### The Fringe-Imaging Skin Friction Technique Pc Application User's Manual

[BiblioGov](#) A personal computer application (CXWIN4G) has been written which greatly simplifies the task of extracting skin friction measurements from interferograms of oil flows on the surface of wind tunnel models. Images are first calibrated, using a novel approach to one-camera photogrammetry, to obtain accurate spatial information on surfaces with curvature. As part of the image calibration process, an auxiliary file containing the wind tunnel model geometry is used in conjunction with a two-dimensional direct linear transformation to relate the image plane to the physical (model) coordinates. The application then applies a nonlinear regression model to accurately determine the fringe spacing from interferometric intensity records as required by the Fringe Imaging Skin Friction (FISF) technique. The skin friction is found through application of a simple expression that makes use of lubrication theory to relate fringe spacing to skin friction.

### WMSNi User Manual

## Workload Managment System for Nurses Internet

*Bif Press The WMSNi User Manual is designed to instruct users of the Workload Management System for Nurses Internet (WMSNi) on how to operate the recently refreshed application. WMSNi is now a centralized web-based application with a contemporary user interface and real-time capabilities. Data can be inputted through easy-to-use features, adding and retrieving information is as simple as clicking a button, and information entered is immediately employable. Several new features, such as the scheduling components and multidimensional reporting/analysis capabilities make the refreshed application such that users can analyze trends and devise and implement staffing strategies in a time efficient manner. But with all of the modern capabilities now available, end users might find themselves at a loss on how to most effectively operate the system without instructions. Therefore, this manual has been composed for the end user with ease of use in mind. Each chapter covers a component, or tab, in the WMSNi application and then discusses how to use the different mechanisms within that tab through simplified step-by-step instructions.*

### ETEdit V.8.1 User's Manual

*This user's guide documents the capabilities and functions of the Expanded Time Phase Force Deployment Data (TPFDD) Editor (ETEdit) software application. Step-by-step procedures for using ETEdit are provided in Chapter 5. Although ETEdit is primarily an editing tool for use with various software applications, it can also be used as a stand-alone application or in tandem with another application. It provides force module data that allow you to display and modify movement requirements, as well as to display the requirement line numbers (RLNs) for both detail and parent hierarchy. The primary purpose of ETEdit is to make changes to TPFDDs. Because it has been designed as a separate application, you can apply the ETEdit capabilities for use with other models.*
