Commercial drones and their services are expected to become a multibillion-dollar industry in the next decade, according to a new report from market intelligence firm Tractica. The report says that in 2017, drone revenue should amount to $792 million — mostly from hardware sales. By 2025, Tractica predicts the market will rise to $12.6 billion, with two-thirds of the revenue coming from drone-based services rather than hardware. "A number of major industries are seeing strong value propositions in utilizing drones for commercial use," says Tractica research analyst Manoj Sahi. He named media, real estate and disaster relief as just a few of the industries that could use drone-enabled services. The report says that advances in technology, economies of scale, cloud-based applications and the drive to disrupt the market will contribute to commercial drone success in the coming years. SCARCITY

THE TRUE COST OF NOT HAVING ENOUGH

Why can we never seem to keep on top of our workload, social diary or chores? Why does poverty persist around the world? BROKEN TRUST

LESSONS FROM SUNBURST

FACEBOOK NATION

TOTAL INFORMATION AWARENESS

Springer Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency

and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness – a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.

CRC Press **Pesticide Profiles: Toxicity, Environmental Impact, and Fate is like three books in one-it is a profile containing specific information about 137 pesticides, a primer of environmental toxicology, and an extensive trade name index. Profiles of each pesticide contain regulatory information, toxicity assessments, environmental fate data, physical properties, and acceptable exposure limit values. What these values and data mean in terms of human toxicity is clearly interpreted as well. The book also describes the meaning of carcinogenicity and how it is assessed in non-technical terms the non-expert can understand. Readers with a technical background are provided with the data to make their own judgments. In addition to information about specific pesticides, there are sections on general classes of pesticides, such as organophosphates. This information allows readers to make inferences about any pesticide in a class, even if a profile is not provided. Pesticide Profiles: Toxicity, Environmental Impact, and Fate goes beyond the usual listings of toxicity values or environmental half-lives to offer a broad understanding to readers of various backgrounds and interests.**

Belly Fat Effect translates the new science into useable information that will give you a winning edge over your excess pounds and roller-coaster blood sugar levels.
