**Chasing Gold Simon and Schuster For the entire history of human civilization, gold has enraptured people around the globe. The Nazis was no less enthralled by it, and felt that gold was the solution to funding Hitler's war machine. Gold was also on the mind of FDR across the Atlantic, as he worked with Europe's other leaders to bring the United States and the rest of the world out of a severe depression. FDR was hardly the first head of state to turn to gold in difficult times. Throughout history, it has been the refuge of both nations and people in trouble, working at times when nothing else does. Desperate people can buy a loaf of bread or bribe a border guard. Gold can get desperate nations oil to keep tanks running or munitions to fight a war. If the price is right, there is always someone somewhere willing to buy or sell gold. And it was to become the Nazi's most important medium of exchange during the war. Chasing Gold is the story of how the Nazis attempted to grab Europe's gold to finance history's bloodiest war. It is filled with high drama and close escapes, laying bare the palate of human emotions. Walking through the tale are giants of world history, as well as ordinary people called upon to undertake heroic action in an extraordinary time. Nazi Gold The Story of the World's Greatest Robbery--and Its Aftermath Mainstream Publishing Company Limited This is a real-life story about the theft of a fabulous treasure - the German national gold and foreign currency reserves worth some u2,500,000,000 at the time of the original investigation - which disappeared in transit following the Nazi collapse in 1945. It is also the story of a mystery and a cover-up which threatened to involve the US Army in Germany, the Pentagon and the Department of the Army in a scandal which predated Watergate by nearly 30 years." **Partnership Behind the Innovations That Won World War Two Oxford University Press Churchill's American Arsenal reveals how the technology, know-how, and production power behind the victorious Allied partnership during World War II extended beyond the battlefield and onto the home-front. Many weapons and inventions were credited with winning World War II, most famously in the assertion that the atomic bomb "ended the war, but radar won the war." What is less well known is that both airborne radar and the atomic bomb were invented in British laboratories, but built by Americans. The same holds true for many other American weapons credited with the Allied victory: the P-51 Mustang fighter, the Liberty ship, the proximity fuze, the Sherman tank, and even penicillin all began with British scientists and planners, but were designed and mass-produced by American engineers and factory workers. Churchill's American Arsenal chronicles this vital but often fraught relationship between British inventiveness and American technical might. At first, leaders in each nation were deeply skeptical that such a relationship could ever be successful. But despite initial misunderstandings, petty jealousies, and continuing differences over priorities, scientists and engineers on both sides of the Atlantic found new and often ingenious ways to work together, jointly creating the weapons that often became the decisive factor in the strategy for victory that Churchill had laid out during the earliest days of the conflict. While no single invention won the war, without any one of them, the war could have been lost. Nazi Gold - Latitude 55 FriesenPress In the waning days of World War II, a crafty Sicilian prospector and his mafia associates concoct a scheme to hide tons of Nazi gold, pilfered from their victims, in an aspiring gold mine in the mountains of British Columbia until it is called for. Decades later, a private organization contracted by a group based in Turkey is determined to find the gold and return it to the countries and the descendants of the people from whom it was stolen. In order to recover it and correct this historic injustice, they'll have to battle secretive Swiss and German banks, the mafia, and even the Vatican, all of whom are seeking to either cover up their involvement in the crime or racing to reclaim the gold. Hunting Evil The Nazi War Criminals Who Escaped and the Quest to Bring Them to Justice Crown Already acclaimed in England as "first-rate" (The Sunday Times); "a model of meticulous, courageous and path-breaking scholarship"(Literary Review); and "absorbing and thoroughly gripping... deserves a lasting place among histories of the war." (The Sunday Telegraph), Hunting Evil is the first complete and definitive account of how the Nazis escaped and were pursued and captured -- or managed to live long lives as fugitives. At the end of the Second World War, an estimated 30,000 Nazi war criminals fled from justice, including some of the highest ranking members of the Nazi Party. Many of them have names that resonate deeply in twentieth-century history -- Eichmann, Mengele, Martin Bormann, and Klaus Barbie -- not just for the monstrosity of their crimes, but also because of the shadowy nature of their post-war existence, holed up in the depths of Latin America, always**

one step ahead of their pursuers. Aided and abetted by prominent people throughout Europe, they hid in foreboding castles high in the Austrian alps, and were taken in by shady Argentine secret agents. The attempts to bring them to justice are no less dramatic, featuring vengeful Holocaust survivors, inept politicians, and daring plots to kidnap or assassinate the fugitives. In this exhaustively researched and compellingly written work of World War II history and investigative reporting, journalist and novelist Guy Walters gives a comprehensive account of one of the most shocking and important aspects of the war: how the most notorious Nazi war criminals escaped justice, how they were pursued, captured or able to remain free until their natural deaths and how the Nazis were assisted while they were on the run by "helpers" ranging from a Vatican bishop to a British camel doctor, and even members of Western intelligence services. Based on all new interviews with Nazi hunters and former Nazis and intelligence agents, travels along the actual escape routes, and archival research in Germany, Britain, the United States, Austria, and Italy, *Hunting Evil* authoritatively debunks much of what has previously been understood about Nazis and Nazi hunters in the post war era, including myths about the alleged "Spider" and "Odessa" escape networks and the surprising truth about the world's most legendary Nazi hunter Simon Wiesenthal. From its haunting chronicle of the monstrous mass murders the Nazis perpetrated and the murky details of their postwar existence to the challenges of hunting them down, *Hunting Evil* is a monumental work of nonfiction written with the pacing and intrigue of a thriller.

*Hitler's Holy Relics A True Story of Nazi Plunder and the Race to Recover the Crown Jewels of the Holy Roman Empire* Simon and Schuster From Paris to Stalingrad, the Nazis systematically plundered all manner of art and antiquities. But the first and most valuable treasure they looted were the Crown Jewels of the Holy Roman Empire. This is the true-life Indiana Jones story of a college professor turned Army sleuth who foils a Nazi plot to preserve these cherished symbols of Hitler's Thousand Year Reich. Author Sidney Kirkpatrick draws on recently discovered and previously unpublished documents, including interrogation and intelligence reports, diaries and correspondence, as well as on interviews with all remaining living participants involved with the case, to re-create this thrilling true-life story.

*Dare to Make History Chasing a Dream and Fighting for Equity* Radius Book Group *Dare to Make History* is the story of two courageous and talented women who weren't willing to accept anything less than being treated as equals. On their journey to a gold medal in women's ice hockey, they became role models for generations before and after them. Twins Jocelyne Lamoureux-Davidson and Monique Lamoureux-Morando started playing ice hockey with their four older brothers and their friends on a frozen pond next to their home in North Dakota. No girls hockey teams, no problem—they just played on boys teams. They went on to win six World Championships and played in three Olympics, winning two silver medals and ultimately a gold medal in South Korea in 2018 for the USA

**Women's National Team. They did not allow roadblocks and discrimination deter them from taking on their governing body—USA Hockey—threatening to boycott the 2017 World Championships and jeopardizing their ability to compete in the 2018 Olympics unless their gender equity issues were addressed. The success of Monique, Jocelyne, and their team thrust them into the center of the struggle for gender equity, for women in hockey and in sports in general, as well as in society at large. In Dare to Make History, the Lamoureux twins chronicle their journey to the pinnacle of their sport, their efforts along with almost 150 other hockey players to start a new professional women's hockey league, their training to come back and make another national team after giving birth, their tireless efforts to advance the interests of disadvantaged communities in closing the digital divide, and their ongoing contributions as role models championing the dreams of future generations of girls in sports, education, and the workplace. This is not a hockey book. It is not a girls book. It is a book about the importance of the fight for equity, particularly gender equity. It is the inspirational story of how two young women from a small town in North Dakota have dreamed big—had the courage to take on huge battles—and in the end how they have dared to make history.**

desperate of times—the improbable, intimate account of how nine working-class boys from the American West showed the world at the 1936 Olympics in Berlin what true grit really meant. It was an unlikely quest from the start. With a team composed of the sons of loggers, shipyard workers, and farmers, the University of Washington's eight-oar crew team was never expected to defeat the elite teams of the East Coast and Great Britain, yet they did, going on to shock the world by defeating the German team rowing for Adolf Hitler. The emotional heart of the tale lies with Joe Rantz, a teenager without family or prospects, who rows not only to regain his shattered self-regard but also to find a real place for himself in the world. Drawing on the boys' own journals and vivid memories of a once-in-a-lifetime shared dream, Brown has created an unforgettable portrait of an era, a celebration of a remarkable achievement, and a chronicle of one extraordinary young man's personal quest.

No American city was more important to the Nazis than Los Angeles, home to Hollywood, the greatest propaganda machine in the world. The Nazis plotted to kill the city's Jews and to sabotage the nation's military installations: plans existed for hanging twenty prominent Hollywood figures such as Al Jolson, Charlie Chaplin, and Samuel Goldwyn; for driving through Boyle Heights and machine-gunning as many Jews as possible; and for blowing up defense installations and seizing munitions from National Guard armories along the Pacific Coast. U.S. law enforcement agencies were not paying close attention--preferring to monitor Reds rather than Nazis--and only Leon Lewis and his daring ring

of spies stood in the way. From 1933 until the end of World War II, attorney Leon Lewis, the man Nazis would come to call "the most dangerous Jew in Los Angeles," ran a spy operation comprised of military veterans and their wives who infiltrated every Nazi and fascist group in Los Angeles. Often rising to leadership positions, this daring ring of spies uncovered and foiled the Nazi's disturbing plans for death and destruction. Featuring a large cast of Nazis, undercover agents, and colorful supporting players, Hitler in Los Angeles, by acclaimed historian Steven J. Ross, tells the story of Lewis's daring spy network in a time when hate groups had moved from the margins to the mainstream. **Unbroken A World War II Story of Survival, Resilience, and Redemption Random House Trade Paperbacks #1 NEW YORK TIMES BESTSELLER • NOW A MAJOR MOTION PICTURE • Look for special features inside. In 1960, Bernstein was just a sixteen-year-old at considerable risk of failing to graduate high school. Inquisitive, self-taught—and, yes, truant—Bernstein landed a job as a copyboy at the Evening Star, the afternoon paper in Washington. By nineteen, he was a reporter there. In Chasing History: A Kid in the Newsroom, Bernstein recalls the origins of his storied journalistic career as he chronicles the Kennedy era, the swelling civil rights movement, and a slew of grisly crimes. He spins a buoyant, frenetic account of educating himself in what Bob Woodward describes as “the genius of perpetual engagement.” Funny and exhilarating, poignant and frank, Chasing History is an extraordinary memoir of life on the cusp of adulthood for a determined young man with a dogged commitment to the truth. were fired and the process of rebuilding Germany and Europe began, the Western Allies and the Soviet Union each tried to obtain the services of the Third Reich's leading scientists, especially those involved in rocketry, missile technology, and aerospace research. Naturally, this was a delicate affair due to the fact many of the German scientists were not only active Nazis but had helped the Nazi war machine terrorize the world. At the same time, by the late war period, the Anglo-American Allies formed a clear picture of the Soviet state. Though forced to ally with the USSR's dictator, Josef Stalin, the West came to understand Communist Russia represented yet another hungry totalitarian power, and thus a very real threat to an independent Europe. British Prime Minister Winston Churchill realized the menacing character of the Soviets from the Katyn Forest Massacre of Polish army officers, if not before, while the Americans only gradually shed a naïve assumption of continued Russian friendliness after the war. For their part, the Soviets retained ruthless imperial ambitions which manifested in various ways. They allied with Hitler for a time in 1939 to 1941, planning to divide Eastern Europe between their two expansionist states. They devastated the Ukrainian population with the Holodomor, an engineered, genocidal famine which claimed perhaps 3 million victims. The Soviet refusal to evacuate Eastern Europe following the war, instead retaining many formerly democratic countries as vassal states, spoke volumes about their intentions. Both the Western Allies and the Soviets knew of Adolf Hitler's V-2 rocket program, the forerunner of ballistic missiles and the space race. Each recognized the immense strategic value of these technologies and wished to secure their benefits for themselves. As the Soviets contemplated additional expansion following the "Great Patriotic War" and the U.S. military came to understand the putative allies of today would emerge as the enemies of tomorrow, the men possessing knowledge of the V-2 rockets and other Third Reich military technology programs became seen as crucial pieces in the incipient NATO versus Warsaw Pact standoff. The result was the American-led "Operation Paperclip" on the Western side, which resulted in German scientists putting their expertise at the disposal of the U.S. and other NATO members. Operation Paperclip aimed not only to obtain the benefits of German scientific advances for the United States but also to deny them to the potentially hostile Soviets, as General Leslie Groves enunciated: "Heisenberg was one of the world's leading physicists, and, at the time of the German break-up, he was worth more to us than ten divisions of Germans. Had he fallen into the Russian hands, he would have proven invaluable to them (Naimark, 1995, 207). To say Operation Paperclip had a profound impact on the Cold War and American history would be an understatement. The most well known example of the operation's "success" is Wernher von Braun, who was once a member of a branch of the SS involved in the Holocaust, would become known as the "father of rocket science" and fascinate the world with visions of winged rockets and space stations as a "new" Manhattan Project, one that NASA would

eventually adopt. And in addition to the weaponization of ballistic missiles that progressed throughout the Cold War, von Braun's expertise was used for America's most historic space missions. NASA also had to develop rockets capable of first launching a spacecraft into Earth's orbit, and then launching it toward the Moon. The Soviets struggled throughout the 1960s to design rockets up to the task, but thanks to von Braun, NASA got it right with the Saturn V rocket.

Propulsive and gripping, in part because of Mr. Brown’s ability to make us care deeply about the fates of these individual soldiers...a page-turner.” - Wall Street Journal From the #1 New York Times bestselling author of *The Boys in the Boat*, a gripping World War II saga of patriotism and resistance, focusing on four Japanese American men and their families, and the contributions and sacrifices that they made for the sake of the nation. In the days and months after Pearl Harbor, the lives of Japanese Americans across the continent and Hawaii were changed forever. Brown also tells the story of these soldiers' parents, immigrants who were forced to submit to life in concentration camps on U.S. soil. Woven throughout is the chronicle of Gordon Hirabayashi, one of a cadre of patriotic resisters who stood up against their government in defense of their own rights. Whether fighting on battlefields or in courtrooms, these were Americans under unprecedented strain, doing what Americans do best—striving, resisting, pushing back, rising up, standing on principle, laying down their lives, and enduring. *The Venus Fixers: The Remarkable Story of the Allied Monuments Officers Who Saved Italy's Art During World War II* Farrar, Straus and Giroux In 1943, while the world was convulsed by war, a few visionaries -- in the private sector and in the military -- committed to protect Europe's cultural heritage from the indiscriminate ravages of World War II. In the midst of the conflict, the Allied Forces appointed the monuments officers—a motley group of art historians, curators, architects, and artists—to ensure that the great masterworks of European art and architecture were not looted or bombed into oblivion. The journalist Ilaria Dagnini Brey focuses her spellbinding account on the monuments officers of Italy, quickly dubbed "the Venus Fixers" by bemused troops. Working on the front lines in conditions of great deprivation and danger, these unlikely soldiers stripped the great galleries of their incomparable holdings and sent them into safety by any means they could. They worked with skeptical army strategists to make sure air raids didn't take out the heart of an ancient city, and patched up Renaissance palazzi and ancient churches whose lead roofs were sometimes melted away by the savagery of the attacks. Sometimes they failed. But to an astonishing degree, they succeeded, and anyone who marvels at Italy's artistic riches today is witnessing their handiwork. In the course of her research, Brey gained unprecedented access to private archives and primary sources, and the result is a book at once thorough and grandly entertaining—a revelatory take on a little-known chapter of World War II history. *The Venus Fixers* is

an adventure story with the gorgeous tints of a Botticelli landscape as its backdrop. Rogue Heroes The History of the SAS, Britain's Secret Special Forces Unit That Sabotaged the Nazis and Changed the Nature of War Crown NEW YORK TIMES BESTSELLER • The incredible untold story of World War II's greatest secret fighting force, as told by the modern master of wartime intrigue—coming soon as a limited series on Epix! "Reads like a mashup of The Dirty Dozen and The Great Escape, with a sprinkling of Ocean's 11 thrown in for good measure." —Michiko Kakutani, The New York Times ONE OF NPR'S BEST BOOKS OF THE YEAR • "Rogue Heroes is a ripping good read."—Washington Post (10 Best Books of the Year) Britain's Special Air Service—or SAS—was the brainchild of David Stirling, a young aristocrat whose aimlessness belied a remarkable strategic mind. Where most of his colleagues looked at a World War II battlefield map and saw a protracted struggle, Stirling saw an opportunity: given a small number of elite men, he could parachute behind Nazi lines and sabotage their airplanes and supplies. Defying his superiors'

conventional wisdom, Stirling assembled a revolutionary fighting force that would upend not just the balance of the war, but the nature of combat itself. Bringing his keen eye for detail to a riveting wartime narrative, Ben Macintyre uses his unprecedented access to the SAS archives to shine a light on a legendary unit long shrouded in secrecy. **Chasing the Moon The People, the Politics, and the Promise That Launched America into the Space Age** Ballantine Books JFK issued the historic moon landing challenge. These are the stories of the visionaries who helped America complete his vision with the first lunar landing fifty years ago. A Companion Book to the AMERICAN EXPERIENCE® Film on PBS® Going in depth to explore their stories beyond the PBS series, writer/producer Robert Stone—called “one of our most important documentary filmmakers” by Entertainment Weekly—brings these important figures to brilliant life. In 1961, President John F. Kennedy proposed the nation spend twenty billion dollars to land a man on the Moon before the end of the decade. Based on eyewitness accounts and newly discovered archival material, **Chasing the Moon** reveals for the first time the unknown stories of the fascinating individuals whose imaginative work across several decades culminated in America’s momentous achievement. More than a story of engineers and astronauts, the moon landing—now celebrating its fiftieth anniversary—grew out of the dreams of science fiction writers, filmmakers, military geniuses, and rule-breaking scientists. They include • Science fiction author Arthur C. Clarke, whose writing inspired some of the key players in the Moon race. A scientific paper he wrote in his twenties led to the U.S. beating Russia in one area of space: communications satellites. • Wernher von Braun, the former Nazi military genius who oversaw Hitler's rocket weapons program. After working on ballistic missiles for the U.S. Army, he was recruited by NASA to manage the creation of the Saturn V moon rocket. • Astronaut Frank Borman, commander of the first mission to circumnavigate the Moon, whose powerful testimony before Congress in 1967 decisively saved the U.S. lunar program from being cancelled. • Poppy Northcutt, a young mathematician who was the first woman to work in Mission Control. Her media exposure as a unique presence in this all-male world allowed her the freedom to stand up for equal rights for women and minorities. • Edward Dwight, an African American astronaut candidate, recruited at the urging of the Kennedy White House to further the administration’s civil rights agenda—but not everyone welcomed his inclusion. Setting these key players in the political, social, and cultural climate of the time, and including captivating photographs throughout, **Chasing the Moon** focuses on the science and the history, but most important, the extraordinary individuals behind what was undoubtedly the greatest human achievement of the twentieth century. **Sophie's World A Novel About the History of Philosophy** Farrar, Straus and Giroux One day Sophie comes home from school to find two questions in her mail: "Who are you?" and "Where does the world come from?" On New Year's Eve, 1941, just three weeks after the attack on Pearl Harbor, the Japanese were bombing the Philippine capital of Manila, where journalists Mel and Annalee Jacoby had married just a month earlier. The couple had worked in China as members of a tight community of foreign correspondents with close ties to Chinese leaders; if captured by invading Japanese troops, they were certain to be executed. Racing to the docks just before midnight, they barely escaped on a freighter—the beginning of a tumultuous journey that would take them from one island outpost to another. While keeping ahead of the approaching Japanese, Mel and Annalee covered the harrowing war in the Pacific Theater—two of only a handful of valiant and dedicated journalists reporting from the region. Supported by deep historical research, extensive interviews, and the Jacobys' personal letters, Bill Lascher recreates the Jacobys' thrilling odyssey and their love affair with the Far East and one another. Bringing to light their compelling personal stories and their professional life together, *Eve of a Hundred Midnights* is a tale of an unquenchable thirst for adventure, of daring reportage at great personal risk, and of an enduring romance that blossomed in the shadow of war.**

**Nazis on Oberschopfheim, a small, rural, overwhelmingly Catholic village in Baden-Wuerttemberg in southwestern Germany. This incisively written book raises fundamental questions about the nature of the Third Reich. The authors portray the Nazi regime as considerably less "totalitarian" than is commonly assumed, hardly an exemplar of the efficiency for which Germany is known, and neither revered nor condemned by most of its inhabitants. The authors suggest that Oberschopfheim merely accepted Nazi rule with the same resignation with which so many ordinary people have regarded their governments throughout history. Based on village and county records and on the direct testimony of Oberschopfheimers, this book will interest anyone concerned with contemporary Germany as a growing economic power and will appeal to the descendants of German immigrants to the United States because of its depiction of several generations of life in a German village. The Winter Fortress The Epic Mission to Sabotage Hitler's Atomic Bomb HarperCollins From the internationally acclaimed, best-selling author of Hunting Eichmann and The Perfect Mile, a World War II spy adventure set in Norway that draws on top-secret documents and memoirs of the saboteurs. In 1942, the Nazis were racing to complete the first atomic bomb. All they needed was a single, incredibly rare ingredient: heavy water, which was produced solely at Norway's Vemork plant. Under threat of death, Vemork's engineers pushed production into overdrive. If the Allies could not destroy the plant, they feared the Nazis would soon be in possession of the most dangerous weapon the world had ever seen. But how would the Allied forces reach the castle fortress, set on a precipitous gorge in one of the coldest, most inhospitable places on earth? Based on a trove of top-secret documents and never-before-seen diaries and letters of the saboteurs, The Winter Fortress is an arresting chronicle of a brilliant scientist, a band of spies on skis, perilous survival in the wild, Gestapo manhunts, and a last-minute operation that would alter the course of the war.
