TEACHING WRITING

Heinemann Educational Books "Writing allows each of us to live with that special wide-awakeness that comes from knowing that our lives and our ideas are worth writing about." -Lucy Calkins Teaching Writing is Lucy Calkins at her best-a distillation of the work that's placed Lucy and her colleagues at the forefront of the teaching of writing for over thirty years. This book promises to inspire teachers to teach with renewed passion and power and to invigorate the entire school day. This is a book for readers who want an introduction to the writing workshop, and for those who've lived and breathed this work for decades. Although Lucy addresses the familiar topics-the writing process, conferring, kinds of writing, and writing assessment- she helps us see those topics with new eyes. She clears away the debris to show us the teeny details, and she shows us the majesty and meaning, too, in these simple yet powerful teaching acts. Download a sample chapter for more information.

HANDBOOK OF RESEARCH ON TEACHER PRACTICES FOR DIVERSE WRITING INSTRUCTION

IGI Global The art and practice of writing is complex and multidimensional; students often apply unique writing styles. As such, educators must apply focused teaching methods to nurture these unique forms of writing. Educators must stay up to date with the practices for diverse writing instruction in order to best engage with a diverse classroom. However, resources related to writing typically do not focus on the depth and breadth of writing, and there is a need for a resource that offers a comprehensive look at diverse writing instruction research. The Handbook of Research on Teacher Practices for Diverse Writing Instruction provides a rich discussion of the issues, perspectives, and methods for writing instruction currently in use, with an added lens focusing on diversity and equity. It provides unique coverage on the topic of writing instruction for practical implementation within the classroom setting. Covering topics such as student motivation, curriculum development, and content area instruction, this major reference work is an essential resource for preservice teachers, faculty and administration of K-12 and higher education, academic libraries, government officials, school boards, researchers, and academicians.

STUDENT WORK AND TEACHER PRACTICES IN SCIENCE

A REPORT ON WHAT STUDENTS KNOW AND CAN DO

Department of Education Office of Educational In 1996, the National Assessment of Educational Progress (NAEP) assessed the knowledge and skills of students in the areas of earth science, life science, and physical science. It also collected information related to the background of students (grades 4, 8, and 12), their teachers (grades 4 and 8), and the schools they attended (grades 4, 8, and 12). This report is intended primarily for science teachers; hence, the results presented relate directly to student performance, classroom practices, and school climate. This report also discusses students' attitudes and beliefs about science. The report is divided into four parts. In the first part (chapter 1), an overview of the

assessment is provided. This includes information about the framework used in the development of the assessment, a description of how the assessment was administered to students, and an explanation of how to interpret NAEP results. In the second part (chapters 2, 3, and 4), examples of questions and student responses are presented. These chapters are divided by grade. The third part (chapters 5 and 6) contains information collected from students, teachers, and school administrators about classroom practices, student motivation, and parental involvement in learning. Finally, the fourth part contains appendices offering a fuller description of the procedures used for the NAEP 1996 science assessment (appendix A), scoring guides for questions discussed in chapters 2, 3, and 4 (appendix B), and standard errors for the statistics presented in the report (appendix C).
