PARENTOLOGY

EVERYTHING YOU WANTED TO KNOW ABOUT THE SCIENCE OF RAISING CHILDREN BUT WERE TOO EXHAUSTED TO ASK

[Simon and Schuster](#) An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

AFTER THE FALL

[Destiny Image Publishers](#) Abigail Walker and Jarvis Daniels are longtime sweethearts headed in opposite directions. Abby, an aspiring cellist, wants out of her humble Detroit surroundings and is willing to shed blood, sweat, and tears to make it happen. Jarvis, on the other hand, is perfectly content with life. For him there's plenty of time to become a "responsible adult." For now, he's got everything he could want: a roof over his head, a PlayStation, and the love of a good woman. When Abby's music career takes off and she moves to Chicago, Jarvis gets the boot---sort of. Abby still loves him, but his penchant for faded sweaters and meatball subs just doesn't fit into her new, sophisticated world of designer gowns and concert halls. They're in different leagues and Abby makes no qualms of reminding him of it whenever she deigns to visit him. When the couple is involved in a near-fatal car crash, they are broken, stripped, and broken again both stumbling through a journey of healing and self-discovery as they struggle to accept the merciful hand of the only One who can help them up after a fall.

MANAGING THE RISKS OF EXTREME EVENTS AND DISASTERS TO ADVANCE CLIMATE CHANGE ADAPTATION

SPECIAL REPORT OF THE INTERGOVERNMENTAL PANEL ON CLIMATE CHANGE

[Cambridge University Press](#) This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the

challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

REPUBLIC OF LATVIA

SELECTED ISSUES

[International Monetary Fund](#) This Selected Issues paper analyses the implications of global value chains (GVC) participation for Latvia's competitiveness and exposure to risks. Using a structural model, it assesses Latvia's competitiveness through different real effective exchange rate (REER) measures and examines the main factors behind differences in the measures. Based on this analysis, the paper suggests policy options to strengthen Latvia's competitiveness. The paper also estimates the impact of an appreciation of the GVC related REER measure on value added export growth and real GDP growth, and finds sizable effects, suggesting that a rapid labor market tightening could lead to erosion in competitiveness and reduction in growth. Finally, trade tension induced tariff hikes may have significant cost for Latvia, especially in terms of value added produced in the country. Trade tension induced tariff hikes are likely to have moderate costs for Latvia in terms of value added produced in the country. In this regard, policies aimed at enhancing product sophistication or quality and export market diversification could mitigate Latvia's exposure to trade shocks in GVCs.

LIVE SOUND BASICS

THE FUNDAMENTALS OF LIVE SOUND ENGINEERING FOR BEGINNERS

[CreateSpace](#) This book is about the fundamentals of live sound engineering and is intended to supplement the curriculum for the online classes at the Production Institute (www.productioninstitute.com/students). Nonetheless, it will be invaluable for beginning sound engineers and technicians anywhere who seek to expand their knowledge of sound reinforcement on their own. Written with beginners and novices in churches and convention centers in mind, this book starts by teaching you professional terminology and the processes of creating production related documents used to communicate with other sound engineers, vendors and venues. Subjects such as Signal Path and AC (alternating current) power safety and distribution are closely examined. These two subjects are closely related to the buzzing, humming and other noise related phenomena that often plague sound reinforcement systems. Chapters include an in-depth review of both analog and digital mixing consoles, their differences and similarities, and the gain structure fundamentals associated with the proper operation of either type of mixing console. Audio dynamic processors such as compressors, limiters and noise gates and their operation are explained in detail. Audio effects like delay and reverb are examined so that you can learn the basics of "sweetening" the mix to create larger and more emotive soundscapes and achieve studio-like outcomes in a live sound environment. Advanced mixing techniques, workflow, and the conventional wisdom used by professional audio engineers are explained so you don't have to spend years trying to figure out how these processes are achieved. Last but not least, a comprehensive review of acoustic feedback, and how to eliminate it from stage monitors and main speaker systems are detailed in a step by step process. This book will be especially helpful to volunteer audio techs in houses of worship, convention centers and venues of all types. It will bridge the gap between the on-the-job training that beginners receive and the knowledge and conventional wisdom that professional sound engineers employ in their daily routine.

HEALTH AND SAFETY CODE HANDBOOK

THE WOLF HUNTERS

Read Books Ltd This early work by James Oliver Curwood was originally published in 1908 and we are now republishing it with a brand new introductory biography. "The Wolf Hunters" sees an American boy who has become friends with a Native American boy, together they discover a mysterious cabin, and stumble upon a secret that has lain hidden for half a century. "The Wolf Hunters" is the prequel to "The Gold Hunters." James Oliver 'Jim' Curwood was an American action-adventure writer and conservationist. He was born on 12th June, 1878, in Owosso, Michigan, USA. In 1900, Curwood sold his first story while working for the Detroit News-Tribune, and after this, his career in writing was made. By 1909 he had saved enough money to travel to the Canadian northwest, a trip that provided the inspiration for his wilderness adventure stories. The success of his novels afforded him the opportunity to return to the Yukon and Alaska for several months each year - allowing Curwood to write more than thirty such books. Curwood's adventure writing followed in the tradition of Jack London. Like London, Curwood set many of his works in the wilds of the Great Northwest and often used animals as lead characters (Kazan, Barea; Son of Kazan, The Grizzly King and Nomads of the North). Many of Curwood's adventure novels also feature romance as primary or secondary plot consideration. This approach gave his work broad commercial appeal and helped drive his appearance on several best-seller lists in the early 1920s. His most successful work was his 1920 novel, The River's End. The book sold more than 100,000 copies and was the fourth best-selling title of the year in the United States, according to Publisher's Weekly. He contributed to various literary and popular magazines throughout his career, and his bibliography includes more than 200 such articles, short stories and serializations. Curwood was an avid hunter in his youth; however, as he grew older, he became an advocate of environmentalism and was appointed to the 'Michigan Conservation Commission' in 1926. The change in his attitude toward wildlife can be best expressed by a quote he gave in The Grizzly King: that 'The greatest thrill is not to kill but to let live.' Despite this change in attitude, Curwood did not have an ultimately fruitful relationship with nature. In 1927, while on a fishing trip in Florida, Curwood was bitten on the thigh by what was believed to have been a spider and he had an immediate allergic reaction. Health problems related to the bite escalated over the next few months as an infection set in. He died soon after in his nearby home on Williams Street, on 13th August 1927.

SALVADORAN IMAGINARIES

MEDIATED IDENTITIES AND CULTURES OF CONSUMPTION

[Rutgers University Press](#) Ravaged by civil war throughout the 1980s and 1990s, El Salvador has now emerged as a study in contradictions. It is a country where urban call centers and shopping malls exist alongside rural poverty. It is a land now at peace but still grappling with a legacy of violence. It is a place marked by deep social divides, yet offering a surprising abundance of inclusive spaces. Above all, it is a nation without borders, as widespread emigration during the war has led Salvadorans to develop a truly transnational sense of identity. In *Salvadoran Imaginaries*, Cecilia M. Rivas takes us on a journey through twenty-first century El Salvador and to the diverse range of sites where the nation's postwar identity is being forged. Combining field ethnography with media research, Rivas deftly toggles between the physical spaces where the new El Salvador is starting to emerge and the virtual spaces where Salvadoran identity is being imagined, including newspapers, literature, and digital media. This interdisciplinary approach enables her to explore the multitude of ways that Salvadorans negotiate between reality and representation, between local neighborhoods and transnational imagined communities, between present conditions and dreams for the future. Everyday life in El Salvador may seem like a simple matter, but Rivas digs deeper, across many different layers of society, revealing a wealth of complex feelings that the nation's citizens have about power, opportunity, safety, migration, and community. Filled with first-hand interviews and unique archival research, *Salvadoran Imaginaries* offers a fresh take on an emerging nation and its people.

IN THE KINGDOM OF ICE

THE GRAND AND TERRIBLE POLAR VOYAGE OF THE USS JEANNETTE

[Anchor Books](#) New York Times bestselling author Hampton Sides returns with a white-knuckle tale of polar exploration and survival in the Gilded Age. In the late nineteenth century, people were obsessed by one of the last unmapped areas of the globe: the North Pole. No one knew what existed beyond the fortress of ice rimming the northern oceans, although theories abounded. The foremost cartographer in the world, a German named August Petermann, believed that warm currents sustained a verdant island at the top of the world. National glory would fall to whoever could plant his flag upon its shores. James Gordon Bennett, the eccentric and stupendously wealthy owner of *The New York Herald*, had recently captured the world's attention by dispatching Stanley to Africa to find Dr. Livingstone. Now he was keen to re-create that sensation on an even more epic scale. So he funded an official U.S. naval expedition to reach the Pole, choosing as its captain a young officer named George Washington De Long, who had gained fame for a rescue operation off the coast of Greenland. De Long led a team of 32 men deep into uncharted Arctic waters, carrying the aspirations of a young country burning to become a world power. On July 8, 1879, the *USS Jeannette* set sail from San Francisco to cheering crowds in the grip of "Arctic Fever." The ship sailed into uncharted seas, but soon was trapped in pack ice. Two years into the harrowing voyage, the hull was breached. Amid the rush of water and the shrieks of breaking wooden boards, the crew abandoned the ship. Less than an hour later, the *Jeannette* sank to the bottom, and the men found themselves marooned a thousand miles north of Siberia with only the barest supplies. Thus began their long march across the endless ice—a frozen hell in the most lonesome corner of the world. Facing everything from snow blindness and polar bears to ferocious storms and frosty labyrinths, the expedition battled madness and starvation as they desperately strove for survival. With twists and turns worthy of a thriller, *In The Kingdom of Ice* is a spellbinding tale of heroism and determination in the most unforgiving territory on Earth.

THE LAST GENERATION

Bridget Thorsdottir is a seventeen-year-old girl living during the waning days of the Norse colony in Greenland in the

year 1501. At the brink of an age of discovery, her colony has been taken over by a new bishop who turned the people's farms into a more lucrative fishing village. The lone voice of opposition in this sea of change is Bridget's own father, Thor, whose stubborn adherence to his farm makes it harder and harder for him to pay the rising taxes owed to the bishop. When Thor refuses to give up his ways and leave the family home, Bridget realizes that it is up to her to make the dangerous journey to the New World in order to establish a new life for herself and her family.

BY CANOE AND DOG TRAIN

THE ADVENTURES OF SHARING THE GOSPEL WITH CANADIAN INDIANS (UPDATED EDITION. INCLUDES ORIGINAL ILLUSTRATIONS.)

[Aneko Press](#) To be a missionary to Canadian Indians in the late 1800s meant you had to be brave and relentless. It meant nearly freezing when sleeping outside in 50-below-zero weather. It meant canoeing upstream for hundreds of miles to reach remote Indian villages. It meant eating wild cat and other stranger things, or eating nothing for days at a time. But it also meant you were privileged to present the good news of the true Great Spirit to those who were often misunderstood and mistreated. The adventures in this book are rivaled only by the incredible conversions of those who saw the Creator in nature and then worshipped Him too. You will be challenged and inspired by the results of one man who went where the Lord led, with little regard for himself.

UPON THIS ROCK

BOOK 1 - FIRST CONTACT

Stack of Firewood Press, A An epic new science fiction series about faith, family, and alien invasion in the wilds of Alaska. When a shooting star plunges through the atmosphere and touches down in the Alaska wilderness, only two earthlings are present to witness the event. But they perceive two utterly different realities. What park ranger Jace Kuliak sees is a UFO and the arrival of a dangerous alien species from beyond the solar system. What Poppy Prophecy sees is the star called Wormwood, as recorded in Scripture, and the arrival of an archangel of the Apocalypse. The thing is -- they're both sorta right. Poppy Prophecy is the despotic patriarch of a large End-Times prepper family that is busily converting a depleted copper mine into its own private doomsday bunker. Their copper mine is a century-old relic from territorial days when East Coast robber barons ruled Alaska and plundered its mineral wealth. Today the abandoned mine sits in the middle of the largest, wildest, most majestic national park in the United States. But Poppy isn't impressed by mere earthly beauty, and he doesn't mind bulldozing federal land when it suits his purposes. Backcountry Ranger Jace Kuliak does mind, and he and fellow rangers confront the fundamentalist family in an armed standoff over the construction of an illegal airstrip. It doesn't help matters when Ranger Kuliak falls hopelessly in love with Poppy's second daughter, the lovely, innocent, and totally clueless Deuteronomy. An uneasy truce between the Prophecys and the park service is shattered when the falling star lands in their backyard and is claimed by both sides. What is it? Who is it? Better yet, of all the pit stops on all the planets in all the galaxies, why did the Visitor choose this particular rock to screw with?
