Nothing Is Too Big to Fail

How the Last Financial Crisis Informs Today

Rosetta Books No institution, government, or country is "too big to fail." A behind-the-scenes account of what led to the 2008 crisis—and may soon lead to a bigger one. Written by two bank executives with firsthand experience of several financial crises, Nothing is Too Big to Fail holds a stiff warning about the future of finance and social justice—revealing how the US government's fiscal and monetary policies are creating asset and debt bubbles that could burst at any time. The COVID-19 pandemic is just one of many risks that could derail our highly leveraged and fragile economic system. The authors also tell how government actions and an unregulated shadow banking system are leading to inequitable distribution of wealth, destroying the middle class, reducing trust in government, and accelerating racial injustice. No institution, government, or country is "too big to fail." This book offers lessons learned from past crises and recommended actions for business and government leaders to take today to return our economic system and our democracy to a safer trajectory.

NCUA Examiner's Guide

Republic of Armenia

Detailed Assessment of Observance of the Basel Core Principles for Effective Banking Supervision

International Monetary Fund This detailed assessment of observance has been conducted against the standard issued by the Basel Committee on Banking Supervision in 2012. The report also highlights that the Central Bank of Armenia has made significant progress in its approach to banking supervision with adoption of the risk-based program (RBS) framework and addressing gaps in the regulatory framework identified in the 2012 Basel Core Principles assessment. Improvements have been made in the regulatory regime regarding requirements for risk management, stress testing, corporate governance, country risk and consolidated supervision. Although the supervisory regime has recently transitioned from a rules-based to an RBS, there is a need for continued refinement of the program for more granular assessments of firms' capital needs. The process for conducting risk assessments of each firm has identified a need for building a stronger and more structured (system-wide) understanding of the level and magnitude of risk and the risk management capabilities across banking firms.
