TEACHING READING IN THE CONTENT AREAS

IF NOT ME, THEN WHO?

ASCD History teachers aren't expected to teach science, math teachers aren't expected to teach social studies; so why are all teachers responsible for teaching reading? The answer is simple. An emphasis on reading and literacy skills in the content areas has an exponential effect on learning in every discipline. This completely revised third edition of the best-selling Teaching Reading in the Content Areas seeks to help educators understand how to teach reading in their respective disciplines, choose the best reading strategies from the vast array available, and positively impact student learning. Throughout, it draws from new research on the impact of new technologies, the population boom of English language learners, and the influence of the Common Core State Standards. Given the complexities of the reading process, teachers deserve--and this book provides--clear, research-based answers to overarching questions about teaching reading in the content areas: * What specific skills do students need to read effectively in each content area? * Which reading strategies are most appropriate to help students become more effective readers and independent learners? * What type of learning environment promotes effective reading and learning? By focusing on the differences in how content-area experts read and reason, teachers can be better prepared to help their students understand that the ways they read in biology are different from the ways they read in English, history, or mathematics. To read successfully in different content areas, students must develop discipline-specific skills and strategies along with knowledge of that discipline. With that in mind, this book also includes 40 strategies designed to help students in every grade level and across the content areas develop their vocabularies, comprehend informational and narrative texts, and engage in meaningful discussions of what they read.

FOSTERING COMPREHENSION IN ENGLISH CLASSES

BEYOND THE BASICS

Guilford Press This valuable, research-based guide gives middle and secondary English teachers the tools they need to improve the comprehension skills of all their students. Core chapters explain specific practices for fostering learning from texts; leading students to a thorough, lasting understanding of subject matter; nurturing meaningful responses to literature; explicitly teaching comprehension strategies; and engaging students in higher-order thinking. An additional chapter highlights vocabulary instruction. Throughout, attention is given to building comprehension skills in a diverse range of students, from high achievers to struggling readers and English language learners. A wealth of hands-on materials are featured, including lesson plans, scaffolded reading experiences, and a richly detailed example of a teaching unit that shows how all facets of comprehension instruction can be brought together in the classroom.

TRULY GUIDED READING

LAS Pedagogy and Success Guided Reading is the classroom Reading Recovery with supplements. In the classroom every child is involved in focussed reading instruction, small groups necessitate exceptional organization, all this without the year-long training that Reading Recovery participants have. Over the years teachers have been directed towards Guided Reading without knowledge of how to organize the class while working with small groups and further, without the knowledge of what is involved in overt reading instruction. This book will change that and give teachers the resources to organize and put in place worthwhile and relevant activities for children to independently engage in. In this book, significant suggestions are forwarded to make Guided Reading easier to implement and more effective. This book challenges held views about Guided Reading - misconceptions and misapplications of Guided Reading will be highlighted and in place will be effective pedagogy to help children move towards being truly confident, thinking readers. The teaching practices emphasized are: * Managing differentiated reading instruction for early, developing, early fluent readers, including a chapter relating to older readers. * Class management while working with small groups - independent tasks. * Questioning and prompting so children acquire and use self-help reading and comprehension strategies. * Encouraging student talk where they explore and exchange ideas. * Assessment (and recording) that informs instruction.
