### The Conquest of the Alps

*Open Road + Grove/Atlantic* **A "dramatic and masterful" account of early alpine explorers and the challenges they faced to scale the summits (Anthony Brandt, National Geographic Adventure).** In a riveting narrative of daredevils and eccentrics, Fergus Fleming gives us the breathtaking story of some of history's greatest explorers as they conquer the soaring peaks of the Alps. Fleming recounts the incredible exploits of the men whose centuries-old fear of the mountain range turned quickly to curiosity, then to obsession, as they explored Europe's frozen wilderness. In the late eighteenth century, French and Swiss scientists became interested in the Alps as a research destination, but in the 1850s the focus changed: the icy mountains now offered an all-out competition for British climbers who wanted to conquer ever higher and more impossible heights, and explorers fought each other on the peaks and in the press, entertaining a vast public smitten with their bravery, delighted by their personal animosities, and horrified by the disasters that befell them. "Fleming attacks his theme with verve, mining entertainment from eccentric Alpinists, sensational ascents and grisly accidents." —Food and Travel Magazine

## American Cars, 1946–1959

## Every Model, Year by Year

*McFarland* From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955-1957 Chevrolets, the "Forward Look" Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company's models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.
