## DISPATCHES FROM TALIBAN COUNTRY

*Penguin "Raw, direct, and powerful...This work is vitally important."—Ken Stern, former CEO of National Public Radio As a captain in the Army National Guard, Benjamin Tupper spent a year in Afghanistan. Separated from most of his unit, Ben, along with his partner Corporal Radoslaw "Ski" Polanski, served in an Embedded Training Team, teaching, training, and leading into combat the green Afghan troops. But what they experienced went well beyond the assigned mission, and the war proved to be a mix of drudgery, absurdity, and ever-present dangers. Writing and recording from a remote outpost, Tupper began to share his stories with Americans back home. His boots-on-the-ground dispatches were broadcast on NPR's Morning Edition and published on Slate.com's military blog, The Sandbox. In Greetings from Afghanistan: Send More Ammo, Benjamin Tupper's chronicling of life under fire pulls the reader into the realities of war with poignancy, humor, and vivid reality, offering a unique and compelling firsthand view of the Afghan people, their culture, and a battle for survival that began long before the Americans arrived.*

## HOW TO DESTROY SURVEILLANCE CAPITALISM

---

*OneZero, Medium's official technology publication, is thrilled to announce a print-on-demand edition of How to Destroy Surveillance Capitalism by Cory Doctorow, with an exclusive new chapter. How to Destroy Surveillance Capitalism was first published online in August, where it was an instant hit with readers, scholars, and critics alike. For years now, we've been hearing about the ills of surveillance capitalism - the business of extracting, collecting, and selling vast reams of user data that has exploded with the rise of tech giants like Google, Facebook, and Amazon. But what if everything we've been hearing is wrong? What if surveillance capitalism is not some rogue capitalism or a wrong turn taken by some misguided corporations? What if the system is working exactly as intended - and the only hope of restoring an open web is to take the fight directly to the system itself? In Doctorow's timely and crucial new nonfiction work, the internationally bestselling author of Walkaway, Down and Out in the Magic Kingdom, and Little Brother, argues that if we're to have any hope of destroying surveillance capitalism, we're going to have to destroy the monopolies that currently comprise the commercial web as we know it. Only by breaking apart the tech giants that totally control our online experiences can we hope to return to a more open and free web - one where predatory data-harvesting is not a founding principle. Doctorow shows how, despite popular misconception, Facebook and Google do not possess any "mind-control rays" capable of brainwashing users into, say, voting for a presidential candidate or joining an extremist group - they have simply used their monopoly power to profit mightily off of people interested in doing those things and made it easy for them to find each other. Doctorow takes us on a whirlwind tour of the last 30 years of digital rights battles and the history of American monopoly - and where the two intersect. Through a deeply compelling and highly readable narrative, he makes the case for breaking up Google, Facebook, Amazon, and Apple as a means of ending surveillance capitalism.*

## COMMUNITY REHABILITATION IN NEUROLOGY

---

*Cambridge University Press Rehabilitation should not stop when the disabled person is discharged from hospital, and many neurological patients require ongoing rehabilitation in order to maximize their functional abilities, minimize complications and promote full participation at home and in the community. This book analyses community rehabilitation needs from many different perspectives, including the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation schemes are presented, with evidence for their effectiveness, and case studies are used to highlight the main issues. The authors take an international view, and there are chapters dealing with the disabled child in the community and with neuropsychological rehabilitation. This important book examines the growing trend towards community rehabilitation in neurology and is directed towards*

all clinicians involved with neurorehabilitation.

## **MANUAL OF PSYCHOSOCIAL REHABILITATION**

---

John Wiley & Sons Psychosocial Rehabilitation is a comprehensive ready-reference for mental health practitioners and students, providing practical advice on the full range of interventions for psychosocial rehabilitation. It contextualises the interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of process, impact and outcome. Section 3 provides manuals and programs for interventions effectively provided as group activities. Section 4 explains how to design a full programme that integrates therapeutic interventions with group programmes as well as services provided by other agencies. The final section looks at peer support and self help, providing manuals and resources that support programmes and interventions not requiring professional or practitioner direction.

### **INTERVALS IN THE PHILOSOPHY OF ARCHITECTURE**

---

McGill-Queen's Press - MQUP Different concepts of the machine are pursued in essays on Fritz Lang's Metropolis, Alfred Jarry's pataphysical machines, and cosmological and political orders in sixteenth-century utopias. Cross-cultural tensions are examined in essays on the Christian appropriation of Aztec symbolism, and on Jesuit perspectives in an imperial Chinese garden in Beijing. Architectural origins and education are revisited in essays on fire and language in Vitruvius, on storytelling by Spanish theorist Juan Caramuel de Lobkowitz, and on the role of history in the design of the Prato della Valle, a public square in Padua. Phenomenal experience is the focus of essays on light and stone in the Gothic church of Saint-Denis, and on bodily movement through the ancient Palace of Minos at Knossos in Crete. Tensions in architectural representation are investigated in essays on the influence of Villard de Honnecourt on drawings by William Burges in Victorian England, and on Stendhal's curious narrative drawings in his book Vie de Henry Brulard. Contemporary beliefs are scrutinized in an essay that uses psychoanalytic theory to examine the modern concept of sustainability.

## **BIOMETRIC SYSTEM AND DATA ANALYSIS**

---

### **DESIGN, EVALUATION, AND DATA MINING**

---

Springer Science & Business Media This book brings together aspects of statistics and machine learning to provide a comprehensive guide to evaluating, interpreting and understanding biometric data. It naturally leads to topics including data mining and prediction to be examined in detail. The book places an emphasis on the various performance measures available for biometric systems, what they mean, and when they should and should not be applied. The evaluation techniques are presented rigorously, however they are always accompanied by intuitive explanations. This is important for the increased acceptance of biometrics among non-technical decision makers, and ultimately the general public.

## **ANALYSIS, CONTROLLABILITY AND OPTIMIZATION OF TIME-DISCRETE SYSTEMS AND DYNAMICAL GAMES**

---

Springer Science & Business Media J. P. La Salle has developed in [20] a stability theory for systems of difference equations (see also [8]) which we introduce in the first chapter within the framework of metric spaces. The stability theory for such systems can also be found in [13] in a slightly modified form. We start with autonomous systems in the first section of chapter 1. After theoretical preparations we examine the localization of limit sets with the aid of Lyapunov Functions. Applying these Lyapunov Functions we can develop a stability theory for autonomous systems. If we linearize a non-linear system at a fixed point we are able to develop a stability theory for fixed points which makes use of the Frechet derivative at the fixed point. The next subsection deals with general linear systems for which we introduce a new concept of stability and asymptotic stability that we adopt from [18]. Applications to various fields illustrate these results. We start with the classical predator-prey-model as being developed and investigated by Volterra which is based on a 2 x 2-system of first order differential equations for the densities of the prey and predator population, respectively. This model has also been investigated in [13] with respect to stability of its equilibrium via a Lyapunov function. Here we consider the discrete version of the model.

## **ACCESS WITH ATTITUDE**

---

---

## **AN ADVOCATE'S GUIDE TO FREEDOM OF INFORMATION IN OHIO**

---

Ohio University Press For those who find themselves in a battle for public records, Access with Attitude: An Advocate's Guide to Freedom of Information in Ohio is an indispensable weapon. First Amendment lawyer David Marburger and investigative journalist Karl Iidsvoog have written a simply worded, practical guide on how to take full advantage of Ohio's so-called Sunshine Laws. Journalists, law firms, labor unions, private investigators, genealogists, realty companies, banks, insurers—anyone who regularly needs access to publicly held information—will find this comprehensive and contentious guide to be invaluable. Marburger, who drafted many of the provisions that Ohio adopted in its open records law, and coauthor Iidsvoog have been fighting for broader access to public records their entire careers. They offer field-tested tips on how to avoid “no,” and advise readers on legal strategies if their requests for information go unmet. Step by step, they show how to avoid delays and make the law work. Whether you're a citizen, a nonprofit

organization, journalist, or attorney going after public records, *Access with Attitude* is an essential resource.

## **SURVEYING FOR CONSTRUCTION**

---

*Surveying for Construction 5e* is an essential textbook for students of engineering new to surveying, and will also appeal to students of building and environmental studies and archaeology. Offering a strong grounding in land and construction surveying, the authors clearly and comprehensively guide the reader through the principles, methods and equipment used in modern-day surveying. Taking into account recent advances in the field, the material has been fully updated and revised throughout including new and up-to-date coverage of levelling, total stations, detail surveys, and EDM. A new chapter on GPS technology has been added. In keeping with the practical nature of the book, there are chapters on setting out construction works and surveying existing buildings, which guide the reader step-by-step through the fundamental procedures. The clear and methodical nature of the explanations, supported by a wide range of exercises and examples, make *Surveying for Construction 5e* an invaluable and modern introduction to surveying. Key features include:
 

- Fully updated coverage and new material throughout, including a new chapter on GPS
- New Learning Objectives and Chapter Summaries which guide the student through the learning process and highlight the key principles and methods for each chapter
- Numerous diagrams and figures which give students a clear and detailed understanding of equipment and procedures
- Extensive boxed examples and exercises that guide students through real-world surveying methods and calculations
- Website material: online material for creating your own surveying project allows students to practice the methods and techniques they have learnt

## **BLACK BOY WHITE SCHOOL**

---

Harper Collins In a hard-hitting novel about fitting in—or not—Anthony “Ant” Jones gets transported from his East Cleveland hood to an almost all-white prep school and has to figure out where he belongs...before he loses himself entirely. *Black Boy White School* is a memorable debut that will appeal to fans of Walter Dean Myers and Sherman Alexie. Anthony has never been outside his rough neighborhood when he receives a scholarship to Belton Academy, an elite prep school in Maine. But at Belton things are far from perfect. Everyone calls him “Tony,” assumes he’s from Brooklyn, expects him to play basketball, and yet acts shocked when he fights back. As Anthony tries to adapt to a world that will never fully accept him, he’s in for a rude awakening: Home is becoming a place where he no longer belongs. In debut author Brian F. Walker’s honest and dynamic novel about staying true to yourself, Anthony might find a way to survive at Belton, but what will it cost him?

### **A HOW-TO GUIDE FOR DUDES WHO WANT TO GET FIT, KICK ASS, AND TAKE NAMES**

---

Harper Collins John Joseph wants men to know, in no uncertain terms, that they don’t need to eat steak, burgers, wings, ribs, or any other animal product, for that matter, to be strong—in fact, he would argue, eating animals is for the weak. Because when your protein sources come from animals, you’re missing out on all of the nutritional benefits of a plant-based diet—a diet that can make you more fit, more sexy, and more manly. In *Meat is for Pussies*, Joseph presents a throw-down of information, offering both personal and scientific evidence that a plant-based diet offers the best path to athleticism, endurance, strength, and overall health. In addition to handily dispelling the myths surrounding meat, Joseph offers workout advice, a meal plan, and recipes that make going plant-based easy. Flavor and vitamin-packed options like the Working Man Stew and Veggie Chili with Cornbread will keep men’s (and women’s) bodies healthy and energized, while workouts that emphasize cardio and strength training build endurance and stamina and prove that you don’t need meat to build muscle. Joseph also offers living proof that living a plant-based lifestyle is badass, from super-athlete Brendan Brazier to MMA champion Jake Shields to Joseph himself, who is an Ironman Triathlete and still rocking out (at the age of fifty-two) on world tours as the frontman for his legendary band the Cro-Mags. Joseph’s passion for educating the world about the benefits of a plant-based diet comes through on each page, in a voice and a vocabulary that is uniquely his own. At the end of the day, he wants readers to live a long, healthy, happy life . . . and he won’t take no for an answer.
