LEMON-AID USED CARS AND TRUCKS 2009-2010

Dundurn For the first time in one volume, Phil Edmonston, Canada's automotive "Dr. Phil," covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years.

LEMON-AID USED CARS AND TRUCKS 2010-2011

Dundurn "The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." - The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

LEMON-AID USED CARS AND TRUCKS 2011-2012

Dundurn A guide to buying a used car or minivan features information on the strengths and weaknesses of each model, a safety summary, recalls, warranties, and service tips.

PRE-INCIDENT INDICATORS OF TERRORIST INCIDENTS

THE IDENTIFICATION OF BEHAVIORAL, GEOGRAPHIC AND TEMPORAL PATTERNS OF PREPARATORY CONDUCT

DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

THE PERFORMANCE ECONOMY

Springer This updated and revised edition outlines strategies and models for how to use technology and knowledge to improve performance, create jobs and increase income. It shows what skills will be required to produce, sell and manage performance over time, and how manual jobs can contribute to reduce the consumption of non-renewable resources.

VENTURE CAPITAL & THE FINANCE OF INNOVATION

"Many interesting developments have occurred in the world of venture capital since the publication of the first edition of this book in 2006, which prompted us to revise the book for the second edition. While the organization of the book remains unchanged, many of the chapters are substantially rewritten. For example, in Chapter 5, we re-ranked top VC firms, incorporating the latest performance statistics, fundraising and investment activities, notable exits, and (as always) our subjective opinions. In Chapter 6, we examine further evidence of the deepening globalization of the industry. In Chapters 3, 4, and 7, we analyze the impact of the 1999-2000 Internet bubble years on the VC risk and returns, as investments made in those years are finally mature and thus now a part of the performance evaluation analysis. We also incorporated expositional improvements throughout the book based on reader feedback on the first edition. Another feature of the new edition is that the VCV model, used extensively in Part III of the book, is now available as a Web-based application available on <http://VCVtools.com>. Significant collaborative efforts went into developing this tool, which we believe will be of interest to a broad audience, including practitioners interested in valuing VC-backed company stocks and employee stock options"

DRIVING WITH THE DEVIL

SOUTHERN MOONSHINE, DETROIT WHEELS, AND THE BIRTH OF NASCAR

Crown “Moonshiners put more time, energy, thought, and love into their cars than any racer ever will. Lose on the track and you go home. Lose with a load of whiskey and you go to jail.” —Junior Johnson, NASCAR legend and one-time whiskey runner Today’s NASCAR is a family sport with 75 million loyal fans, which is growing bigger and more mainstream by the day. Part Disney, part Vegas, part Barnum & Bailey, NASCAR is also a multibillion-dollar business and a cultural phenomenon that transcends geography, class, and gender. But dark secrets lurk in NASCAR’s past. Driving with the Devil uncovers for the first time the true story behind NASCAR’s distant, moonshine-fueled origins and paints a rich portrait of the colorful men who created it. Long before the sport of stock-car racing even existed, young men in the rural, Depression-wracked South had figured out that cars and speed were tickets to a better life. With few options beyond the farm or factory, the best chance of escape was running moonshine. Bootlegging offered speed, adventure, and wads of cash—if the drivers survived. Driving with the Devil is the story of bootleggers whose empires grew during Prohibition and continued to thrive well after Repeal, and of drivers who thundered down dusty back roads with moonshine deliveries, deftly outrunning federal agents. The car of choice was the Ford V-8, the hottest car of the 1930s, and ace mechanics tinkered with them until they could fly across mountain roads at 100 miles an hour. After fighting in World War II, moonshiners transferred their skills to the rough, red-dirt racetracks of Dixie, and a national sport was born. In this dynamic era (1930s and ’40s), three men with a passion for Ford V-8s—convicted criminal Ray Parks, foul-mouthed mechanic Red Vogt, and crippled war veteran Red Byron, NASCAR’s first champion—emerged as the first stock car “team.” Theirs is the violent, poignant story of how moonshine and fast cars merged to create a new sport for the South to call its own. Driving with the Devil is a fascinating look at the well-hidden historical connection between whiskey running and stock-car racing. NASCAR histories will tell you who led every lap of every race since the first official race in 1948. Driving with the Devil goes deeper to bring you the excitement, passion, crime, and death-defying feats of the wild, early days that NASCAR has carefully hidden from public view. In the tradition of Laura Hillenbrand’s Seabiscuit, this tale not only reveals a bygone era of a beloved sport, but also the character of the country at a moment in time.

THE CHALLENGE OF CRIME IN A FREE SOCIETY

A REPORT

This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

BLOWN TO BITS

YOUR LIFE, LIBERTY, AND HAPPINESS AFTER THE DIGITAL EXPLOSION

Addison-Wesley Professional Every day, billions of photographs, news stories, songs, X-rays, TV shows, phone calls, and emails are being scattered around the world as sequences of zeroes and ones: bits. We can't escape this explosion of digital information and few of us want to—the benefits are too seductive. The technology has enabled unprecedented innovation, collaboration, entertainment, and democratic participation. But the same engineering marvels are shattering centuries-old assumptions about privacy, identity, free expression, and personal control as more and more details of our lives are captured as digital data. Can you control who sees all that personal information about you? Can email be truly confidential, when nothing seems to be private? Shouldn't the Internet be censored the way radio and TV are? Is it really a federal crime to download music? When you use Google or Yahoo! to search for something, how do they decide which sites to show you? Do you still have free speech in the digital world? Do you have a voice in shaping government or corporate policies about any of this? Blown to Bits offers provocative answers to these questions and tells intriguing real-life stories. This book is a wake-up call to the human consequences of the digital explosion.

ELECTRIC AND HYBRID CARS

A HISTORY, 2D ED.

McFarland This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a “woman's car” to “going green” is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

PRINCIPLES OF MANAGEMENT

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. ASEAN CENTRALITY AND THE ASEAN-US ECONOMIC RELATIONSHIP

The Association of Southeast Asian Nations (ASEAN) is strategically significant because of its size, dynamism, and role in the Asian economic and security architectures. This paper examines how ASEAN seeks to strengthen these assets through "centrality" in intraregional and external policy decisions. It recommends a two-speed approach toward centrality in order to maximize regional incomes and benefit all member economies: first, selective engagement by ASEAN members in productive external partnerships and, second, vigorous policies to share gains across the region. This strategy has solid underpinnings in the Kemp-Wan theorem on trade agreements. It would warrant, for example, a Trans-Pacific Partnership (TPP) agreement with incomplete ASEAN membership, complemented with policies to extend gains across the region. The United States could support this framework by pursuing deep relations with some ASEAN members, while broadly assisting the region's development.

AUTO REPAIR FOR DUMMIES

John Wiley & Sons Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
