Yvain The Knight of the Lion Yale University Press The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance

with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past. **Killer Verse Poems of Murder and Mayhem Everyman's Library Killer Verse: Poems of Murder and Mayhem** is a spine-tingling collection of terrifically creepy poems about the deadly art of murder. The villains and victims who populate these pages range from Cain and Abel and Bluebeard and his wives to Lizzie Borden, Jack the Ripper, and Mafia hit men. The literary forms they inhabit are just as varied, from the colorful melodramas of old Scottish ballads to the hard-boiled poetry of twentieth-century noir, from lighthearted comic riffs to profound poetic musings on murder. Robert Browning, Thomas Hardy, W. H. Auden, Stevie Smith, Mark Doty, Frank Bidart, Toi Derricotte, Lynn Emanuel, and Cornelius Eady are only a few of the many poets, old and new, whose work is captured in this heart-stopping—and criminally entertaining—collection.

Cherokee Cooklore: Preparing Cherokee Foods (Reprint Edition) Coachwhip Publications First published in 1951, Cherokee Cooklore introduces us to traditional Cherokee cooking. It starts with a photographic essay as Aggie Lossiah demonstrates how she makes bean bread. This is followed by recipes gathered from the North Carolina Cherokee community (including yellowjacket soup, blood pudding, hominy corn drink, baked squirrel, and hickory nut soup). A description of Cherokee food customs follows. This is a fascinating booklet that provides valuable food lore for the adventuresome gourmet or the student of Native American history.

The Intra Muros Road System of Ancient Athens This is a comprehensive study of the road system of Athens within the circuit of the classical city wall, from the geometric through the Roman periods, based both on the excavated remains and the literary sources. In the first chapter, the scope of the study, the spatial and temporal limits, the ancient and modern sources, as well as the methodology in mapping the excavated remains of streets are defined. The archaeological evidence is the focus of the second chapter, where the technical characteristics of excavated streets are discussed, especially road surfaces, retaining walls, drains and the dimensions of streets. By looking closely at the finds from road surfaces we can learn a lot about the history of the city itself. Chapter three provides a reconstruction of the street layout of Athens through a synthesis of the excavated material and a re-evaluation of previous theories. Especially significant in this regard is the relationship of city streets to the city wall. The fourth chapter deals with issues of urbanism, including means of articulating space such as terracing, crossroads and the function of streets as boundaries. The development of the street pattern is examined in relation to changes in the city plan caused mostly by encroachment and the constant conflict between public and private space. Literary and epigraphical sources on urban regulations attest to the importance of a well maintained road system and they also provide evidence for the social life of streets. In general, the road system constitutes an integral part of the city fabric, interwoven with the inhabitants' daily life and state interest for urban management and public welfare. Streets as containers of social and religious activity carry significant symbolic value, which is further reflected in the few surviving names of streets. I have singled out three Athenian streets, the Peripatos, the Street of the Tripods and the Graberstrasse, for exploring issues of public display, collective memory and civic identity. The catalogue of excavated streets accompanies the main text and twenty-two plans illustrate the remains of streets in their topographical context.

Green Chemistry Research Trends Green chemistry, also called sustainable chemistry, is a chemical philosophy encouraging the design of products and processes that reduce or eliminate the use and generation of hazardous substances. Whereas environmental chemistry is the chemistry of the natural environment, and of pollutant chemicals in nature, green chemistry seeks to reduce and prevent pollution at its source. In 1990 the Pollution Prevention Act was passed in the United States. This act helped create a modus operandi for dealing with pollution in an original and innovative way. It aims to avoid problems before they happen. As a chemical philosophy, green chemistry derives from organic chemistry, inorganic chemistry, biochemistry, analytical chemistry, and even physical chemistry. However, the philosophy of green chemistry tends to focus on industrial applications. Click chemistry is often cited as a style of chemical synthesis that is consistent with the goals of green chemistry. The focus is on minimising the hazard and maximising the efficiency of any chemical choice. It is distinct from environmental chemistry which focuses on chemical phenomena in the environment. This book presents significant research advances in this new field. **Complements**
