If these predictions come true, bone disease and fractures will have a tremendous negative impact on the future well-being of Americans. But as this report makes clear, they need not come true: by working together we can change the picture of aging in America. Osteoporosis, fractures, and other chronic diseases no longer should be thought of as an inevitable part of growing old. By focusing on prevention and lifestyle changes, including physical activity and nutrition, as well as early diagnosis and appropriate treatment, Americans can avoid much of the damaging impact of bone disease and other chronic diseases. This Surgeon General's Report brings together for the first time the scientific evidence related to the prevention, assessment, diagnosis, and treatment of bone disease. More importantly, it provides a framework for moving forward. The report will be another effective tool in educating Americans about how they can promote bone health throughout their lives. This first-ever Surgeon General's Report on bone health and osteoporosis provides much needed information on bone health, an often overlooked aspect of physical health. This report follows in the tradition of previous Surgeon Generals' reports by identifying the relevant scientific data, rigorously evaluating and summarizing the evidence, and determining conclusions. **Shadow and Bone** [Macmillan](#) Orphaned by the Border Wars, Alina Starkov is taken to become the proteg e of the mysterious Darkling, who trains her to join the magical elite in the belief that she is the Sun Summoner, who can destroy the monsters of the Fold. **Magic to the Bone** [Penguin](#) Devon Monk is casting a spell on the fantasy world... manages to encompass issues of class, education, ambition, racial prejudice, sexual desire and orientation, identity, mother-daughter relationships, parenthood and loss....With *Red at the Bone*, Jacqueline Woodson has indeed risen — even further into the ranks of great literature." – NPR "This poignant tale of choices and their aftermath, history and legacy, will resonate with mothers and daughters." –Tayari Jones, bestselling author of *AN AMERICAN MARRIAGE*, in *O Magazine* An unexpected teenage pregnancy pulls together two families from different social classes and explores their histories – reaching back to the Tulsa race massacre of 1921 -- and exposes the private hopes, disappointments, and longings that can bind or divide us from each other, from the *New York Times*-bestselling and National Book Award-winning author of *Another Brooklyn* and *Brown Girl Dreaming*. Moving forward and backward in time, Jacqueline Woodson's taut and powerful new novel uncovers the role that history and community have played in the experiences, decisions, and relationships of these families, and in the life of the new child. As the book opens in 2001, it is the evening of sixteen-year-old Melody's coming of age ceremony in her grandparents' Brooklyn brownstone. Watched lovingly by her relatives and friends, making her entrance to the music of Prince, she wears a special custom-made dress. But the event is not without poignancy. Sixteen years earlier, that very dress was measured and sewn for a different wearer: Melody's mother, for her own ceremony-- a celebration that ultimately never took place. Unfurling the history of Melody's family – reaching back to the Tulsa race massacre in 1921 -- to show how they all arrived at this moment, Woodson considers not just their ambitions and successes but also the costs, the tolls they've paid for striving to overcome expectations and escape the pull of history. As it explores sexual desire and identity, ambition, gentrification, education, class and status, and the life-altering facts of parenthood, *Red at the Bone* most strikingly looks at the ways in which young people must so often make long-lasting decisions about their lives--even before they have begun to figure out who they are and what they want to be.

**Written in Bone Hidden Stories in What We Leave Behind** Simon and Schuster Winner of the Crime Writers' Association ALCS Gold Dagger for Nonfiction— A tour through the human skeleton and the secrets our bones reveal, from the author of *All That Remains* In her memoir *All That Remains*, internationally renowned forensic anthropologist and human anatomist Dame Sue Black recounted her life lived eye to eye with the Grim Reaper. During the course of it, she offered a primer on the basics of identifying human remains, plenty of insights into the fascinating processes of death, and a sober, compassionate understanding of its inescapable presence in our existence, all leavened with her wicked sense of humor. In her new book, Sue Black builds on the first, taking us on a guided tour of the human skeleton and explaining how each person's life history is revealed in their bones, which she calls "the last sentinels of our mortal life to bear witness to the way we lived it." Her narrative follows the skeleton from the top of the skull to the small bones in the foot. Each step of the journey includes an explanation of the biology—how the bone is formed in a person's development, how it changes as we age, the secrets it may hold—and is illustrated with anecdotes from the author's career helping solve crimes and identifying human remains, whether recent or historical. *Written in Bone* is full of entertaining stories that read like scenes from a true-life CSI drama, infused with humor and no-nonsense practicality about the realities of corpses and death.
