### International GAAP 2017

### Generally Accepted Accounting Practice under International Financial Reporting Standards

**John Wiley & Sons** IFRSs, the standards set by the International Accounting Standards Board (IASB), are complex and sometimes obscure. Understanding their implications and applying them appropriately requires something special; and that is why International GAAP® 2017 is the essential tool for anyone applying, auditing, interpreting, regulating, studying and teaching international financial reporting. It provides expert interpretation and practical guidance for busy professionals, and includes, in every chapter, detailed analysis of how complex financial reporting problems can be resolved appropriately and effectively. The International Financial Reporting Group of Ernst & Young includes financial reporting specialists from throughout the world. Complex technical accounting issues are explained clearly in a practical working context that enables immediate understanding of the point at issue. International GAAP® 2017 is the only globally focused work on IFRSs. It is not constrained by any individual country's legislation or financial reporting regulations, and it ensures an international consistency of approach unavailable elsewhere. It shows how difficult practical issues should be approached in the complex, global world of international financial reporting, where IFRSs have become the accepted financial reporting system in more than 100 countries. This integrated approach

provides a unique level of authoritative material for anyone involved in preparing, interpreting or auditing company accounts, for regulators, academic researchers and for all students of accountancy. All aspects of the detailed requirements of IFRS are dealt with on a topic-by-topic basis. Each chapter of International GAAP® 2017 deals with a key area of IFRS and has a common structure for ease of use: an introduction to the background issues; an explanation of relevant principles; a clear exposition of the requirements of IFRS; a discussion of the implications in practice and possible alternative solutions available; worked examples; extracts from real company accounts; a full listing of the required disclosures. "... an important part to play in the process of promoting consistent, comparable and high quality financial reporting under IFRSs ... a book that not only provides an analysis of the requirements of the standards and the principles that they expound, but also presents a unique explanation of how the standards should be interpreted and applied in practice." - the Chairman of Trustees of the IASC Foundation "A standard reference work" - Financial Times "The definitive guide to financial reporting" - The Times

### Controlling Collaboration between Firms

### How to build and Maintain Successful Relationships with External Partners

**Butterworth-Heinemann** Shows how accounting information and control mechanisms are used in decision-making, planning and control at an inter-organizational level and how accounting tools and techniques may support the development and management of external relationships with strategic partners. In "global companies" the use of management control mechanisms has increasingly become decentralised from the management accounting department, this book covers these issues. In all functional areas (marketing, operations, human resources, etc.), those who are expected to be able to analyse and interpret accounting information collected from external partners, have to exercise cost control to ensure

that profit targets are achieved and understand. • to understand the nature of collaborative partnerships and illustrate the variables that explain the choice of different control modes in the various contexts of cooperation; • to describe the characteristics of management accounting mechanisms for cross-boundary settings, such as collaborative programmes and budgets, inter-firm performance measurement systems and inter-organisational cost management techniques; • to describe empirical evidence on control choices, management accounting practices and on management accountants' roles in collaborative relationships; • to present a framework of control patterns and specific Accounting Information Network (AIN) configurations that provide some novel theoretical insights on inter-organisational accounting and control and some guidance to practitioners operating in inter-firm collaborative settings.
