ROSint - Integration of a mobile robot in ROS architecture

[University of Coimbra](#) The goal of this work is to provide hardware abstraction and intuitive operation modes to decrease the development and implementation time of robotic platforms, thus allowing researchers to focus in their main scientific research motivations, e.g., search and rescue, multi-robot surveillance, swarm robotics, among others. To that end, this work presents the development of a compact mobile low-cost robotic platform, denoted as TraxBot, developed and assembled at the Institute of Systems and Robotics (ISR), which has been fully integrated in the well-known Robot Operating System (ROS) framework. Furthermore, several available mobile robots are compared and discussed in terms of their physical dimensions, hardware, sensors, communication abilities, motion, maximum run time and special features. This provides support to the reader on the decision-making acquisition process of a cost-effective robotic platform. Beyond the survey's results, the robotic system assembly, with a full description of its components as well as detailed information about the microcontroller programming, development and testing are also presented. The potentialities of the TraxBot are described, which combined with the herein presented ROS driver; provide several tools for data analysis and easiness of interaction between multiple robots, sensors and teleoperation devices. In order to validate the approach, several experimental tests were conducted using both real and mixed teams of real and virtual robots.

John Coltrane Plays "Coltrane Changes" (Songbook)

C Instruments

[Hal Leonard Corporation](#) (Artist Transcriptions). In the late 1950s, John Coltrane composed or arranged a series of tunes that used chord progressions based on a series of key center movements by thirds, rather than the usual fourths and fifths of standard progressions. This sound is so aurally identifiable and has received so much attention from jazz musicians that it has become known as "Coltrane's Changes." This book presents an exploration of his changes by studying 13 of his arrangements, each containing Coltrane's unique harmonic formula. It includes complete solo transcriptions with extensive performance notes for each. Titles include: Body and Soul * But Not for Me * Central Park West * Countdown * Fifth House * Giant Steps * Summertime * and more.

Wireless Networking for Moving Objects

Protocols, Architectures, Tools, Services and Applications

[Springer](#) Wireless networks of moving objects have drawn significant attention recently. These types of networks consist of a number of autonomous or semi-autonomous wireless nodes/objects moving with diverse patterns and speeds while communicating via several radio interfaces simultaneously. To overcome current shortcomings, a number of research challenges have to be addressed in this area, ranging from initial conceptualization and modelling, to protocols and architectures engineering, and development of suitable tools, applications and services, and to the elaboration of realistic use-case scenarios by taking into account corresponding societal and economic aspects. By applying a systematic approach the objective of this book is to assess the state of the art and consolidate the main research results achieved in this area. It was prepared as the Final Publication of the COST Action IC0906 "Wireless Networking for Moving Objects (WiNeMO)". The book contains 15 chapters and is a show-case of the main outcomes of the action in line with its scientific goals. The book will serve as a valuable reference for undergraduate students, post-graduate students, educators, faculty members, researchers, engineers, and research strategists working in this field.

Risk Society and Education in Post-Disaster Fukushima

Routledge In response to the explosion of the Fukushima Daiichi power plant in March 2011, this book examines how the concept of a risk society was handled in the various education programs implemented in post-disaster Fukushima. The explosion and subsequent radiation contamination that affected the biosphere of the Fukushima region and beyond, revealed that we live in a risk society. Despite this revelation, official discourses in Fukushima have been geared strictly toward the future, with the aim of restoring communities and resuming development projects. Based on the ethnographic data the author collected in Fukushima between 2013 and 2016, various contested emotions emerged in those education spaces as students and teachers remembered their romanticized and difficult past and dealt with the challenges presented by the risk society in their present lives. The emotionally-charged interactions between past and present also shaped their vision of their future community and of the actions they might take. The dialogues and actions that took place in these education spaces encourage readers to examine the meaning of development and question the basic assumptions and methods of education as society shifts to a risk society. A valuable resource for scholars and students in the fields of globalization and education, curriculum studies, sociology of education, and Japanese studies.

Electron Microprobe Analysis and Scanning Electron Microscopy in Geology

Cambridge University Press Originally published in 2005, this book covers the closely related techniques of electron microprobe analysis (EMPA) and scanning electron microscopy (SEM) specifically from a geological viewpoint. Topics discussed include: principles of electron-target interactions, electron beam instrumentation, X-ray spectrometry, general principles of SEM image formation, production of X-ray 'maps' showing elemental distributions, procedures for qualitative and quantitative X-ray analysis (both energy-dispersive and wavelength-dispersive), the use of both 'true' electron microprobes and SEMs fitted with X-ray spectrometers, and practical matters such as sample preparation and treatment of results. Throughout, there is an emphasis on geological aspects not mentioned in similar books aimed at a more general readership. The book avoids unnecessary technical detail in order to be easily accessible, and forms a comprehensive text on EMPA and SEM for geological postgraduate and postdoctoral researchers, as well as those working in industrial laboratories.

Silence within and beyond Pedagogical Settings

Springer Nature This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.

User-Centric Networking

Future Perspectives
