Save More Tomorrow Practical Behavioral Finance Solutions to Improve 401(k) Plans Penguin One of the world's top experts in behavioral finance offers innovative strategies for improving 401(k) plans. Half of Americans do not have access to a retirement saving plan at their workplace. Of those who do about a third fail to join. And those who do join tend to save too little and often make unwise investment decisions. In short, the 401(k) world is in crisis, and workers need help. Save More Tomorrow provides that help by focusing on the behavioral challenges that led to this crisis inertia, limited self-control, loss aversion, and myopia—and transforms them into behavioral solutions. These solutions, or tools, are based on cutting edge behavioral finance research and they can dramatically improve outcomes by, for example, helping employees: -Save, even if they aren't ready to do so now, by using future enrollment. -Save more by showing them images of their future selves. -Save smarter by reshuffling the order of funds on the investment menu. Save More Tomorrow is the first comprehensive application of behavioral finance to improve retirement outcomes. It also makes it easy for plan sponsors and their advisers to apply these behavioral tools using its innovative Behavioral Audit process. **Business and Non-profit Organizations Facing Increased Competitions and Growing Customers' Demands Volume 17** Institute of Economics, Polish Academy of Sciences We are pleased to introduce our 17th and latest volume from our regular conference: Business and Non-profit Organizations Facing Increased Competitions and Growing Customers' Demands, which contains articles highlighting the problems of contemporary for-profit and non-profit organizations. The added value is the inclusion of multifaceted aspects of an organization's functioning, including the sectoral and industrial view. The diversity of the approach to the problems of organization, management, business and economy becomes a valuable interdisciplinary view of the economic reality that surrounds us. The monograph is divided into four sections. In the first section: Business and non-profit organizations as the objects of research, articles are exposing the area of strategic management, including a museum as a research object, surgical workflow, the performance of cultural organizations, and organizational forms of housing resource management. In addition, this section covers a process-oriented view of management, including process maturity of the organization and process approach to the analysis of creative capital; and mixed project-management methodology. In a separate thread, there are articles related to public university mergers based on an example of two academic case studies; the analysis of scientific excellence as a factor influencing academic involvement; and the nature of competition for non-profit and for-profit organizations. The second section, entitled Modern tools for business and non-profit organization management, opens with an article on design thinking and the TransistorsHead tool used to analyze teams through organizational terms. Other tools used in eye tracking, such as enova365 and Soneta, are presented in an article on the optimization of an IT system. In the context of profiling scientific research, not only in the area of academic entrepreneurship but also in the search for research gaps, bibliometrics is undoubtedly a useful tool discussed in a further article. In another article, an attractive tool for competence analysis is the business model and the construction of the competence assessment method, which could prove to be helpful in assessing the effectiveness of professional careers. Other articles in this section feature the concept of innovation and knowledge management; medical data management based on a precise legal basis; external financing and its impact on the flexibility of enterprises; and a systemic, process and resource approach to port modularity. In the next section: Business and non-profit organizations in a market economy, the primary thematic topic is corporate social responsibility, client capital creation, and social entrepreneurship. We note the greater emphasis on the social aspects of the organization's functioning and on the social economy. The human thread and the so-called ecosystem in business are becoming more and more desirable, and the perspective of business is changing: from a profit-oriented one towards a more societal one. In the last section, entitled Business and non-profit organizations - sectoral and industrial aspects, there are articles discussing the issues of organization in macroeconomic terms. This section opens with an article presenting the structural characteristics of industrial clusters and research streams in this area. Subsequently, we have articles that present: the municipality, from the point of view of the configuration of the network of relations between stakeholders, and their involvement in the creation of smart specialization strategies; the determinants of employment change in the Polish services sector; consumer awareness of the credit market; the transparency of public finances; local food and regional products; consumer behaviour in Ukraine; as well as, trade credit, profitability and leverage in Polish companies. Every year, this monograph is built on articles that present an up-to-date view of the business and geo-economic reality that surrounds us, whose organizations form the backbone of the economy and its sectors. The dynamics of changes are so significant that such studies bring readers closer to current trends and draw the interest of researchers. **Pension and Annuity Income The Collection Process (income Tax Accounts).** **Green Fashion Retail** Springer This book focuses on sustainability in fashion retail, which is fast becoming the pivot point of future fashion retail strategies. Chapters in the book provide theoretical and practical insight on how going green may positively influence the strategy of fashion retailers and marketers, who have to react to the changing society and customer needs. Structured in four main parts, and based on distinct research questions, readers will be able to dig deep into the individual levers for possible adaptations. It thus provides a solid understanding on how to integrate green aspects into any fashion retailers business model. **50 American Heroes Every Kid Should Meet** Millbrook Press (Tm) Profiles fifty Americans and the accomplishments they made in their lifetime that made them heroes, enhanced with historical documents, photos, web site addresses, and more. --Publisher. **High Income Tax Returns Organizations in the Face of Growing Competition in the Market** Institute of Economics, Polish Academy of Sciences The essence of the functioning of any organization, whether commercial or non-profit, is to provide value to groups of recipients whose expectations undoubtedly change over time. Various competition mechanisms in the market apply to both business-oriented organizations and organizations operating in the sphere of public utilities. This monograph includes examples of the problems facing contemporary organizations, and at the same time provides evidence, confirmed by research results, that indicates the direction of current changes. The analysis of changes taking place in organizations was carried out in many dimensions. The content layout adopted in the monograph presents four research perspectives, where the subject of the research is the organization; the modern tools used in organization management, the impact of the market economy on organizations, and sectoral or industry aspects of the organization's functioning. In the first chapter, four studies related to commercial and non-commercial organizations have been collated. Researchers of academic organizations who in order to meet the expectations of students increase their activity in the field of entrepreneurship and their support for the most talented students. Both examples show the need to conduct research, develop knowledge about own activities, and focus on the needs of the environment. Entrepreneurial universities are open to the implementation of joint ventures with entities in their environment, which affect the development of the university, its students, as well as the entities. Entrepreneurship, which is based on the ability to take advantage of market opportunities, also creates opportunities for developing the ability to flexibly shape and adapt programs, methods and operating principles to the growing expectations of their environment. The ability to develop your potential as well as the potential of your students plays a crucial role. In the pursuit of excellence, a strong focus should be placed on talented students and the development of all possible forms of support that could determine an output of graduates with particularly high development potential. In the research presented in this monograph, the authors compare the activity of universities in the USA, the Netherlands, and Poland in the area of talent development. The comparative analysis becomes a valuable source of indicating imperfections, but also examples of potential forms of positive activity in this area. Equally important in this part of the monograph is the research on the learning organization. Through a bibliometric analysis, the author identified the fields of research on the learning organization. In addition to research areas related to various dimensions, primarily human, cultural and managerial, the types of organizations in which such research is most often conducted have been indicated. They also include the organizations of the two sectors presented: education and healthcare. The same part of the monograph also presents the results of research in the hotel sector, where the main research problem was the creation of customer value, taking into account the conditions stimulating the dynamics of the business models of hotel enterprises. Referring to business models was considered important because of the significance of decision-making patterns that help to build a competitive advantage and achieve market success by creating value for customers. The concept of creating value for customers is currently treated in cross-sectoral or industry categories and is a universal approach to managing organizations. The second chapter of the monograph presents research on the modern tools used in organization management. Concepts such as work-life balance, shaping the innovation process within the framework of decisions taken in the process, marketing communication, or the use of gamification in research and development, are examples of a wide range of relationships between today's organization and its surroundings. Finding employees, and retaining them, is also a growing challenge in developing countries, where labor supply is steadily decreasing. The expectations of employees are increasing, especially in relation to respecting the personal, non-professional side of life. Thus, it should be recognized that research on work-life balance is a developing space for organization and management researchers. Modeling the innovation process in an organization is another research trend that is important today, especially in terms of developing competitiveness. Decision-making is one of the key components of the innovation process. This aspect, in qualitative terms, was presented in the next study in the second part of the monograph. Similarly, marketing communication is invariably an important area of research in organizations, which has evolved due to rapidly developing information technologies and, at the same time, the changing preferences of users of these technologies. The last study in this second part of the monograph relates to innovation and the use of computer games. The tools of gamification are used to shape the attitudes of individual energy consumers. The observations presented show that it is worth making attempts to use unconventional methods and tools, in this case, to develop customer knowledge and strengthen the behaviors desired in the energy market. The third chapter of the monograph is devoted to the financial aspects of the functioning of commercial and non-profit organizations in a market economy. Increasing the efficiency of public entities, specifically conditioned in economic policies and dependent on political decisions, has been the subject of numerous studies. The research study presented in the monograph refers to the relationship between financial strategies and profit management in public industrial companies listed on the Warsaw Stock Exchange. It is worth noting that no research in this field has been conducted to date in the context of the Polish capital market. The next study refers to the French market. Its purpose was to evaluate and test long-term memory in the French stock exchanges. Research results contribute significantly to explaining the lack of consensus regarding long memory in stock returns. The research covers a significant, 25-year period of operation of the Euronext platform during which 6634 observations were provided. The conclusions of the study may be particularly important for regulators and risk managers. Another study presents the results of bankruptcy risk tests for Polish and Czech logistics companies using a comprehensive classification approach. As a result of the research, a tool for risk assessment and forecasting was developed, enabling the early prediction of bankruptcy of enterprises. At the end of the third chapter of the monograph, the results of health expenditure analysis based on information

provided by the Health Account System are presented. Particular attention has been focused on the programming sources of financing healthcare in new European Union countries. Socio-technical and environmental aspects of the organization are the subject of interest of researchers presenting the results of their research in the fourth chapter of the monograph. The problems of economic migration and working conditions have been the subject of interest for many years in the strongly developing trend of labor market research. The research results contained in the study relate primarily to the issues of occupational safety of Ukrainians employed in Poland. These issues are gaining importance, especially when the number of people migrating from Ukraine to Poland in search of work has been growing for several years. In the face of such a large scale of Ukrainian immigrants employed in Polish enterprises, there is still a lack of regulations protecting or securing the interests of employees and employers. The next research presentation highlights the problems of the "circular economy," which, according to the author, is developing too slowly in Poland. The research is valuable for systematizing the idea of a circular economy based on the theoretical and practical aspects of this phenomenon. The results of the analysis are also of practical importance for the process of modeling and implementing this idea in Poland. Further, the innovation paradigm of economic health and the prosperity of society is the subject of the research carried out, based on a review of the health economy considering innovation and its impact on population growth and prosperity in the world. The research particularly highlights the consequences of socio-demographic, environmental and business changes in the field of consumer goods. The socio-technical, as well as the environmental, aspects of the organization are also included in the last study presented. The purpose of this study was to identify the attitudes of IT employees in the Polish ITC sector towards remote work. Since the effective and efficient collaboration of distributed employees performing remote work has become even more necessary for the success of projects, numerous research works are being conducted focusing on the consequences of remote work. The presented research results are an important contribution to the discussion of researchers and management practitioners. By publishing this monograph, which covers a wide spectrum of research problems in contemporary commercial and non-profit organizations, the editors and authors presenting the results of their research express a hope that they are contributing to the widespread dissemination and enrichment of knowledge and, consequently, socio-economic development.

The Daodejing of Laozi Hackett Publishing Philip J. Ivanhoe's richly annotated translation of this classic work is accompanied by his engaging interpretation and commentary, a lucid introduction, and a Language Appendix that compares eight classic translations of the opening passage of the work and invites the reader to consider the principles upon which each was rendered. **Volcanism, Impacts, and Mass Extinctions: Causes and Effects** Geological Society of America "Comprises articles stemming from the March 2013 international conference at London's Natural History Museum. Researchers across geological, geophysical, and biological disciplines present key results from research concerning the causes of mass extinction events"-- **Data Science at the Command Line** "O'Reilly Media, Inc." This thoroughly revised guide demonstrates how the flexibility of the command line can help you become a more efficient and productive data scientist. You'll learn how to combine small yet powerful command-line tools to quickly obtain, scrub, explore, and model your data. To get you started, author Jeroen Janssens provides a Docker image packed with over 80 tools--useful whether you work with Windows, macOS, or Linux. You'll quickly discover why the command line is an agile, scalable, and extensible technology. Even if you're comfortable processing data with Python or R, you'll learn how to greatly improve your data science workflow by leveraging the command line's power. This book is ideal for data scientists, analysts, and engineers; software and machine learning engineers; and system administrators. Obtain data from websites, APIs, databases, and spreadsheets Perform scrub operations on text, CSV, HTML, XML, and JSON files Explore data, compute descriptive statistics, and create visualizations Manage your data science workflow Create reusable command-line tools from one-liners and existing Python or R code Parallelize and distribute data-intensive pipelines Model data with dimensionality reduction, clustering, regression, and classification algorithms **Social Entrepreneurial Intention: An Empirical Study in Vietnam** **AgExporter beyond aid: new sources and innovative mechanisms for financing development in sub-saharan africa** World Bank Publications Abstract: Given Sub-Saharan Africa's enormous resource needs for growth, poverty reduction, and other Millennium Development Goals, the development community has little choice but to continue to explore new sources of financing, innovative private-to-private sector solutions, and public-private partnerships to mobilize additional international financing. The paper suggests several new instruments for improving access to capital. An analysis of country creditworthiness suggests that many countries in the region may be more creditworthy than previously believed. Establishing sovereign rating benchmarks and credit enhancement through guarantee instruments provided by multilateral aid agencies would facilitate market access. Creative financial structuring, such as the International Financing Facility for Immunization, would help front-load aid commitments, although these may not result in additional financing in the long run. Preliminary estimates suggest that Sub-Saharan African countries can potentially raise USD 1-3 billion by reducing the cost of international migrant remittances, USD 5-10 billion by issuing diaspora bonds, and USD 17 billion by securitizing future remittances and other future receivables. African countries that have recently received debt relief however need to be cautious when resorting to market-based borrowing. **Social Innovation Solutions for a Sustainable Future** Springer Science & Business Media Social Innovation is becoming an increasingly important topic in our global society. Those organizations which are able to develop business solutions to the most urgent social and ecological challenges will be the leading companies of tomorrow. Social Innovation not only creates value for society but will be a key driver for business success. Although the concept of Social Innovation is discussed globally the meaning and its impact on the development of new business strategies is still heavily on debate. This publication has the goal to give a comprehensive overview of different concepts in the very innovative field of Social Innovation, from a managerial as well as from a theoretical and social perspective. Over 30 leading thinkers in the field of Innovation, Strategic Management and Organizational Development give a well structured inside on the latest developments and progress in the field of Social Innovation. Thereby the authors not only develop a comprehensive and unique analysis on the state-of-the art of social innovation but also give practical advice and information to business leaders on how to apply the latest management thinking on Social Innovation to daily business decisions. This publication has the intention to become a milestone in the further development of the concept of Social Innovation as well as to further stimulate new business strategies necessary to overcome world most pressing social and ecological challenges. **Anthropology and Climate Change From Actions to Transformations** Routledge The first edition of Anthropology and Climate Change (2009) pioneered the study of climate change through the lens of anthropology, covering the relation between human cultures and the environment from prehistoric times to the present. This second, heavily revised edition brings the material on this rapidly changing field completely up to date, with major scholars from around the world mapping out trajectories of research and issuing specific calls for action. The new edition introduces new "foundational" chapters—laying out what anthropologists know about climate change today, new theoretical and practical perspectives, insights gleaned from sociology, and international efforts to study and curb climate change—making the volume a perfect introductory textbook; presents a series of case studies—both new case studies and old ones updated and viewed with fresh eyes—with the specific purpose of assessing climate trends; provides a close look at how climate change is affecting livelihoods, especially in the context of economic globalization and the migration of youth from rural to urban areas; expands coverage to England, the Amazon, the Marshall Islands, Tanzania, and Ethiopia; re-examines the conclusions and recommendations of the first volume, refining our knowledge of what we do and do not know about climate change and what we can do to adapt. **ATF P 3317.2 -- Safety and Security Information for Federal Firearms Licensees** DIANE Publishing **Future Matters Action, Knowledge, Ethics** BRILL Future Matters concerns contemporary approaches to the future – how the future is known, created and minded. In a social world whose pace continues to accelerate the future becomes an increasingly difficult terrain. While the focus of social life is narrowing down to the present, the futures we create on a daily basis cast ever longer shadows. Future Matters addresses this paradox and its deep ethical implications. **Engaged Anthropology Politics beyond the Text** Univ of California Press Does anthropology have more to offer than just its texts? In this timely and remarkable book, Stuart Kirsch shows how anthropology can—and why it should—become more engaged with the problems of the world. Engaged Anthropology draws on the author's experiences working with indigenous peoples fighting for their environment, land rights, and political sovereignty. Including both short interventions and collaborations spanning decades, it recounts interactions with lawyers and courts, nongovernmental organizations, scientific experts, and transnational corporations. This unflinchingly honest account addresses the unexamined "backstage" of engaged anthropology. Coming at a time when some question the viability of the discipline, the message of this powerful and original work is especially welcome, as it not only promotes a new way of doing anthropology, but also compellingly articulates a new rationale for why anthropology matters. **The Magnetotelluric Method Theory and Practice** Cambridge University Press The magnetotelluric method is a technique for imaging the electrical conductivity and structure of the Earth, from the near surface down to the 410 km transition zone and beyond. This book forms the first comprehensive overview of magnetotellurics from the salient physics and its mathematical representation, to practical implementation in the field, data processing, modeling and geological interpretation. Electromagnetic induction in 1-D, 2-D and 3-D media is explored, building from first principles, and with thorough coverage of the practical techniques of time series processing, distortion, numerical modeling and inversion. The fundamental principles are illustrated with a series of case histories describing geological applications. Technical issues, instrumentation and field practices are described for both land and marine surveys. This book provides a rigorous introduction to magnetotellurics for academic researchers and advanced students and will be of interest to industrial practitioners and geoscientists wanting to incorporate rock conductivity into their interpretations. **Golf Business and Management A Global Introduction** Routledge Golf is big business around the world. With high profile series such as the PGA, LPGA and European tours to the re-introduction of golf to the Olympics at Rio 2016, golf occupies a prominent place in the global sport community. This is the first book to introduce the fundamentals of golf business and management from a truly international perspective, covering key topics such as media, club management, sponsorship and retail, at elite and non-elite levels. With sections exploring the development of golf on every continent, including North America, South America, Europe, the Middle East, Africa and Asia, this book presents the latest thinking on current issues in golf, ranging from sustainability and innovation to global governance. Each chapter incorporates helpful features for students including learning objectives, discussion questions, guides to further reading, recommended websites and insights from industry voices. This book is essential reading for students of any golf-related degree course or professional accreditation programme, and will also be of interest to those studying or working in sport business, sport management and sport tourism. Underpinned by up-to-date literature, golf researchers will also find the book a useful starting point. **The Oxford Handbook of Intergroup Conflict** Oxford University Press With insightful chapters from key social psychologists and peace scholars, this handbook offers an integrative and extensive overview of critical questions, issues, processes, and strategies relevant to understanding and addressing intergroup conflict. **The Mexican Mafia** Encounter Books It has been called the most dangerous gang in American history. In Los Angeles alone it is responsible for over 100 homicides per year. Although it has fewer than 300 members, it controls a 40,000-strong street army that is eager to advance its agenda. It waves the flag of the Black Hand and its business is murder. Although known on the streets for over fifty years, the Mexican Mafia has flown under the radar of public awareness and has flourished beneath a deep cover of secrecy. Members are forbidden even to acknowledge its existence. For the first time in its history, the Mexican Mafia is now getting the attention it has been striving to avoid. In this briskly written and thoroughly researched book, Tony Rafael looks at the birth and the blood-soaked growth of this criminal enterprise through the eyes of the victims, the dropouts, the cops and DAs on the front lines of the war against the Mexican Mafia. The first book ever published on the subject, Southern Soldiers is a pioneering work that unveils the operations of this California prison gang and describes how it grew from a small clique of inmates into a transnational criminal organization. As the first prison gang ever to project its power beyond prison walls, the Mexican Mafia controls virtually every Hispanic neighborhood in Southern California and is rapidly expanding its influence into the entire Southwest, across the East Coast, and even into Canada. Riding a wave of unchecked immigration and seemingly beyond the reach of law enforcement, the Mexican Mafia is poised to become the Cosa Nostra of twenty-first-century America. **Income Averaging Employees and Independent Contractors** Aspen Publishers **Law at Work Studies in Legal Ethnomethods** Oxford University Press, USA The studies in this volume use ethnographic, ethnomethodological, and sociolinguistic research to demonstrate how legal agents conduct their practices and exercise their authority in relation to non-expert participants and broader publics. Instead of treating law as a body of doctrines, or law and society as a relationship between legal institutions and an external society, the studies in this volume closely examine law at work: specific legal practices and social interactions produced in national and international settings. These settings include courtrooms and other tribunals, consultations between lawyers and clients, and media forums in which government officials address international law. Because law is a public institution, and legal actions are publicly accountable, technical law must interface with non-expert members of the public. The embodied actions and interactions that comprise the interface between professional and lay participants in legal settings therefore must do justice to legal traditions and statutory obligations while also contending with mundane interactional routines, ordinary reasoning, and popular expectations. Specific chapters examine topics such as family disputes in a system of Sharia Law; rhetorical contestations about possible violations of international law during a violent conflict in the Middle-East; the transformation of a courtroom hearing brought about by the virtual presence of remote witnesses relayed through a video link; the practices through which written records are used to mediate and leverage a witness's testimony; and the discursive and interactional practices through which authorized

parties use legal categories to problems with individual conduct. Each chapter shows that it makes a profound difference to the way we understand the law when we examine its meaning and application in practice. **Highlights of ... Tax Changes Advances in Transportation Studies A revolution in family policy Where we should go from here** Policy Press This book offers a radical rethink of family policy in the UK. Clem Henricson, the family policy expert, analyses in detail the major shift in the role of the state viz a viz personal relationships in recent years, with its aspirations to reduce child poverty, increase social mobility and deliver social cohesion. Brought in by New Labour and carried forward, albeit in diluted form, by the Coalition, Henricson asks whether this philosophy of social betterment through manipulating the parent-child relationship is appropriate for family policy. She challenges the thinking behind the expectation that you can change a highly unequal society through the family route. Instead the argument is made for a family policy with its own *raison d'etre*, free of other government agendas. A premium is set on the need to manage the multiple core tensions in families of affection, empathy and supportiveness on the one hand and aggression, deception and self interest on the other. A set of coherent support and control policies for family relations are developed which endorse this awareness and embrace a fundamental shift in perspective for future progressive governments. **Annales Bogorienses Catalyzing Development A New Vision for Aid** Brookings Institution Press "Provides analysis of how the field of international aid is changing with new approaches necessary because of new actors providing assistance, including middle-income countries, private philanthropists, and the private sector, and new challenges, including climate change and the large number of fragile states"--Provided by publisher. **The Principles of Morals and Legislation** Discusses morals' functions and natures that affect the legislation in general. Bases the discussions on pain and pleasure as basic principle of law embodiment. Mentions of the circumstance influencing sensibility, general human actions, intentionality, conciousness, motives, human dispositions, consequencess of mischievous act, case of punishment, and offences' division. **When Corporations Rule the World** Berrett-Koehler Publishers Addresses the issue of modern corporate power, exposing the harmful effects gobalization is having not only on economics, but also on politics, society and the environment **Tax Guide for Seniors - Publication 554 (For Use in Preparing 2020 Returns)** overview of selected topics that are of interest to older tax-payers. The publication will help you determine if you need to file a return and, if so, what items to report on your return. Each topic is discussed only briefly, so you will find references to other free IRS publications that provide more detail on these topics if you need it. Table I has a list of questions you may have about filing your federal tax return. To the right of each question is the location of the answer in this publication. Also, at the back of this publication there is an index to help you search for the topic you need. While most federal income tax laws apply equally to all taxpayers, regardless of age, there are some provisions that give special treatment to older taxpayers. **Austerity The Great Failure** Yale University Press The author examines the history of austerity efforts in order to access the possibility of success today. **Paths to a Green World The Political Economy of the Global Environment** Academic Foundation **Milestones** FurPlanet Productions **Acta Systemica Caste, COVID-19, and Inequalities of Care Lessons from South Asia** Springer This book explores how social discrimination in South Asia contributes to health disparities and impedes well-being. Specifically, it addresses how marginalization shapes health outcomes, both under normal circumstances and specifically during the COVID-19 pandemic. Coming from diverse backgrounds and representing different academic disciplines, the authors have contributed a range of chapters drawing from quantitative and ethnographic material across South Asia. Chapters address reservation politics, tribal lifeways, Dalit exclusions from governmental institutions, Muslim ghettoization, gendered domestic violence, social determinants of health among migrant workers, and the pandemic fallout across South Asian society, among other subjects. Scholars draw on decades of experience and firsthand ethnographic fieldwork among affected communities. The chapters provide an innovative analysis, often in real time, of the human toll of casteism, classism, patriarchy, and religious intolerance—many set against the spectre of COVID-19. Many authors not only present social critiques but also offer specific policy recommendations. The book is of great interest to social scientists, public health practitioners, and policy advocates interested in addressing systemic inequalities and ensuring that future pandemics are not disproportionately felt by the most vulnerable. **Development Cooperation Challenges of the New Aid Architecture** Palgrave Pivot The aims of and motives for development cooperation have changed significantly in recent times. Besides pursuing short- and longer-term objectives in their own economic, foreign policy and other interests, donors usually have a recognisable and genuine interest in assisting countries in their processes of development.
