The Encyclopedia of Herbs

A Comprehensive Reference to Herbs of Flavor and Fragrance

Timber Press This meticulously researched compendium provides every aspect of growing, identifying, harvesting, preserving, and using more than 500 species of herbs. Thorough profiles provide a plant's botanical name and family, whether it is an annual or perennial, its height, hardiness, light requirements, water consumption, required soil type, and pH. The often fascinating history of the plant, the chemistry of its essential oils, and its culinary, landscape, and craft uses are also included, as is advice on how to propagate. For the first edition of their work, both authors received The Gertrude B. Foster Award for Excellence in Herbal Literature from the Herb Society of America. This new edition adds important species and includes updated nomenclature.

Urban Socio-Economic Segregation and Income Inequality

A Global Perspective

Springer Nature This open access book investigates the link between income inequality and socio-economic residential segregation in 24 large urban regions in Africa, Asia, Australia, Europe, North America, and South America. It offers a unique global overview of segregation trends based on case studies by local author teams. The book shows important global trends in segregation, and proposes a Global Segregation Thesis. Rising inequalities lead to rising levels of socio-economic segregation almost everywhere in the world. Levels of inequality and segregation are higher in cities in lower income countries, but the growth in inequality and segregation is faster in cities in high-income countries. This is causing convergence of segregation trends. Professionalisation of the workforce is leading to changing residential patterns. High-income workers are moving to city centres or to attractive coastal areas and gated communities, while poverty is increasingly suburbanising. As a result, the urban geography of inequality changes faster and is more pronounced than changes in segregation levels. Rising levels of inequality and segregation pose huge challenges for the future social sustainability of cities, as cities are no longer places of opportunities for all.

Musculoskeletal Health in Pregnancy and Postpartum

An Evidence-Based Guide for Clinicians

Springer Providing clinicians with a comprehensive, evidence-based summary of musculoskeletal health in pregnancy and postpartum, this is the first book of its kind to describe the physiologic changes, prevalence, etiology, diagnostic strategies, and effective treatments for the most common musculoskeletal clinical conditions encountered during this phase of life. Lumbopelvic pain, upper and lower extremity diagnoses, labor and delivery considerations, including the impact on the pelvic floor, and medical therapeutics will be discussed. Additionally, the importance and influence of exercise in pregnancy, the long-term implications of musculoskeletal health in pregnancy and current and future directions for research will be addressed. The childbearing period is a time of remarkable reproductive and musculoskeletal change, predisposing women to potential injury, pain, and resultant disability. Musculoskeletal Health in Pregnancy and Postpartum offers musculoskeletal medicine specialists, obstetricians and any clinicians involved in the care of pregnant or postpartum women the tools necessary to prepare for, treat and prevent these concurrent injuries during an already challenging time.

Synthetic Worlds

Nature, Art and the Chemical Industry

Reaktion Books This revealing study considers the remarkable alliance between chemistry and art from the late eighteenth century to the period immediately following the Second World War. Synthetic Worlds offers fascinating new insights into the place of the material object and the significance of the natural, the organic, and the inorganic in Western aesthetics. Esther Leslie considers how radical innovations in chemistry confounded earlier alchemical and Romantic philosophies of science and nature while profoundly influencing the theories that developed in their wake. She also explores how advances in chemical engineering provided visual artists with new colors, surfaces, coatings, and textures, thus dramatically recasting the way painters approached their work. Ranging from Goethe to Hegel, Blake to the Bauhaus, Synthetic Worlds ultimately considers the astonishing affinities between chemistry and aesthetics more generally. As in science, progress in the arts is always assured, because the impulse to discover is as immutable and timeless as the drive to create.

The Leisure Commons

A Spatial History of Web 2.0

Routledge There is much excitement about Web 2.0 as an unprecedented, novel, community-building space for experiencing, producing, and consuming leisure, particularly through social network sites. What is needed is a perspective that is invested in neither a utopian or dystopian posture but sees historical continuity to this cyberleisure geography. This book investigates the digital public sphere by drawing parallels to another leisure space that shares its rhetoric of being open, democratic, and free for all: the urban park. It makes the case that the history and politics of public parks as an urban

commons provides fresh insight into contemporary debates on corporatization, democratization and privatization of the digital commons. This book takes the reader on a metaphorical journey through multiple forms of public parks such as Protest Parks, Walled Gardens, Corporate Parks, Fantasy Parks, and Global Parks, addressing issues such as virtual activism, online privacy/surveillance, digital labor, branding, and globalization of digital networks. Ranging from the 19th century British factory garden to Tokyo Disneyland, this book offers numerous spatial metaphors to bring to life aspects of new media spaces. Readers looking for an interdisciplinary, historical and spatial approach to staid Web 2.0 discourses will undoubtedly benefit from this text.

Radiotherapy of Intraocular and Orbital Tumors

Springer Science & Business Media Radiotherapy of Intraocular and Orbital Tumors presents a new approach to the role of radiation therapy in the management of ophthalmic cancer. The indications for ultrasonography, computed tomography, and magnetic resonance imaging studies are analyzed, and treatment techniques, together with their results, are described for each tumor. Particle beam and plaque irradiation are reviewed, and conservative and surgical management of radiation effects are detailed. In the past, most books on this subject included a chapter on radiotherapy but emphasized the dangers of radiation complications. However, great progress in understanding the effects of irradiation upon the tissues of the eye and orbit, new therapeutic equipment, and new imaging techniques (CT, MRI) allow for careful treatment planning. This book has taken the long overdue step of reconsidering the role of irradiation of the eye so that it may take its place as a respected, rather than feared, treatment in the combined modality approach so important today. Together with experts in relevant fields, the editors have produced a refreshingly clear and thoroughly referenced volume which will be a valuable asset to all ophthalmologists, radiation oncologists, pediatricians, endocrinologists, oncologists, and residents in training, as well as to students in these disciplines.

This document is also intended as a comprehensive reference manual to assist in administrative, planning, and educational efforts pertaining to design formulation

Socio-Economic Segregation in European Capital Cities

East Meets West

Routledge Growing inequalities in Europe are a major challenge threatening the sustainability of urban communities and the competitiveness of European cities. While the levels of socio-economic segregation in European cities are still modest compared to some parts of the world, the poor are increasingly concentrating spatially within capital cities across Europe. An overlooked area of research, this book offers a systematic and representative account of the spatial dimension of rising inequalities in Europe. This book provides rigorous comparative evidence on socio-economic segregation from 13 European cities. Cities include Amsterdam, Athens, Budapest, London, Milan, Madrid, Oslo, Prague, Riga, Stockholm, Tallinn, Vienna and Vilnius. Comparing 2001 and 2011, this multi-factor approach links segregation to four underlying universal structural factors: social inequalities, global city status, welfare regimes and housing systems. Hypothetical segregation levels derived from those factors are compared to actual segregation levels in all cities. Each chapter provides an in-depth and context sensitive discussion of the unique features shaping inequalities and segregation in the case study cities. The main conclusion of the book is that the spatial gap between the poor and the rich is widening in capital cities across Europe, which threatens to harm the social stability of European cities. This book will be a key reference on increasing segregation and will provide valuable insights to students, researchers and policy makers who are interested in the spatial dimension of social inequality in European cities. A PDF version of the introduction and conclusion are available Open Access at www.tandfebooks.com. It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license.

The Hidden Epidemic of Eating Disorders in Adult Women

Harper Collins A girl with an eating disorder grows up. And then what? In this groundbreaking book, science journalist Trisha Gura explodes the myth that those who suffer from eating disorders, including anorexia nervosa and bulimia nervosa, are primarily teenage girls. In truth, twenty-five to thirty million American women twenty-five and older suffer from serious food issues, from obsessions with calorie counting to compulsions to starve then overeat. These diseases often linger from adolescence or emerge anew in the lives of adult women in ways that we are only now starting to recognize. Drawing on her own experience with anorexia, as well as the most up-to-date research and extensive interviews with clinicians and sufferers, Gura presents a startling, timely, and imperative investigation of eating disorders "all grown up," and offers hope through understanding.

The Five Senses

A Philosophy of Mingled Bodies

Bloomsbury Publishing Marginalized by the scientific age the lessons of the senses have been overtaken by the dominance of language and the information revolution. With *The Five Senses* Serres traces a topology of human perception, writing against the Cartesian tradition and in praise of empiricism, he demonstrates repeatedly, and lyrically, the sterility of systems of knowledge divorced from bodily experience. The fragile empirical world, long resistant to our attempts to contain and catalog it, is disappearing beneath the relentless accumulations of late capitalist society and information technology. Data has replaced sensory pleasure, we are less interested in the taste of a fine wine than in the description on the bottle's label. What are we, and what do we really know, when we have forgotten that our senses can describe a taste more accurately than language ever could? The book won the inaugural Prix Médicis Essai in 1985. The Revelations edition includes an introduction by Steven Connor.

Roadside Design Guide

Furniture Design

Springer Maximizing reader insights into the principles of designing furniture as wooden structures, this book discusses issues related to the history of furniture structures, their classification and characteristics, ergonomic approaches to anthropometric requirements and safety of use. It presents key methods and highlights common errors in designing the characteristics of the materials, components, joints and structures, as well as looking at the challenges regarding developing associated design documentation. Including analysis of how designers may go about calculating the stiffness and endurance of parts, joints and whole structures, the book analyzes questions regarding the loss of furniture stability and the resulting threats to health of the user, putting forward a concept of furniture design as an engineering processes. Creating an attractive, functional, ergonomic and safe piece of furniture is not only the fruit of the work of individual architects and artists, but requires an effort of many people working in interdisciplinary teams, this book is designed to add important knowledge to the literature for engineer approaches in furniture design.

Cruelty and Utopia

Cities and Landscapes of Latin America

Princeton Architectural Press This landmark collection of illustrated essays explores the vastly underappreciated history of America's other cities -- the great metropolises found south of our borders in Central and South America. Buenos Aires, So Paulo, Mexico City, Caracas, Havana, Santiago, Rio, Tijuana, and Quito are just some of the subjects of this diverse collection. How have desires to create modern societies shaped these cities, leading to both architectural masterworks (by the likes of Luis Barragn, Juan O'Gorman, Lcio Costa, Roberto Burle Marx, Carlos Ral Villanueva, and Lina Bo Bardi) and the most shocking favelas? How have they grappled with concepts of national identity, their colonial history, and the continued demands of a globalized economy? Lavishly illustrated, *Cruelty and Utopia* features the work of such leading scholars as Carlos Fuentes, Edward Burian, Lauro Cavalcanti, Fernando Oayrzn, Roberto Segre, and Eduardo Subirats, along with artwork ranging from colonial paintings to stills from Chantal Akerman's film *From the Other Side*. Also included is a revised translation of Spanish King Philip II's influential planning treatise of 1573, the "Laws of the Indies," which did so much to define the form of the Latin American city.

Shopping and Crime

Astro-Imaging Projects for Amateur Astronomers

A Maker's Guide

Springer *This is the must-have guide for all amateur astronomers who double as makers, doers, tinkerers, problem-solvers, and inventors. In a world where an amateur astronomy habit can easily run into the many thousands of dollars, it is still possible for practitioners to get high-quality results and equipment on a budget by utilizing DIY techniques. Surprisingly, it's not that hard to modify existing equipment to get new and improved usability from older or outdated technology, creating an end result that can outshine the pricey higher-end tools. All it takes is some elbow grease, a creative and open mind and the help of Chung's hard-won knowledge on building and modifying telescopes and cameras. With this book, it is possible for readers to improve their craft, making their equipment more user friendly. The tools are at hand, and the advice on how to do it is here. Readers will discover a comprehensive presentation of astronomical projects that any amateur on any budget can replicate - projects that utilize leading edge technology and techniques sure to invigorate the experts and elevate the less experienced. As the "maker" community continues to expand, it has wonderful things to offer amateur astronomers with a willingness to get their hands dirty. Tweaking observing and imaging equipment so that it serves a custom purpose can take your observing options to the next level, while being fun to boot.*

Twelve Years a Slave

Prabhat Prakashan *"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt*

The Making of Citizen Kane, Revised Edition

Univ of California Press *Citizen Kane, widely considered the greatest film ever made, continues to fascinate critics and historians as well as filmgoers. While credit for its genius has traditionally been attributed solely to its director, Orson Welles, Carringer's pioneering study documents the shared creative achievements of Welles and his principal collaborators. The Making of Citizen Kane, copiously illustrated with rare photographs and production documents, also provides an in-depth view of the operations of the Hollywood studio system. This new edition includes a revised preface and overview of criticism, an updated chronology of the film's reception history, a reconsideration of the locus of responsibility of Welles's ill-fated The Magnificent Ambersons, and new photographs.*

Cinema's Doppelgänger

Cinema's Doppelgänger is a counterfactual history of the cinema - or, perhaps, a work of speculative fiction in the guise of a scholarly history of film and movie guide. That is, it's a history of the movies written from an alternative unfolding of historical time - a world in which neither the Bolsheviks nor the Nazis came to power, and thus a world in which Sergei Eisenstein never made movies and German filmmakers like Fritz Lang never fled to Hollywood, a world in which the talkies were invented in 1936 rather than 1927, in which the French New Wave critics didn't become filmmakers, and in which Hitchcock never came to Hollywood. The book attempts, on the one hand, to explore and expand upon the intrinsically creative nature of all historical writing; like all works of fiction, its ultimate goal is to be a work of art in and of itself. But it also aims, on the other hand, to be a legitimate examination of the relationship between the economic and political organization of nations and film industries and the resulting aesthetics of film and thus of the dominant ideas and values of film scholarship and criticism. Doug Dibbern's first book, *Hollywood Riots: Violent Crowds and Progressive Politics in American Film*, won the 2016 Peter Rollins Prize. He has published scholarly essays on classical Hollywood filmmakers, film criticism for *The Notebook* at Mubi.com, and literary essays for journals like *Chicago Quarterly Review* and *Hotel Amerika*. He has a Ph.D. in Cinema Studies from New York University, where he teaches now in the Expository Writing Program.

Green Infrastructure Implementation

"*Green Infrastructure Implementation* provides actionable information that promotes the implementation of green infrastructure. Unlike most publications, which focus on technical design of individual green elements, this book tackles topics that relate directly to the ability to implement green infrastructure. The collection of programmatic and planning topics is unique in current literature, and covers a range of issues from stormwater to public education. *Green Infrastructure Implementation* identifies obstacles and provides guidance in possible approaches to overcoming them at the programmatic level. It also provides clear and actionable suggestions as to the selection and planning of green infrastructure at different scales and identifies considerations for implementation based on type of practice and specific geographic considerations. Each topic details an assessment of barriers and potential challenges and includes case studies that show how they can be addressed"--Provided by publisher.
