THE NINTH HOUR

A NOVEL

Farrar, Straus and Giroux A magnificent new novel from one of America's finest writers—a powerfully affecting story spanning the twentieth century of a widow and her daughter and the nuns who serve their Irish-American community in Brooklyn. On a dim winter afternoon, a young Irish immigrant opens a gas tap in his Brooklyn tenement. He is determined to prove—to the subway bosses who have recently fired him, to his pregnant wife—that "the hours of his life . . . belonged to himself alone." In the aftermath of the fire that follows, Sister St. Saviour, an aging nun, a Little Nursing Sister of the Sick Poor, appears, unbidden, to direct the way forward for his widow and his unborn child. In Catholic Brooklyn in the early part of the twentieth century, decorum, superstition, and shame collude to erase the man's brief existence, and yet his suicide, though never spoken of, reverberates through many lives—testing the limits and the demands of love and sacrifice, of forgiveness and forgetfulness, even through multiple generations. Rendered with remarkable delicacy, heart, and intelligence, Alice McDermott's The Ninth Hour is a crowning achievement of one of the finest American writers at work today.

COMPUTER NETWORKING

A TOP-DOWN APPROACH

Addison-Wesley Longman Computer Networkingprovides a top-down approach to this study by beginning with applications-level protocols and then working down the protocol stack. Focuses on a specific motivating example of a network-the Internet-as well as introducing students to protocols in a more theoretical context. New short "interlude" on "putting it all together" that follows the coverage of application, transport, network, and datalink layers ties together the various components of the Internet architecture and identifying aspects of the architecture that have made the Internet so successful. A new chapter covers wireless and mobile networking, including in-depth coverage of Wi-Fi, Mobile IP and GSM. Also included is expanded coverage on BGP, wireless security and DNS. This book is designed for readers who need to learn the fundamentals of computer networking. It also has extensive material, on the very latest technology, making it of great interest to networking professionals.

THE FOURTH INDUSTRIAL REVOLUTION

Currency World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.
