**College Physics** Breton Publishing Company **Nicomachean Ethics** Phoenix Classics Ebooks Nicomachean Ethics Aristotle - The Nicomachean Ethics is one of Aristotle's most widely read and influential works. Ideas central to ethics—that happiness is the end of human endeavor, that moral virtue is formed through action and habituation, and that good action requires prudence—found their most powerful proponent in the person medieval scholars simply called "the Philosopher." Drawing on their intimate knowledge of Aristotle's thought, Robert C. Bartlett and Susan D. Collins have produced here an English-language translation of the Ethics that is as remarkably faithful to the original as it is graceful in its rendering. Aristotle is well known for the precision with which he chooses his words, and in this elegant translation his work has found its ideal match. Bartlett and Collins provide copious notes and a glossary providing context and further explanation for students, as well as an introduction and a substantial interpretive essay that sketch central arguments of the work and the seminal place of Aristotle's Ethics in his political philosophy as a whole. The Nicomachean Ethics has engaged the serious interest of readers across centuries and civilizations—of peoples ancient, medieval, and modern; pagan, Christian, Muslim, and Jewish—and this new edition will take its place as the standard English-language translation. **The 9/11 Commission Report Final Report of the National Commission on Terrorist Attacks Upon the United States** W. Increasingly, the decisions that affect our lives--where we go to school, whether we get a car loan, how much we pay for health insurance--are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: Everyone is judged according to the same rules, and bias is eliminated. But as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and uncontestable, even when they're wrong. Most troubling, they reinforce discrimination: If a poor student can't get a loan because a lending model deems him too risky (by virtue of his zip code), he's then cut off from the kind of education that could pull him out of poverty, and a vicious spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy." Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort r sum s, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist for the 2016 Goodreads Choice Awards (Science and Technology) -- Kirkus, Best Books of 2016 -- New York Times, 100 Notable Books of 2016 (Non-Fiction) -- The Guardian, Best Books of 2016 -- WBUR's "On Point," Best Books of 2016: Staff Picks -- Boston Globe, Best Books of 2016, Non-Fiction **Risk Savvy How to Make Good Decisions** Penguin A new eye-opener on how we can make better decisions—by the author of Gut Feelings In this age of big data we often trust that expert analysis—whether it's about next year's stock market or a person's risk of getting cancer—is accurate. But, as risk expert Gerd Gigerenzer reveals in his latest book, Risk Savvy, most of us, including doctors, lawyers, and financial advisors, often misunderstand statistics, leaving us misinformed and vulnerable to exploitation. Yet there's hope. In Risk Savvy, Gigerenzer gives us an essential guide to the science of good decision making, showing how ordinary people can make better decisions for their money, their health, and their families. Here, Gigerenzer delivers the surprising conclusion that the best results often come from considering less information and listening to your gut. **Practice of Physics Secret Star** Harlequin The Stars of Mithra trilogy comes to a gripping conclusion in this classic story from #1 New York Times bestselling author Nora Roberts! Lieutenant Seth Buchanan is astonished when the beautiful victim of his homicide investigation turns up—very much alive—at the scene of the murder. Grace Fontaine is keeping secrets, ones that should have killed her, but the notorious heiress refuses to reveal anything. The cool, controlled cop never lets his feelings get in the way of his job, and with a killer at large, Seth can't afford any distractions. But there's something irresistible about Grace...and eventually Seth finds it hard to remember there's any mystery more important to solve than that of Grace herself. **Intermediate Microeconomics with Calculus: A Modern Approach Ninth International Student Edition** W.W. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read. **College Physics A Strategic Approach, Technology Update, Books a La Carte Edition** Addison-Wesley NOTE: This edition features the same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. In this winner of the Lannan Cultural Freedom Prize for an Especially Notable Book,

Keeanga-Yamahtta Taylor “not only exposes the canard of color-blindness but reveals how structural racism and class oppression are joined at the hip” (Robin D. G. Kelley, author of *Freedom Dreams*). The eruption of mass protests in the wake of the police murders of Michael Brown in Ferguson, Missouri, and Eric Garner in New York City have challenged the impunity with which officers of the law carry out violence against black people and punctured the illusion of a post-racial America. The Black Lives Matter movement has awakened a new generation of activists. In this stirring and insightful analysis, activist and scholar Keeanga-Yamahtta Taylor surveys the historical and contemporary ravages of racism and the persistence of structural inequality, such as mass incarceration and black unemployment. In this context, she argues that this new struggle against police violence holds the potential to reignite a broader push for black liberation. “This brilliant book is the best analysis we have of the #BlackLivesMatter moment of the long struggle for freedom in America. Keeanga-Yamahtta Taylor has emerged as the most sophisticated and courageous radical intellectual of her generation.” —Dr. Cornel West, author of *Race Matters* “A must read for everyone who is serious about the ongoing praxis of freedom.” —Barbara Ransby, author of *Ella Baker and the Black Freedom Movement* “[A] penetrating, vital analysis of race and class at this critical moment in America’s racial history.” —Gary Younge, author of *The Speech: The Story Behind Dr. Martin Luther King Jr.’s Dream*

Anthropologist Graeber presents a stunning reversal of this conventional wisdom. For more than 5000 years, humans have used elaborate credit systems to buy and sell goods. Since the beginning of the agrarian empires, humans have been divided into debtors and creditors. Through time, virtual credit money was replaced by gold and the system as a whole went into decline. This fascinating history is told for the first time. **First Course in Algebra Classroom Instruction that Works with English Language Learners** ASCD Language has always been the medium of instruction, but what happens when it becomes a barrier to learning? Why we need to defund the police and how we get there. Recent weeks have seen an explosion of protest against police brutality and repression. Among activists, journalists and politicians, the conversation about how to respond and improve policing has focused on accountability, diversity, training, and community relations. Unfortunately, these reforms will not produce results, either alone or in combination. The core of the problem must be addressed: the nature of modern policing itself. This book attempts to spark public discussion by revealing the tainted origins of modern policing as a tool of social control. It shows how the expansion of police authority is inconsistent with community empowerment, social justice— even public safety. Drawing on groundbreaking research from across the world, and covering virtually every area in the increasingly broad range of police work, Alex Vitale demonstrates how law enforcement has come to exacerbate the very problems it is supposed to solve. In contrast, there are places where the robust implementation of policing alternatives—such as legalization, restorative justice, and harm reduction—has led to a decrease in crime, spending, and injustice. The best solution to bad policing may be an end to policing. **Go as Communication The Educational and Therapeutic Value of the Game of Go** BoD - Books on Demand Go as Communication is the record of a surprising discovery, namely, that a simple game called First Capture Go can have enormous educational and therapeutic value. Yasutoshi Yasuda, the person responsible for this discovery, is a Japanese professional Go player. Concerned about social problems in Japanese schools, Yasuda began introducing a simplified version of Go to school children and discovered to his surprise that it had immediate positive effects. His experiences with school children encouraged Yasuda to expand his efforts to homes for the elderly and then to institutions for the mentally and physically handicapped. In every case, the game had a tremendous positive impact. The version of the game that is used in these programs is quite easy to learn, and it is easy to make playing equipment. The book provides thorough practical guidance for both teaching the game and creating playing sets. There really is no impediment for anyone who finds Yasuda’s program as appealing - and inspiring - as I and many other people do. The rewards are immediate and obvious. Scores of people around the world have introduced the capture game to thousands of people of all ages with very satisfying results. Yasuda’s program offers everyone an opportunity to make a positive difference. William Cobb **Handbook of Mathematical Functions With Formulas, Graphs, and Mathematical Tables** Courier Corporation An extensive summary of mathematical functions that occur in physical and engineering problems **The Purpose of Power How We Come Together When We Fall Apart** One World An essential guide to building transformative movements to address the challenges of our time, from one of the country’s leading organizers and a co-creator of Black Lives Matter “Excellent and provocative . . . a gateway [to] urgent debates.” —Keeanga-Yamahtta Taylor, *The New Yorker* **NAMED ONE OF THE BEST BOOK OF THE YEAR** BY Time • Marie Claire • Kirkus Reviews In 2013, Alicia Garza wrote what she called “a love letter to Black people” on Facebook, in the aftermath of the acquittal of the man who murdered seventeen-year-old Trayvon Martin. Garza wrote: Black people. I love you. I love you. I love you. With the speed and networking capacities of social media, #BlackLivesMatter became the hashtag heard ‘round the world. But Garza knew even then that hashtags don’t start movements—people do. Long before #BlackLivesMatter became a rallying cry for this generation, Garza had spent the better part of two decades learning and unlearning some hard lessons about organizing. The lessons she offers are different from the “rules for radicals” that animated earlier generations of activists, and diverge from the charismatic, patriarchal model of the American civil rights movement. She reflects instead on how making room amongst the woke for those who are still awakening can inspire and activate more people to fight for the world we all deserve. This is the story of one woman’s lessons through years of bringing people together to create change. Most of all, it is a new paradigm for change for a new generation of changemakers, from the mind and heart behind one of the most important movements of our time. **Nudge Improving Decisions About Health, Wealth, and Happiness** Penguin Now available: *Nudge: The Final Edition* The original edition of the multimillion-copy New York Times bestseller by the winner of the Nobel Prize in Economics, Richard H. Thaler, and Cass R. Sunstein: a revelatory look at how we make decisions—for fans of Malcolm Gladwell’s *Blink*, Charles Duhigg’s *The Power of Habit*, James Clear’s *Atomic Habits*, and Daniel Kahneman’s *Thinking, Fast and Slow* Named a Best Book of the Year by *The Economist* and the *Financial Times* Every day we make choices—about what to buy or eat, about financial investments or our children’s health and education, even about the causes we champion or the planet itself. Unfortunately, we often choose poorly. *Nudge* is about how we make these choices and how we can make better ones. Using dozens of eye-

opening examples and drawing on decades of behavioral science research, Nobel Prize winner Richard H. Thaler and Harvard Law School professor Cass R. Sunstein show that no choice is ever presented to us in a neutral way, and that we are all susceptible to biases that can lead us to make bad decisions. But by knowing how people think, we can use sensible “choice architecture” to nudge people toward the best decisions for ourselves, our families, and our society, without restricting our freedom of choice. **The Chaos Scenario** What happens when the old mass media/mass marketing model collapses and the Brave New World is unprepared to replace it?
