THE INTERNATIONAL BOND GUIDE

IN CAMERA: HOW TO GET PERFECT PICTURES STRAIGHT OUT OF THE CAMERA

Ilex Press *With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.*

ALTERNATIVE LITHOGRAPHY

UNLEASHING THE POTENTIALS OF NANOTECHNOLOGY

Springer Science & Business Media Good old Gutenberg could not have imagined that his revolutionary printing concept which so greatly contributed to dissemination of knowledge and thus today 's wealth, would have been a source of inspiration five hundred years later. Now, it seems intuitive that a simple way to produce a large number of replicates is using a mold to emboss pattern you need, but at the nanoscale nothing is simple: the devil is in the detail. And this book is about the "devil". In the following 17 chapters, the authors-all of them well recognized and active actors in this emerging field-describe the state-of-the-art, today 's technological bottlenecks and the prospects for micro-contact printing and nanoimprint lithography. Many results of this book originate from projects funded by the European Com mission through its "Nanotechnology Information Devices" (NID) initiative. NID was launched with the objective to develop nanoscale devices for the time when the red brick scenario of the ITRS roadmap would be reached. It became soon clear however, that there was no point to investigate only alternative devices to CMOS, but what was really needed was an integrated approach that took into account more facets of this difficult undertaking. Technologically speaking , this meant to have a coherent strategy to develop novel devices, nanofabrication tools and circuit & system architectures at the same time.

LEARN THE ART OF BIRD PHOTOGRAPHY

THE COMPLETE FIELD GUIDE FOR BEGINNING AND INTERMEDIATE PHOTOGRAPHERS AND BIRDERS

Createspace Independent Publishing Platform *Learn the Art of Bird Photography* is a comprehensive field guide to bird photography - so you can create beautiful bird images. Bird photography can be difficult, but with this book, you will learn how to make it easier, and you'll learn how to be more successful and create beautiful images. This book contains more information about bird photography techniques than any other book on the market today. There are comprehensive chapters on: how to set up your camera for bird photography, how to master your camera and settings, the best settings for photographing birds in flight for beginners and intermediate photographers, practice sessions at the end of each chapter so you'll master the concepts and techniques quickly, the basics of light, composition, exposure, depth of field, how to get the best point of view, and how to get sharp photos. There's a complete list of the bird photography hot spots in North America by week, so you'll know where and when to go! This book is designed to make you successful in your quest to photograph birds and create stunning bird images. Tim Boyer is a graduate of the Seattle Audubon Master Birder Program, an award-winning photographer, an experienced instructor and bird photography workshop leader.

*Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.*

PEONY PAVILION ONSTAGE

FOUR CENTURIES IN THE CAREER OF A CHINESE DRAMA

U OF M CENTER FOR CHINESE STUDIES *This book explores responses to Tang Xianzu's classic play *The Peony Pavilion* (*Mudan ting*) from three distinct segments of its public-literati playwrights; professional performers of Kun opera; and quite recently, directors and audiences outside China. Catherine Swatek first examines two adaptations of the play by Tang's contemporaries, which point to the unconventionality of the original work. She goes on to explore how the play has been changed in later adaptations, up to its most recent productions by Peter Sellars and Chen Shi-Zheng in the United States and Europe. Catherine Swatek is Associate Professor, University of British Columbia. She has published several articles on premodern Chinese drama and on female representation in Chinese opera.*

THE EXPANDED EDITION

Akashic Books *"Local editors Schaper and Horwitz have assembled a noteworthy*

collection of noir-infused stories mixed with laughter...The Akashic noir short-story anthologies are avidly sought and make ideal samplers for regional mystery collecting." --Library Journal "The best pieces in the collection turn the clichés of the genre on their head . . . and despite the unseemly subject matter, the stories are often surprisingly funny." —City Pages (Minneapolis) Brand-new stories from John Jodzio, Tom Kaczynski, and Peter Schilling, Jr., in addition to the original volume's stories by David Housewright, Steve Thayer, Judith Guest, Mary Logue, Bruce Rubenstein, K.J. Erickson, William Kent Krueger, Ellen Hart, Brad Zellar, Mary Sharratt, Pete Hautman, Larry Millett, Quinton Skinner, Gary Bush, and Chris Everheart. "St. Paul was originally called Pig's Eye's Landing and was named after Pig's Eye Parrant--trapper, moonshiner, and proprietor of the most popular drinking establishment on the Mississippi. Traders, river rats, missionaries, soldiers, land speculators, fur trappers, and Indian agents congregated in his establishment and made their deals. When Minnesota became a territory in 1849, the town leaders, realizing that a place called Pig's Eye might not inspire civic confidence, changed the name to St. Paul, after the largest church in the city . . . Across the river, Minneapolis has its own sordid story. By the turn of the twentieth century it was considered one of the most crooked cities in the nation. Mayor Albert Alonzo Ames, with the assistance of the chief of police, his brother Fred, ran a city so corrupt that according to Lincoln Steffans its 'deliberateness, invention, and avarice has never been equaled.' As recently as the mid-'90s, Minneapolis was called 'Murderopolis' due to a rash of killings that occurred over a long hot summer . . . Every city has its share of crime, but what makes the Twin Cities unique may be that we have more than our share of good writers to chronicle it. They are homegrown and they know the territory--how the cities look from the inside, out . . ."

SPECTRUM TEST PREP, GRADE 1

Carson-Dellosa Publishing Spectrum Test Prep Grade 1 includes strategy-based activities for language arts and math, test tips to help answer questions, and critical thinking and reasoning. The Spectrum Test Prep series for grades 1 to 8 was developed by experts in education and was created to help students improve and strengthen their test-taking skills. The activities in each book not only feature essential practice in reading, math, and language arts test areas, but also prepare students to take standardized tests. Students learn how to follow directions, understand different test formats, use effective strategies to avoid common mistakes, and budget their time wisely. Step-by-step solutions in the answer key are included. These comprehensive workbooks are an excellent resource for developing skills for assessment success. Spectrum, the best-selling workbook series, is proud to provide quality educational materials that support your students' learning achievement and success.

NANOLITHOGRAPHY AND PATTERNING TECHNIQUES IN MICROELECTRONICS

Elsevier Techniques such as surface patterning have facilitated the emergence of advanced polymers with applications in areas such as microelectronics. Surface

patterning of polymers has conventionally been undertaken by optical lithography. However, a new generation of nanolithographic and patterning techniques has made it possible to develop complex patterns at the nanoscale. Non-conventional lithography and patterning summarises this new range of techniques and their industrial applications. A number of chapters look at ways of forming and modifying surfaces for patterning. These are complemented by chapters on particular patterning techniques such as soft lithography, ion beam patterning, the use of nanostencils, photolithography and inkjet printing. The book also discusses prototyping and the manufacture of particular devices. With its distinguished international team of contributors, Non-conventional lithography and patterning is a standard reference for both those researching and using advanced polymers in such areas as microelectronics and biomedical devices. Looks at alternative approaches used to develop complex patterns at the nanoscale Concentrates on state of the art nanolithographic methods Written by a distinguished international team of contributors

SILENCE WITHIN AND BEYOND PEDAGOGICAL SETTINGS

Springer Nature *This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.*

RUDOLF STEINER'S MISSION AND ITA WEGMAN

Rudolf Steiner Press *'Because I felt that he knew how things were, I said simply: "I will stay with you." Then he said significant things to me that I was not to repeat. A very ancient karma existing between him and myself was renewed. It was not until many years later that I first realised the significance of that meeting.' - Ita Wegman*
Ita Wegman was one of Rudolf Steiner's most important co-workers, collaborating with him principally in the field of Medicine - co-authoring the key book Extending Practical Medicine and heading the Medical Section of the School of Spiritual Science. In the background to that external work, however, was an esoteric connection. In this seminal work of karma research, the authors attempt, sensitively and with

responsibility, to shed light on that spiritual and karmic history. Written for members of the Anthroposophical Society, this book is a profound study of a series of different incarnations linked to the figures of Ita Wegman and Rudolf Steiner. Spread over six disparate lifetimes, they range from Gilgamesh and Eabani (Enkidu) in Uruk, ancient Chaldea, to the Goetheanum in Dornach, Switzerland, the twentieth-century setting of the world centre of anthroposophy. Based on copious historical research, verbal statements and not a little spiritual insight, this rare and valuable work, reprinted here for the first time, features many illustrations and facsimiles of documents and personal letters.

DUMB LUCK AND THE KINDNESS OF STRANGERS

Simon and Schuster Witty, shrewd, and always a joy to read, John Gierach, "America's best fishing writer" (*Houston Chronicle*) and favorite streamside philosopher, has earned the following of "legions of readers who may not even fish but are drawn to his musings on community, culture, the natural world, and the seasons of life" (*Kirkus Reviews*). "After five decades, twenty books, and countless columns, [John Gierach] is still a master" (*Forbes*). Now, in his latest original collection, Gierach shows us why fly-fishing is the perfect antidote to everything that is wrong with the world. "Gierach's deceptively laconic prose masks an accomplished storyteller...His alert and slightly off-kilter observations place him in the general neighborhood of Mark Twain and James Thurber" (*Publishers Weekly*). In *Dumb Luck*

and the Kindness of Strangers, Gierach looks back to the long-ago day when he bought his first resident fishing license in Colorado, where the fishing season never ends, and just knew he was in the right place. And he succinctly sums up part of the appeal of his sport when he writes that it is “an acquired taste that reintroduces the chaos of uncertainty back into our well-regulated lives.” Lifelong fisherman though he is, Gierach can write with self-deprecating humor about his own fishing misadventures, confessing that despite all his experience, he is still capable of blowing a strike by a fish “in the usual amateur way.” “Arguably the best fishing writer working” (*The Wall Street Journal*), Gierach offers witty, trenchant observations not just about fly-fishing itself but also about how one’s love of fly-fishing shapes the world that we choose to make for ourselves.

NANO LITHOGRAPHY

John Wiley & Sons Lithography is an extremely complex tool – based on the concept of “imprinting” an original template version onto mass output – originally using relatively simple optical exposure, masking, and etching techniques, and now extended to include exposure to X-rays, high energy UV light, and electron beams – in processes developed to manufacture everyday products including those in the realms of consumer electronics, telecommunications, entertainment, and transportation, to name but a few. In the last few years, researchers and engineers have pushed the envelope of fields including optics, physics, chemistry, mechanics and fluidics, and are now developing the nanoworld with new tools and technologies. Beyond the scientific challenges that are endemic in this miniaturization race, next generation lithography techniques are essential for creating new devices, new functionalities and exploring new application fields. Nanolithography is the branch of nanotechnology concerned with the study and application of fabricating nanometer-scale structures – meaning the creation of patterns with at least one lateral dimension between the size of an individual atom and approximately 100 nm. It is used in the fabrication of leading-edge semiconductor integrated circuits (nanocircuitry) or nanoelectromechanical systems (NEMS). This book addresses physical principles as well as the scientific and technical challenges of nanolithography, covering X-ray and NanoImprint lithography, as well as techniques using scanning probe microscopy and the optical properties of metal nanostructures, patterning with block copolymers, and metrology for lithography. It is written for engineers or researchers new to the field, and will help readers to expand their knowledge of technologies that are constantly evolving.

YET MORE SWEET DAYS

NOTES FROM A FLY FISHER'S LIFE

For fly-fishermen everywhere, the news of an upcoming book from Tom Sutcliffe is as exciting as a ten-pound wild rainbow on a 4X tippet... Yet More Sweet Days certainly lives up to the weight of expectation from his many fans, all over the world internationally. It races upstream in leaps and bounds, taking you to places you've always wanted to fish: you'll wade the high mountain rivers of the Eastern Cape, clamber along the boulder-strewn crystal streams of the Western Cape, throw a dainty dry on hallowed English chalkstreams, and fight fresh-run salmon in rugged Iceland with a volcano belching ash behind your casting shoulder. You'll pick up tips and ideas (almost without realising it) from a master trout fisherman who has done more for the beautiful sport in South Africa than anyone, ever. Along the way you'll soak yourself warmly in a philosophy that embraces fish and birds, people and animals - a philosophy honed by thousands of kilometres of stalking up streams and countless cups of coffee brewed on a stove perched on the tailgate of his fishing truck. Complemented by many original artworks from the author, this beautiful book is at once a rumination, a reflection and a profound escape for fly fishermen everywhere; when you're not actually casting at trout, this is the next best thing. [credit: Paul Curtis]"I've known Tom Sutcliffe for three decades, and always admired his writing. This new book is an intimate look at the sport that we all love so well" - Gary Borger "Tom Sutcliffe has raised the bar yet again. Yet More Sweet Days has as much to do with life as with fly fishing. For me, his best work yet. And that's high praise!" - Clem Booth

BLACK RIVER DREAMS

MEDITATIONS ON FLY FISHING

A celebration of fly fishing, alternately lyrical and meditative, mystical and sensuous, each of these 16 essays represents an exploration of the intersection between past and present, spirit and body, water and land, trout and people, ghosts and dreams. Whether Werner is describing his first and last time fly fishing as a boy on a stream in northern Maine or the golden evenings he and his wife cast to Apache trout cruising in the dim mountain light, he brings an ecologically informed, poetic sensibility to all of his fly-fishing encounters.
