Established on February 27, 1942, the base was designated to manufacture and ship overseas materials and equipment and to outfit and embark construction battalions and other naval units. Between 1942 and 1994, when the base was closed, the Seabees participated in every war involving the United States. Rather than focus entirely upon such naval icons as Stephen Decatur and Chester Nimitz, as most histories do, author Thomas J. Cutler, a retired lieutenant commander and former second class petty officer, brings to the forefront the contributions of enlisted people. You'll read about Quartermaster Peter Williams, who steered the ironclad Monitor into history, and Hospital Corpsman Tayinikia Campbell, who saved lives in USS Cole after she was struck by terrorists in Yemen. Unlike most histories, *A Sailor's History* is arranged thematically rather than chronologically. Chapters are built around the Navy's core values of honor, courage, and commitment, its traditions of "Don't Tread on Me" and "Don't Give Up the Ship," and other significant aspects of the Navy. As Cutler states in his preface, the book is not a whitewash. He includes mistakes and defeats along with the achievements and victories as he draws a portrait of a Navy growing stronger and smarter while turning tragedy into triumph. The result is a unique account that captures the Navy's heritage as much as its history and provides inspiration as well as information while emphasizing that most essential element of naval history: the Sailor. **Legal Aspects of Combating Terrorism IOS Press** This volume in the NATO Science for Peace and Security Series contains the papers of the Advanced Training Course (ATC) 'Legal Aspects of Combating Terrorism'. The purpose of this course was to support NATO on defence issues related to terrorism and united experts from various disciplines to give participants an understanding of how the various dimensions of the laws and their application fit together. In addition to the lectures that can be found in this book, the course was divided into three modules: the legal response to terrorism in general terms; combating terrorism using lawful means; and harmonizing the Law of Armed Conflict (LAC), national laws and NATO in the fight against terrorism. One of the main questions dealt with in this work is whether, in the face of the new threat, terrorism should still be countered through the ordinary means of criminal law, or whether there should be a significant shift in enforcement methods, including a less multilateral approach to decision-making and an increased use of military force. **Can Do! The Story of the Seabees Lulu.com** Born in Ôthe hellish aftermath of Pearl Harbor, Ô the Seabees began as barely armed civilians with no military training. They had an average age of 35. Their early motto was ÔCan Do!Ô **A Tuscan Childhood Vintage** The sparkling memoir of an idyllic, bohemian childhood in an enchanted Tuscan castle between World War I and World War II. Port Hueneme's deepwater harbor, rail system, and rural setting made it the ideal site from which to send 20 million measurement tons of war materiel and a quarter of a million men onto island specks that later became headlines: Guadalcanal, Tarawa, Iwo Jima, Okinawa, and the Philippines. Seabees later deployed from Port Hueneme to serve in the Korean, Vietnam, Desert Shield/Desert Storm, and Iraqi conflicts, as well as in peacetime, for more than 60 years. Charged with building air bases, ports, combat camps, hospitals, and other support facilities as part of military and humanitarian efforts around the world, the Seabees remain at home in Port Hueneme. **Treehouses Bloomsbury Methuen Drama** A new play from an award-winning playwright, published as part of the innovative Abbey Theatre playscript series *On the day of her father's funeral*, Eva - a young woman - is still haunted by the betrayal she witnessed from her childhood haven - the treehouse in the garden. The wealth of new facts it provides allows the reader to take a fresh look at nineteenth-century social history, including issues like racial integration in the military. As he examines daily life in the Union navy, Dennis Ringle also calls attention to the enlisted sailor's enormous contributions to the development of the U.S. Navy as it moved from wood and sail to steam and iron. A marine engineer with more than twenty years of naval experience, Ringle describes the lives of the steam engineers whose work later proved critical to the success of the ironclad monitors and the development of the powerful predreadnought warships. His focus is on the sailors assigned to the western river vessels, the ships enforcing the blockade, and those dispatched to destroy Confederate commerce raiders. To reconstruct daily life, he draws on a large number of published and unpublished diaries, journals, and letters. To put the information in context, he compares the sailor's life to that of a soldier's, including health conditions to explain why, for example, fewer sailors died from disease than soldiers. Ringle's efforts to gain respect for the courageous Union sailors who helped save the nation are certain to bring them recognition, just as Bell Wiley's landmark studies Billy Yank and Johnny Reb did for the Civil War soldiers. **The Declaration of Independence and Other Great Documents of American History 1775-1865 Courier Corporation** Thirteen compelling and influential documents: Henry's "Give Me Liberty or Give Me Death," Declaration of Independence, The Constitution, Washington's First Inaugural Address, The Monroe Doctrine, The Emancipation Proclamation, Gettysburg Address, more. **The Seabees at Gulfport Arcadia Publishing** In June 1942, the U.S. Navy established an advance base depot in Gulfport because of its uncrowded deepwater port, rail access, open land, and a tepid climate that permitted training and open port facilities year-round. The base became the southern home for the Seabees and was ideal for shipping construction materiel and men to the Caribbean or the Pacific via the Panama Canal. Since the base reopened in March 1966, Seabees have deployed from Gulfport to serve during major conflicts as well as in peacetime. Seabees from Gulfport played an integral part in Operation Desert Shield/Desert Storm and more recently deployed to Afghanistan and Iraq to assist in local construction efforts to rebuild both countries. Seabees assist thousands each year in international humanitarian projects while still calling Gulfport home. **Mastering the Art of Long-Range Shooting Gun Digest Books** "The long shot. It covers a wide scope of military operations, ranging from operations conducted under UN Security Council mandate to (collective) self-defence and consensual and humanitarian operations and identifies the relevant legal bases and applicable legal regimes governing the application of force and treatment of persons during such operations. It also devotes attention to the law governing the status of forces, military use of the sea and airspace and questions of international (criminal) responsibility for breaches of international law. New developments such as cyber warfare and controversial aspects of law in relation to contemporary operations, such as targeted killing of specific individuals are discussed and analysed, alongside recent developments in more traditional types of operations, such as peacekeeping and naval operations. The book is aimed at policy officials, commanders and their (military) legal advisors who are involved with the planning and conduct of any type of military operation and is intended to complement national and international policy and legal guidelines and assist in identifying and applying the law to ensure legitimacy and contribute to mission accomplishment. It likewise fulfils a need in pertinent international organizations, such as the UN, NATO, Regional Organizations, and NGOs. It also serves as a comprehensive work of reference to academics and is suitable for courses at military staff colleges, academies and universities, which devote attention to one or more aspects of international law treated in the book. This mix of intended users is reflected in the contributors who include senior (former) policy officials and (military) legal advisors, alongside academics engaged in teaching and research in these areas of international law. **The Jigaree** The jigaree is following me. What will I do? Suggested level: junior. **Death in the Long Grass A Big Game Hunter's Adventures in the African Bush St. Martin's Press** As thrilling as any novel, as taut and exciting as any adventure story, Peter Hathaway Capstick's *Death in the Long Grass* takes us deep into the heart of darkness to view Africa through the eyes of one of the most renowned professional hunters. Few men can say they have known Africa as Capstick has known it—leading safaris through lion country; tracking man-eating leopards along tangled jungle paths; running for cover as fear-maddened elephants stampede in all directions. And of the few who have known this dangerous way of life, fewer still can recount their adventures with the flair of this former professional hunter-turned-writer. Based on Capstick's own experiences and the personal accounts of his colleagues, *Death in the Long Grass* portrays the great killers of the African bush—not only the lion, leopard, and elephant, but the primitive rhino and the crocodile waiting for its unsuspecting prey, the titanic hippo and the Cape buffalo charging like an express train out of control. Capstick was a born raconteur whose colorful descriptions and eye for exciting, authentic detail bring us face to face with some of the most ferocious killers in the world—underrated killers like the surprisingly brave and cunning hyena, silent killers such as the lightning-fast black mamba snake, collective killers like the wild dog. Readers can lean back in a chair, sip a tall, iced drink, and revel in the kinds of hunting stories Hemingway and Ruark used to hear in hotel bars from Nairobi to Johannesburg, as veteran hunters would tell of what they heard beyond the campfire and saw through the sights of an express rifle. **Engineering Economics The King Bee A Biography of Admiral Ben Moreell Naval Institute Press** Ben Moreell was the first non-Naval Academy graduate to be awarded the four stars of an Admiral. He is still the only staff corps officer to be promoted to Admiral. The history of the U.S. Navy Seabees and the biography of Admiral Ben Moreell are inseparable. Immediately after the Japanese attack on Pearl Harbor, he began forming the construction units that ultimately became known as the Seabees. The first battalion of Seabees deployed from the U.S. on 27 Jan. '42. This instantaneous effort to recruit, train, organize, equip and deploy a military unit is still recognized as an amazing achievement. Ultimately over 300,000 Seabees were involved during WW II. The Seabees built and operated the equipment needed to get troops, equipment and supplies ashore in every amphibious landing of WW II. Beginning in North Africa and continuing to Sicily, Italy and Normandy, they were an essential element of the invasions of Europe. But their island hopping campaign throughout the Pacific with the Marines really made their reputation. They participated in every Pacific invasion together with the Marines with the exception of Guadalcanal, where they arrived about three weeks after the First Marines went ashore. Following the invasions, the Seabees built every sort of facility required by the Marines and the Navy; piers, runways, fuel storage, hospitals, ammo storage, dry docks, and more. The accomplishments of the Seabees continued through Korea, Viet Nam and the middle east. The unique aspect of the fighter-builder Seabees generated a need for a command structure that could respond to both elements at any time. Recognizing this critical feature Moreell achieved a major change to Navy Regulations and obtained the authorization for Civil Engineer Corps officers to be given command of the Seabees. They are still the only staff corps officers who enjoy the privilege of commanding fleet units. Moreell also directed the massive mobilization and construction effort for the Navy and Marine Corps throughout the war as well as dealing with unions, congress, manufacturers, and an ever growing federal bureaucracy. His open and honest dealings were recognized by all and contributed to the successful accomplishments of the Bureau of Yards and Docks during that time. But it Seabees remain his crowning military achievement. Their success in W W II was recognized by Fleet Admiral Chester Nimitz in a Seabee birthday anniversary letter to Moreell in which he stated, "...without them we could not have beaten the (Japanese)." An advisor to four Presidents, Ben Moreell's actions forever placed the Civil Engineer Corps and the Seabees solidly in Navy history and tradition.
