It provides objective-by-objective coverage of all the material the student needs to know for the exam, signaling out critical information, outlining necessary procedures, and identifying the exam essentials. The book is composed of ten chapters. Each chapter treats each internetworking entity with clear, simple, easy-to-follow sections, text boxes and numerous conceptual figures. The book contains more than 313 Figures, 33 Exhibits, 150 Tables, and hundreds of CISCO Switches' and Routers' Configurations. At the end of each chapter, a number of learning questions, exam engine with flash cards and a list of the commands, which are used in that chapter, are given. To make the reader/student more familiar with the CISCO exam, which is not requiring explaining the answer, some of the answers are not provided with explanations. However, explanations for these answers can be obtained easily from their questions. This will preserve the reader time by eliminating all the repeated information and it will not waste his/her time by extra statements. To encourage the reader to stop and think as well as to test his knowledge, the answers are not given directly after the learning questions; instead, the answers are listed in Appendix A with complementary discussions. This book uses mainly the passive voice way of writing to give the reader strong-straightforward information without confusing the reader by extra-not required statements. This way of writing is also used by CISCO for devices' configurations, and by several computer technical books and operating systems; hence, the reader will be more familiar with CISCO devices' configurations while he/she reads this book. The 2200 questions are distributed across the book as shown below:

- Chapter 1: Internetworking Essentials 312
- Chapter 2: Internetworking IP Protocol and IP Addressing 308
- Chapter 3: Subnetting IP Network and VLSMs 85
- Chapter 4: Internetworking OS CISCO Devices 239
- Chapter 5: Internetworking Routing Protocols 233
- Chapter 6: Internetworking Switching 219
- Chapter 7: Internetworking OS Management Facilities 216
- Chapter 8: Internetworking WAN Technologies 188
- Chapter 9: Internetworking Wireless Technology: an Introduction 143
- Chapter 10: Internetworking Security: an Introduction 94
