MOTORIZED OBSESSIONS

LIFE, LIBERTY, AND THE SMALL-BORE ENGINE

JHU Press **From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.**

EVA

THE REAL KEY TO CREATING WEALTH

[John Wiley & Sons](#) Called "today's hottest financial idea and getting hotter" by fortune magazine, Economic Value Added (EVA) is the topic of conversation in financial circles around the world, from Germany and Japan to Singapore and South Africa. A revolutionary strategy for creating corporate and shareholder wealth that measures a company's real profitability, it has been adopted by such prominent corporations as Coca-Cola, Eli Lilly, and Siemens AG-with spectacular financial results. Yet, despite its increasing visibility, most executives still only have a vague notion of what EVA is and what it can do for their company. This groundbreaking book explains and clarifies all. Written by Al Ehrbar, a leading business journalist and senior vice president at EVA inventor Stern Stewart & Co., *EVA: The Real Key to Creating Wealth* provides a complete, accessible overview that examines how exactly EVA works, how it is measured, what it can do to structure incentives for employees, and why it is as potent as it is. At its most basic, Economic Value Added is a measure of corporate performance that differs from most others by charging profit for the cost of all the capital a company employs, including equity. To help translate principle into real-world practice, Ehrbar presents revealing case histories of EVA success stories, including those of Briggs & Stratton, the U.S. Postal Service, and Coca-Cola, which was catapulted from mediocrity to the number one wealth creator in the world with the addition of EVA. An in-depth look at a breakthrough idea whose impact is being felt from corporate boardrooms to Wall Street, this indispensable book is must reading for business leaders looking to fully grasp-and profit from-"the real key to creating wealth."

BRIDGES TO THE PAST

AN ADULT REFLECTS ON CHILDHOOD

[Trafford Publishing](#) *Bridges to the Past* is an anthology of short stories involving Appalachian Mountain humor and serious events that profoundly affected the life of a boy and influenced him prodigiously as an adult. Chapter I, "The Whimper Carter Tales" portrays, in a vivid manner, the art of storytelling. It brings the reader vis-a-vis with Winfrey "Whimper" Carter who epitomized Appalachian storytelling and imagination. Imagine a preacher re-learning profanity because a lawnmower will not start. Alternatively, a teenager thinking a snake bites him when he was actually shot. Humor is to life what blood is to the heart, and Chapter I contains a huge dose of humor. In addition, it's interspersed with historical facts which provide interesting reading. Chapter II, "A Lad's Heroes" is a poignant true story of a small boy who develops a her worship for two older cousins who served with Airborne units in World War II. This hero worship leads the lad into the United States Army and the Airborne. He, too, becomes a paratrooper as a memorial to his relatives, one who was killed in action at the Battle of the Bulge. It is a story that any combat veteran or those interested in military history will enjoy. Chapter III, "A Towheaded Boy and a Fifty-Dollar Rooster" is an equally emotional story that contains some levity. This chapter describes the love and devotion that can develop between a boy and his pets. It further denotes how experiences in childhood may affect a person for life. Chapter IV, "The Day of the Sermon" is a fictional account of a historical episode that shows the suffering of slaves in the ante-bellum South without being academic. It also deals with a devout preacher having the courage to challenge the slave holders in his congregation to determine a way to free those in bondage. Chapter IV invites people to examine the memories of slavery and its effect on this nation. Chapter V, "The Taking of a Deer" is a serious historical fiction account based on a true story of an underdog who was defended in court, gratis, by a wealthy and influential lawyer who once served as a Governor of Tennessee. It demonstrates that the laws of God and commonsense can prevail over laws and justice can be served to the underprivileged. Chapter VI, "The Uncle Cad Tales" depicts humans as they actually exist. This entire chapter consists of humorous tales spoken by a real character who has never received any attention other than through those who have known him. Overall, *Bridges* is a book that will be enjoyable to people of both sexes and all ages. Everyone, regardless of social status, will find something in *Bridges* that is fulfilling. It is down-to-earth and involves people who are not rich or famous, but who are very entertaining.

HANDBOOK OF LAWN MOWER REPAIR

HAND, HORSE, AND MOTOR

THE DEVELOPMENT OF THE LAWN MOWER INDUSTRY IN THE UNITED STATES

Office the Common Books Growing up on a twenty-ève acre farm in Amherst, Massachusetts, in the 1950s, author James B. Ricci had his eye on the Locke Power Lawn Mower; it was a familiar sight in the Northeast back then, with its dark- green body and yellow pinstripes. In 1992, Jim bought his own Locke and became interested in penning a booklet about the power lawn mowers made by The Locke Steel Chain Company of Bridgeport, Connecticut. His topic naturally expanded, exponentially. Many years and much research later, this book on the development of the lawn mower in the United States--from the mid-nineteenth century to the start of World War II--is the result of his efforts. It features nearly 200 individuals or corporations that manufactured lawn mowers in this country and offers a snapshot on the patents, products, and historical contributions each brought to the industry. It also offers interesting anecdotes, photographs, and ephemera from the author's extensive collection.

PAPERBACK

[Strategic Book Publishing & Rights Agency](#) Plain Tales from Antarctica are short stories based on real incidents that occurred during the author's two-year stay as a meteorologist at Halley 3, a British Research base in Antarctica located about 500 miles from the South Pole. In 1973 to 1975, Graham Chambers was part of an eighteen-man (no women) research group that lived in this fascinating yet unforgiving landscape. He writes: "It was a unique experience and one with sights, sounds and smells which are not forgotten after forty years. "Each story is based on real events and essentially is a true recollection, barring a strictly limited amount of literary licence and the limitations of human recollection. It is worth mentioning in this respect the ' witness' phenomenon, whereby 12 people can witness the very same event and produce at least half a dozen unique recollections of it."Thanks are due to the characters who inadvertently animated the stories. Some names have been changed and others not."
