/GM, Global Delivery China Center, Hewlett-Packard Company; International Economic Advisor to City Mayor of Chongqing, China; IT Strategy Advisor, City Mayor of Chengdu, China "In his book Source Code China, Mr. Eltschinger provides compelling reasons why any company can benefit from IT outsourcing to China, a country that is rapidly becoming the destination of choice for most enterprises." -Charles Pau Director, Globalization Architecture and Technology, IBM "This book demonstrates China's credentials as the new hub of offshore IT services." -Steve Little Senior Vice President and Chief Information Officer, D.S.I., Schneider Electric "Organizations not sourcing IT services from China are literally missing the boat. Mr. Eltschinger's book takes readers on an intellectual journey explaining how and why China is becoming the premier offshore destination for businesses all over the world. This is a must read for any business executive and I highly recommend you knock this one off your reading list immediately." -David Etzler Chief Executive Officer, OutsourceWorld If you are not in China, you are really not in the game

100 Recipes

The Absolute Best Ways To Make The True Essentials

America's Test Kitchen A provocative, handpicked collection of relevant (and surprising) essential recipes for today's cook. We have countless recipes at our disposal today but what are the real keepers, the ones that don't just feed us when we're hungry or impress our friends on Saturday night, but inspire us to get into the kitchen? At the forefront of American cooking for more than 20 years, the editors at America's Test Kitchen have answered this question in an essential collection of recipes that you won't find anywhere else: 100 Recipes Everyone Should Know How to Make. Organized into three recipe sections—Absolute Essentials, Surprising Essentials, and Global Essentials—each recipe is preceded by a thought-provoking essay that positions the dish. For example, Treating Pasta Like Rice Simplifies Everything; A Covered Pot Is a Surprisingly Good Place to Roast a Chicken; and Re-imagine Pie in a Skillet to Simplify the Process. You'll find useful workday recipes like a killer tomato sauce that's almost as easy as opening a jar of the store-bought stuff; genius techniques for producing amazing flavor—try poaching chicken breasts over a garlic-and-soy-spiked brine (trust us, it's that good); and familiar favorites reinvented—the best beef stew comes from Spain (and it's even easier to make than the stateside stew you've been eating for years). Gorgeous photography (shot right in the test kitchen) accompanies every recipe, revealing the finished dish as well as highlights of its preparation. Likely to stir debate among anyone interested in food and cooking, 100 Recipes Everyone Should Know How to Make provides a snapshot of how we cook today and will galvanize even the most jaded cook to get into the kitchen. From the Hardcover edition.

Strategic Collaboration in Public and Nonprofit Administration

A Practice-Based Approach to Solving Shared Problems

CRC Press Market disruptions, climate change, and health pandemics lead the growing list of challenges faced by today's leaders. These issues, along with countless others that do not make the daily news, require novel thinking and collaborative action to find workable solutions. However, many administrators stumble into collaboration without a strategic orientation. Using a practitioner-oriented style, *Strategic Collaboration in Public and Nonprofit Administration: A Practice-Based Approach to Solving Shared Problems* provides guidance on how to collaborate more effectively, with less frustration and better results. The authors articulate an approach that takes advantage of windows of opportunity for real problem solving; brings multi-disciplinary participants to the table to engage more systematically in planning, analysis, decision making, and implementation; breaks down barriers to change; and ultimately, lays the foundation for new thinking and acting. They incorporate knowledge gained from organization and collaboration management research and personal experience to create a fresh approach to collaboration practice that highlights: Collaboration Lifecycle Model Metric for determining why and when to collaborate Set of principles that distinguish Strategic Collaboration Practice Overall Framework of Strategic Collaboration Linking collaboration theory to effective practice, this book offers essential advice that fosters shared understanding, creative answers, and transformation results through strategic collaborative action. With an emphasis on application, it uses scenarios, real-world cases, tables, figures, tools, and checklists to highlight key points. The appendix includes supplemental resources such as collaboration operating guidelines, a meeting checklist, and a collaboration literature review to help public and nonprofit managers successfully convene, administer, and lead collaboration. The book presents a framework for engaging in collaboration in a way that stretches current thinking and advances public service practice.

Computer Methods in Biomechanics and Biomedical Engineering

CRC Press These papers are concerned with new advances and novel solutions in the areas of biofluids, image-guided surgery, tissue engineering and cardiovascular mechanics, implant analysis, soft tissue mechanics, bone remodeling and motion analysis. The contents also feature a special section on dental materials, dental adhesives and orthodontic mechanics. This edition contains many examples, tables and figures, and together with the many references, provides the reader with invaluable information on the latest theoretical developments and applications.

Sustainable Smart Cities in India

Challenges and Future Perspectives

Springer This book presents fundamental and applied research aimed at the development of smart cities across India. Based on the exploration of an extensive array of multidisciplinary literature, this book discusses critical factors of smart city initiatives: management and organization, technology, governance, policy, people and communities, economy, infrastructure, and natural environment. These factors are broadly covered under the integrative framework of the book to examine the vision and challenges of smart city initiatives. The book suggests directions and agendas for smart city research and outlines practical implications for government professionals, students, research scholars and policy makers. A lot of work is happening on smart cities as it is an upcoming area of research and development. At international level, and even in India, the concept of smart cities concept is a hot topic at universities, research centers, ministries, transport departments, civic bodies, environment, energy and disaster organizations, town planners and policy makers. This book provides ideas and information to government officials, investors, experts and research students.

Alpine Biodiversity in Europe

Springer Science & Business Media The United Nations Conference on the Environment and Development (UNCED), held in Rio de Janeiro in 1992, spawned a multitude of programmes aimed at assessing, managing and conserving the earth's biological diversity. One important issue addressed at the conference was the mountain environment. A specific feature of high mountains is the so-called alpine zone, i. e. the treeless regions at the uppermost reaches. Though covering only a very small proportion of the land surface, the alpine zone contains a relatively large number of plants, animals, fungi and microbes which are specifically adapted to cold environments. This zone contributes fundamentally to the planet's biodiversity and provides many resources for mountain dwelling as well as lowland people. However, rapid and largely man-made changes are affecting mountain ecosystems, such as soil erosion, losses of habitat and genetic diversity, and climate change, all of which have to be addressed. As stated in the European Community Biodiversity Strategy, "the global scale of biodiversity reduction or losses and the interdependence of different species and ecosystems across national borders demands concerted international action". Managing biodiversity in a rational and sustainable way needs basic knowledge on its qualitative and quantitative aspects at local, regional and global scales. This is particularly true for mountains, which are distributed throughout the world and are indeed hot spots of biodiversity in absolute terms as well as relative to the surrounding lowlands.

Science for All

The Popularization of Science in Early Twentieth-Century Britain

University of Chicago Press Recent scholarship has revealed that pioneering Victorian scientists endeavored through voluminous writing to raise public interest in science and its implications. But it has generally been assumed that once science became a profession around the turn of the century, this new generation of scientists turned its collective back on public outreach. *Science for All* debunks this apocryphal notion. Peter J. Bowler surveys the books, serial works, magazines, and newspapers published between 1900 and the outbreak of World War II to show that practicing scientists were very active in writing about their work for a general readership. *Science for All* argues that the social environment of early twentieth-century Britain created a substantial market for science books and magazines aimed at those who had benefited from better secondary education but could not access higher learning. Scientists found it easy and profitable to write for this audience. Bowler reveals, and because their work was seen as educational, they faced no hostility from their peers. But when admission to colleges and universities became more accessible in the 1960s, this market diminished and professional scientists began to lose interest in writing at the nonspecialist level. Eagerly anticipated by scholars of scientific engagement throughout the ages, *Science for All* sheds light on our own era and the continuing tension between science and public understanding.

Computational Logistics

11th International Conference, ICCL 2020, Enschede, The Netherlands, September 28–30, 2020, Proceedings

Springer Nature This book constitutes the proceedings of the 11th International Conference on Computational Logistics, ICCL 2020, held in Enschede, The Netherlands, in September 2020. The 49 papers included in this book were carefully reviewed and selected from 73 submissions. They were organized in topical sections named: maritime and port logistics; vehicle routing and scheduling; freight distribution and city logistics; network design and scheduling; and selected topics in logistics. Due to the Corona pandemic ICCL 2020 was held as a virtual event.
