Surprise, Kill, Vanish

The Secret History of CIA Paramilitary Armies, Operators, and Assassins

[Little, Brown](#) From Pulitzer Prize finalist Annie Jacobsen, the untold USA Today bestselling story of the CIA's secret paramilitary units. Surprise . . . your target. Kill . . . your enemy. Vanish . . . without a trace. When diplomacy fails, and war is unwise, the president calls on the CIA's Special Activities Division, a highly-classified branch of the CIA and the most effective, black operations force in the world. Originally known as the president's guerrilla warfare corps, SAD conducts risky and ruthless operations that have evolved over time to defend America from its enemies. Almost every American president since World War II has asked the CIA to conduct sabotage, subversion and, yes, assassination. With unprecedented access to forty-two men and women who proudly and secretly worked on CIA covert operations from the dawn of the Cold War to the present day, along with declassified documents and deep historical research, Pulitzer Prize finalist Annie Jacobsen unveils -- like never before -- a complex world of individuals working in treacherous environments populated with killers, connivers, and saboteurs. Despite Hollywood notions of off-book operations and external secret hires, covert action is actually one piece in a colossal foreign policy machine. Written with the pacing of a thriller, Surprise, Kill, Vanish brings to vivid life the sheer pandemonium and chaos, as well as the unforgettable human will to survive and the intellectual challenge of not giving up hope that define paramilitary and intelligence work. Jacobsen's exclusive interviews -- with members of the CIA's Senior Intelligence Service (equivalent to the Pentagon's generals), its counterterrorism chiefs, targeting officers, and Special Activities Division's Ground Branch operators who conduct today's close-quarters killing operations around the world -- reveal, for the first time, the enormity of this shocking, controversial, and morally complex terrain. Is the CIA's paramilitary army America's weaponized strength, or a liability to its principled standing in the world? Every operation reported in this book, however unsettling, is legal.

Engineering and Chemical Thermodynamics

John Wiley & Sons Chemical engineers face the challenge of learning the difficult concept and application of entropy and the 2nd Law of Thermodynamics. By following a visual approach and offering qualitative discussions of the role of molecular interactions, Koretsky helps them understand and visualize thermodynamics. Highlighted examples show how the material is applied in the real world. Expanded coverage includes biological content and examples, the Equation of State approach for both liquid and vapor phases in VLE, and the practical side of the 2nd Law. Engineers will then be able to use this resource as the basis for more advanced concepts.

Lemon-Aid New Cars and Trucks 2012

Dundurn Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

The Flint Water Crisis

Systemic Racism Through the Eyes of Flint

Createspace Independent Publishing Platform In January 2016, a series of states of emergency for the City of Flint were declared by the Mayor, the Governor and even the President. These declarations turned the attention of the state and nation to the Flint water crisis. As a result, the state, local and federal governments sprang into action. The National Guard was tasked to assist. FEMA1 sent representatives. Community organizations and non-profits from throughout the state, and even nationally, responded by volunteering, and sending bottled water. The Governor formed Mission Flint, which brought key members of the Administration together weekly, and the Legislature authorized a supplemental budget. Bottled water and water filters were distributed and residents were provided information in multiple languages. It was all hands on deck. From all accounts, the government was operating the way we would expect it to operate in response to an emergency. What then, was the problem? The timing. Preceding this flurry of "state of emergency" activity, Flint residents had been reporting heavily discolored and bad tasting water for well over a year. This report is triggered by the Flint Water Crisis, but in many ways is not just about Flint. This report seeks to outline a broader framework to explain why the crisis occurred and to propose a set of recommendations that minimizes and safeguards against similar crises in the future. Our report is not meant to assess blame, but to help ensure that such a crisis does not occur in the future and to address shortcomings that continue to persist over time.

California Mennonites

JHU Press "Books geographically focused on the midwestern and eastern states dominate the study of Mennonites in America. The intriguing history of Mennonites in the American West remains untold. In From Digging Gold to Saving Souls, Brian Froese introduces readers for the first time to the California Mennonite experience. Although a few Mennonites did dig for gold in the 1850s, the real story of Mennonites in California begins in the 1890s with westward migrations for fertile soil and healthy sunshine. By the mid-twentieth century, the Mennonite story in California had developed into an interesting tale of religious conservatives--traditional agrarians--finding their way in an increasingly urban and religiously pluralistic California. Some California Mennonites negotiated new identities by endorsing conservative evangelicalism; some found them in reclamations of sixteenth-century Anabaptists. Still other Mennonites found meaningful religious experience by engaging in social action and justice even when these actions appeared in "secular" forms. These emerging identities--Evangelical, Anabaptist, and secular--covered a broad spectrum, yet represented a selective retaining and discarding of Mennonite religious practices and expressions. From Digging Gold to Saving Souls touches on such topics as migration, pluralism, race, gender, pacifism, institutional construction, education, and labor conflict, all of which defined the experience of Mennonites of California. Brian Froese shows how this experience was a rich, complex, and deliberate move into modern society. In From Digging Gold to Saving Souls, he introduces readers to a dynamic people who did not simply become modern, but who chose to modernize on their own terms"--

The Yugo

The Rise and Fall of the Worst Car in History

Hill and Wang Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and

discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
