Fleet Owner American Trucking Trends 2005 - 2006 Trucking in British Columbia An Illustrated History Harbour Publishing
Accompanied by hundreds of previously unpublished archival and contemporary photographs, award-winning historian Daniel Francis delivers a fascinating account of the first hundred years of trucking in BC. Beginning in Vancouver with James Starks first delivery van in 1907, motorized transport exploded in the province, soon traversing every dirt track, hauling logs on temporary plank roads and leading to a frenzy of experimentation and innovation from the failed Renard Road Train and early battery-operated vehicles to some truly impressive purpose-built trucks, many of them manufactured in BC. **Motor Carriers Road Atlas** Road maps are accompanied by information on federally-designated routes and trucking restrictions. **Learning with Information Systems Learning Cycles in Information Systems Development** Routledge In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries. **Violence and Mental Health Its Manifold Faces** Springer Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health. **The Numinous Legacy Modern Cosmology and Religion** Albatross PressLtd Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider the

King of the Badgers A Novel Farrar, Straus and Giroux A Washington Post Notable Fiction Book for 2011 One of The Telegraph's Best Fiction Books 2011 Far from London's crime and pollution, Hanmouth's wealthier residents live in picturesque, heavily mortgaged cottages in the center of a town packed with artisanal cheese shops and antiques stores. They're reminded of the town's less desirable outskirts—with their grim, flimsy housing stock and chain stores—only when their neighbors have the presumption to claim also to live in Hanmouth. When an eight-year-old girl from the outer area goes missing, England's eyes suddenly turn toward the sleepy town with a curiosity as piercing and unblinking as the closed-circuit security cameras that line Hanmouth's idyllic streets. But somehow these cameras have missed the abduction of the girl, whose name is China. Is her blank-eyed hairdresser mother hiding her as part of a moneymaking hoax? Has she been abducted by one of the lurking perverts the townspeople imagine the cameras are protecting them from? Perhaps more cameras are needed? As it turns out, more than one resident of Hanmouth has a secret hidden behind closed doors. There's Sam and Harry, the cheesemonger and aristocrat who lead the county's gay orgies. The quiet husband of postcolonial theorist Miranda (everyone agrees she's marvelous) keeps a male lover, while their daughter disembowels dolls she's named Child Pornography and Slightly Jewish. Moral crusader John Calvin's Neighborhood Watch has an unusual reason for holding its meetings in secret. And, of course, somewhere out there is the house where little China is hidden. With the dark hilarity and unflinching honesty of a modern-day Middlemarch, King of the Badgers demolishes the already fragile privacy of Hanmouth's inhabitants. These characters, exquisitely drawn and rawly human, proclaim Philip Hensher's status as an extraordinary chronicler of the domestic, and one of the world's most dazzling and ambitious novelists.

Casa Malaparte Princeton Architectural Press It has been called the twentieth century's most beautiful house. Isolated at the tip of a craggy promontory on the Italian island of Capri, Casa Malaparte has captivated modern architects and designers with the graceful power of its lines and the drama of its setting...the stuccoed, Pompeian red box appears to have grown straight out of the rock. Its remoteness adds to its dreamy allure. Its simple shape belies its assertive, sculptural presence."Michael McDonough This handsome book is the first in-depth examination of the Casa Malaparte. Through original correspondence, plans, and drawings, Marida Talamona uncovers written and graphic evidence attributing the house's design to the client (writer Curzio Malaparte) rather than the architect (Adalberto Libera). The book includes archival and current photographs and new drawings, as well as an introduction by Giorgio Ciucci.
