SURVEYS IN MODERN MATHEMATICS

Cambridge University Press *This collection of articles from the Independent University of Moscow is derived from the Globus seminars held there. They are given by world authorities, from Russia and elsewhere, in various areas of mathematics*

and are designed to introduce graduate students to some of the most dynamic areas of mathematical research. The seminars aim to be informal, wide-ranging and forward-looking, getting across the ideas and concepts rather than formal proofs, and this carries over to the articles here. Topics covered range from computational complexity, algebraic geometry, dynamics, through to number theory and quantum groups. The volume as a whole is a fascinating and exciting overview of contemporary mathematics.

MANAGEMENT, A BOOK OF READINGS

McGraw-Hill Companies *The basic of management; Planning; Organizing; Staffing; Leading; Controlling.*

THE FIRST 20 HOURS

HOW TO LEARN ANYTHING . . . FAST!

Penguin *Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in*

record time . . . and have more fun along the way.

BOREDOM

A LIVELY HISTORY

Yale University Press *In the first book to argue for the benefits of boredom, Peter Toohey dispels the myth that it's simply a childish emotion or an existential malaise like Jean-Paul Sartre's nausea. He shows how boredom is, in fact, one of our most common and constructive emotions and is an essential part of the human experience. This informative and entertaining investigation of boredom--what it is and what it isn't, its uses and its dangers--spans more than 3,000 years of history and takes readers through fascinating neurological and psychological theories of emotion, as well as recent scientific investigations, to illustrate its role in our lives. There are Australian aboriginals and bored Romans, Jeffrey Archer and caged cockatoos, Camus and the early Christians, Durer and Degas. Toohey also explores the important role that boredom plays in popular and highbrow culture and how over the centuries it has proven to be a stimulus for art and literature. Toohey shows that boredom is a universal emotion experienced by humans throughout history and he explains its place, and value, in today's world. "Boredom: A Lively History "is vital reading for anyone interested in what goes on when supposedly nothing happens.*

JOHN SEARLE'S PHILOSOPHY OF LANGUAGE

FORCE, MEANING AND MIND

Cambridge University Press This is a volume of original essays on key aspects of John Searle's philosophy of language. It examines Searle's work in relation to current issues of central significance, including internalism versus externalism about mental and linguistic content, truth-conditional versus non-truth-conditional conceptions of content, the relative priorities of thought and language in the explanation of intentionality, the status of the distinction between force and sense in the theory of meaning, the issue of meaning scepticism in relation to rule-following, and the proper characterization of 'what is said' in relation to the semantics/pragmatics distinction. Written by a distinguished team of contemporary philosophers, and prefaced by an illuminating essay by Searle, the volume aims to contribute to a deeper understanding of Searle's work in philosophy of language, and to suggest innovative approaches to fundamental questions in that area.
