Ranging from black market babies to exploitative sex trade operations to the marketing of race and culture, Rethinking Commodification presents an interdisciplinary collection of writings, including legal theory, case law, and original essays to reexamine the traditional legal question: "To commodify or not to commodify?" In this pathbreaking course reader, Martha M. Ertman and Joan C. Williams present the legal cases and theories that laid the groundwork for traditional critiques of commodification, which tend to view the process as dehumanizing because it reduces all human interactions to economic transactions. This "canonical" section is followed by a selection of original essays that present alternative views of commodification based on the concept that commodification can have diverse meanings in a variety of social contexts. When viewed in this way, the commodification debate moves beyond whether or not commodification is good or bad, and is assessed instead on the quality of the social relationships and wider context that is involved in the transaction. Rethinking Commodification contains an excellent array of contemporary issues, including intellectual property, reparations for slavery, organ transplants, and sex work; and an equally stellar array of contributors, including Richard Posner, Margaret Jane Radin, Regina Austin, and many others. The Cadillac Story The Postwar Years Stanford University Press The Cadillac story is more than the story of a car company. It is, in many ways, the story of the American automobile industry itself—which, as much as any industry, drove America's growth in the twentieth century and defined who we are as a people. For generations of Americans, Cadillac epitomized expansive prosperity. This illustrated history of Cadillac presents all the triumphs and failures of the marque's last sixty years; from the good times, through the disastrous 1980s, and up to the current reconstitution of the brand.
