Technology Forecast

The Intellegent Real-Time Enterprise

Technology Forecast: 20032005 is the latest in a series that the PricewaterhouseCoopers Global Technology Centre has published annually for more than a dozen years. This years book provides in-depth coverage of enterprise applications and enabling software and forecasts significant developments in those areas over the next three years. It also contains information of particular interest to senior executives, including CFO Perspectives for each of the chapters and a chapter on business reporting and XBRL. As the pace of business quickens, companies must eliminate information lag and make more timely decisions. Business intelligence technologiesbusiness activity monitoring, event notification, and digital dashboardsprovide executives with real-time information about the status of key business processes, including their relations with customers and suppliers. New business integration technologies, including increased use of XML-based Web services, are making end-to-end automation of business processes easier to accomplish. Meanwhile, the incorporation of analytic capabilities into virtually all enterprise applications, as well as advances in knowledge management and collaborative technologies, increase the speed and effectiveness of decision-making. Technology

Forecast: 2003-2005 discusses these and other changes under way in enterprise IT. It is divided into three sections, each highlighting a different area of enterprise software, that together comprise ten chapters providing detailed coverage of specific technologies and applications: Enterprise Applications contains chapters on enterprise suites, including enterprise suite architectures, supply chain event and performance management, and enterprise resource planning; customer-facing applications; and business intelligence and enterprise analytics, including real-time business intelligence and business activity monitoring. Information Management comprises chapters on enterprise content management; knowledge management and e-learning; and collaborative technologies. Enabling Software includes chapters on XML and Web services; component frameworks, including J2EE and Microsoft .Net; application and portal servers; and business integration technologies, including business process modeling, monitoring, and management. In addition, the book features interviews with three leading figures in IT: Vivek Ranadivé Founder, chairman and CEO of TIBCO Software. A recognized industry leader, Ranadivé was selected by InfoWorld as one of the top ten technology innovators in 2002. He was also recognized by Ernst & Young as a 2002 software entrepreneur of the year. His book The Power of Now: How Winning Companies Sense and Respond to Change Using Real-Time Technology (McGraw-Hill, 1999) has been widely used as a business school textbook. Tony Scott CTO for General Motors Information Systems and Services organization, where he is responsible for defining the enterprise architecture and standards across all of GM's global business. His work at GM has included the development of its employee portal and wireless strategy, and he directs the company's involvement in IT standards bodies and technology consortium organizations. Ronald Weissman A venture partner with Apax Partners, a leading international private equity and venture capital firm with offices throughout Europe, the United States, Israel, and Japan. Apax manages more than \$12 billion on behalf of major institutional investors in the United States and abroad. His focus is on U.S. and international opportunities in enterprise and infrastructure software and on Apax portfolio company development.

Accountant's Guide to the Internet

John Wiley & Sons Incorporated *The second edition includes new and expanded chapters that show accountants, auditors and finance professionals how to cut down on their research time and increase billable hours. Written by a CPA in a language all accountants can understand it aims to enable the reader to cheaply and effectively market professional services electronically.*

The New Knowledge Workers

Edward Elgar Publishing *'The knowledge worker is a welcome addition to the ethnographic investigation of high-tech work. The author's thoughtful comparative approach, contrasting the oft-studied American knowledge workers with their less familiar Polish counterparts, offers a refreshing take on the post industrial workplace and demonstrates once again the profound changes that high-tech work has made in the nature of work, the worker and the workplace, far beyond Silicon Valley.'* Gideon Kunda, Tel Aviv University, Israel *'The body of research addressing knowledge-intensive and creative work is massive and is quickly growing, but Dariusz Jemielniak manages to bring some new issues and perspectives to the table in his carefully designed study of the Polish and American computer programming community, making concepts such as time, trust, and motivation constitutive elements of contemporary knowledge work. Being able to bring together ethnographic research and organization theory and social science more broadly, The New Knowledge Workers is a significant contribution to the understanding of contemporary working life in the so-called "knowledge society".'* Alexander Styhre, University of Gothenburg, Sweden *'Jemielniak's book combines detailed comparative ethnographic observations with organizational analysis to highlight how little we actually know about the operations of knowledge-intensive organizations. Arguing that ancient commonplaces about a "greener", more egalitarian, post-Taylorist future rely on ignoring real-time observations of real people in context, Jemielniak's portrait of the knowledge society of the 21st century shows it to be more like the Fordist society of the 20th century than the utopia so many futurists choose to imagine. His book tells us it is time to begin observing again if we wish to "know" rather than "believe" what the future holds for us.'* Davydd J. Greenwood, Cornell University, US *This critical ethnographic study of knowledge workers and knowledge-intensive organization workplaces focuses on the issues of timing and schedules, the perception of formality and trust and distrust in software development as well as motivation and occupational identity*

among software engineers. The book is a cross-cultural, comparative study of American and European high-tech workplaces that addresses the issues currently of interest to both Academia and to practice and provides a rare international comparison of organizations from both sides of the Atlantic. Its conclusions shed new light on the problems typical for software projects. The book specifically focuses on, and gives voice to, the perspectives of knowledge workers rather than managers and will thus be useful to not only scholars and human resource managers from software companies, but also to high-tech professionals. Scholars and professionals in organization studies, management, HRM, innovation and knowledge management will find this book engaging and enlightening.

STTS: Think Smart, Work Smarter

A practical guide to solving problems faster, making better decisions and improving your effectiveness through thinking smarter

Marshall Cavendish International Asia Pte Ltd Your mind produces up to 70,000 thoughts a day—most of which are responsible for the decisions that you make. These decisions also determine your success both professionally and personally. However, we are taught what to think and not how to think. Information overload, short time frames and past failures can make even simple decisions and problems daunting. Do you lack confidence in your problem solving ability? Do you feel anxious when faced with a tough decision, or overwhelmed by lots of alternatives? Do you wish there was a formula for getting everything right? Executive coach and educator, Tremaine du Preez, fills this book with practical tools and effective techniques, all presented in a clear and practical manner. Making the right decision will be a breeze and no problem will be too difficult to handle when you are armed with these new and proven strategies.

Creativity and Advertising

Affect, Events and Process

Routledge Creativity and Advertising develops novel ways to theorise advertising and creativity. Arguing that combinatory accounts of advertising based on representation, textualism and reductionism are of limited value, Andrew McStay suggests that advertising and creativity are better recognised in terms of the 'event'. Drawing on a diverse set of philosophical influences including Scotus, Spinoza, Vico, Kant, Schiller, James, Dewey, Schopenhauer, Whitehead, Bataille, Heidegger and Deleuze, the book posits a sensational, process-based, transgressive, lived and embodied approach to thinking about media, aesthetics, creativity and our interaction with advertising. Elaborating an affective account of creativity, McStay assesses creative advertising from Coke, Evian, Google, Sony, Uniqlo and Volkswagen among others, and articulates the ways in which award-winning creative advertising may increasingly be read in terms of co-production, playfulness, ecological conceptions of media, improvisation, and immersion in fields and processes of corporeal affect. Philosophically wide-ranging yet grounded in robust understanding of industry practices, the book will also be of use to scholars with an interest in aesthetics, art, design, media, performance, philosophy and those with a general interest in creativity. Andrew McStay lectures at Bangor University and is author of Digital Advertising, and The Mood of Information: A Critique of Online Behavioural Advertising and Deconstructing Privacy, the latter forthcoming in 2014.

Our research effort includes an exhaustive study of new technologies and discussions with experts at dozens of innovative tech companies. Purchasers of the printed book or PDF version may receive a free CD-ROM database of the corporate profiles, enabling export of vital corporate data for mail merge and other uses.

Keywords in Remix Studies

Routledge Keywords in Remix Studies consists of twenty-four chapters authored by researchers who share interests in remix studies and remix culture throughout the arts and humanities. The essays reflect on the critical, historical and theoretical lineage of remix to the technological production that makes contemporary forms of communication and creativity possible. Remix enjoys international attention as it continues to become a paradigm of reference across many disciplines, due in part to its interdisciplinary nature as an unexpectedly fragmented approach and method useful in various fields to expand specific research interests. The focus on a specific keyword for each essay enables contributors to expose culture and society's inconclusive relation with the creative process, and questions assumptions about authorship, plagiarism and originality. Keywords in Remix Studies is a resource for scholars, including researchers, practitioners, lecturers and students, interested in some or all aspects of remix studies. It can be a reference manual and introductory resource, as well as a teaching tool across the humanities and social sciences.

Information Systems and Technology for the Noninformation Systems Executive

An Integrated Resource Management Guide for the 21st Century

CRC Press *Thirty years ago, computers seemed more science fiction than business fact. Today we have e-commerce, e-marketing, computerized scheduling, manufacturing, and a whole new field called information technology. Computers now have applications for every facet of your business. Information Systems and Technology for the Non-Information Systems Executive explores the practical and efficient use of computer technology-both software and hardware-for all types of business applications. In a simple and reader friendly style Shim presents information on data bases, networking, and telecommunications. He explains popular accounting, tax, finance, management, manufacturing, and marketing software-making them easy to understand and use. In addition, he provides real-life examples that illustrate the applications of decision support systems, executive information systems, and artificial intelligence systems such as financial modeling, budgeting, strategic planning and control, forecasting, data analysis, inventory planning, and optimization software. You do not need to know programming to understand your information systems. Written for business managers and entrepreneurs who may not have extensive computer experience, Information Systems and Technology for the Non-Information Systems Executive: An Integrated Resource Management Guide for the 21st Century covers information systems in all phases and functional areas of business to help you make the best decisions. It provides a wealth of current and essential information for managers and executives of all types of organizations. Your success depends on keeping abreast of the latest applications and thinking in information technology. This book gives you the competitive edge.*

The Dark Side of Creativity

Cambridge University Press *With few exceptions, scholarship on creativity has focused on its positive aspects while largely ignoring its dark side. This includes not only creativity deliberately aimed at hurting others, such as crime or terrorism, or at gaining unfair advantages, but also the accidental negative side effects of well-intentioned acts. This book brings together essays written by experts from various fields (psychology, criminal justice, sociology, engineering, education, history, and design) and with different interests (personality development, mental health, deviant behavior, law enforcement, and counter-terrorism) to illustrate the nature of negative creativity, examine its variants, call attention to its dangers, and draw conclusions about how to prevent it or protect society from its effects.*

Science, Business and Universities

Cooperation, Knowledge Transfer and Entrepreneurship

Routledge *Cooperation between science and business (S2B cooperation) is a very important issue from the points of view of the domestic economy, companies, and universities. This is mainly because such cooperation is a catalyst for faster and reliable development - not only of enterprises, but also of the entire economy. Thanks to S2B cooperation, enterprises can gain and commercialize new and ground-breaking solutions. Universities in turn can give their research a more practical dimension to increase its economic applicability, which helps universities prepare future staff to work in modern enterprises. The aim of this publication is to indicate how cooperation between universities and business can be implemented in an international dimension. It shows the role of modern universities in supporting the development of enterprise and entire economies as well as the role of modern enterprises that use resources located in universities (including knowledge resources). This unique combination has a positive impact on the results and developmental opportunities for each of them. Any potential obtained in this manner is the basis for creating a competitive advantage on the market. This book is devoted to a specific area of cooperation between enterprises and universities and will be of interest to researchers, academics, practitioners, and students in the fields of entrepreneurship, knowledge management, international relations, and higher education.*

The Routledge Companion to Innovation Management

Routledge *Innovation contributes to corporate competitiveness, economic performance and environmental sustainability. In the Internet era, innovation intelligence is transferred across borders and languages at an unprecedented rate, yet the ability to benefit from it seems to become more divergent among different corporations and countries. How much an organization can benefit from innovation largely depends on how well innovation is managed in it. Thus, there is a discernible increase in interest in the study of innovation management. This handbook provides a comprehensive guide to this subject. The handbook introduces the basic*

framework of innovation and innovation management. It also presents innovation management from the perspectives of strategy, organization and resource, as well as institution and culture. The book's comprehensive coverage on all areas of innovation management makes this a very useful reference for anyone interested in the subject.

Encyclopedia of Creativity

Academic Press Creativity influences each of our lives and is essential for the advancement of society. The first edition of the successful Encyclopedia of Creativity helped establish the study of creativity as a field of research in itself. The second edition, published in 2011, was named a 2012 Outstanding Academic Title by the American Library Association's Choice publication. Featuring 232 chapters, across 2 volumes, the third edition of this important work provides updated information on the full range of creativity research. There has been an enormous increase in research on the topic throughout the world in many different disciplines. Some areas covered in this edition include the arts and humanities, business, education, mental and physical health, neuroscience, psychology, the creative process and technology. Fundamental subjects are discussed such as the definition of creativity, the development and expression of creativity across the lifespan, the environmental conditions that encourage or discourage creativity, the relationship of creativity to mental health, intelligence and learning styles, and the process of being creative. Creativity is discussed within specific disciplines including acting, architecture, art, dance, film, government, interior design, magic, mathematics, medicine, photography, science, sports, tourism and writing. A wide range of topics are covered. Here is a partial overview by topic:

Qualified Business Income Deduction

Section 199A

...discusses a new provision of the Internal Revenue Code, §199A, which provides a 20% deduction for qualified business income, qualified publicly traded partnership income, qualified REIT dividends, and income of, or received from, certain agricultural or horticultural cooperatives. The Portfolio describes the requirements that taxpayers must meet in order to qualify for the deduction, the complex rules that limit taxpayers' eligibility for the deduction, and the many uncertainties that taxpayers and their advisers face in interpreting the statute.

Embedded Finance

When Payments Become An Experience

John Wiley & Sons Embedded finance is here and having global impact. Are you ready for it? In Embedded Finance: When Payments Become An Experience, veteran growth strategists, entrepreneurs, and fintech disruptors Scarlett Sieber and Sophie Guibaud deliver a thought-provoking and page-turning discussion on the most impactful and exciting trend of fintech yet: embedded finance. In the book, you'll explore the past, present, and future of fintech, from how embedded finance is being leveraged today by industry heavyweights like Google and Amazon to supercharge their customers' experience to the offerings of smaller, niche players who stand poised to dominate their own corners of the market as their answer unmet customers' needs. The authors present:

- Practical examples around the world of how embedded finance is being used today by technology companies and brands to redefine our online and offline retail experiences as we know them
- The key trends, players, and technologies that are paving the way for embedded finance to take a dominant position in our lives
- The role, opportunities, and strategies for banks, technology companies and brands, providing them with all necessary tools to define their own embedded finance strategy
- The impact of embedded finance on society, consumers, companies, and the economy as a whole, highlighting the dominant force that is embedded finance for our future
- An exciting view of how our day-to-day lives will look like in 2030, powered by embedded finance

An indispensable and eye-opening exploration of one of the most exciting and influential technologies in development today, Embedded Finance details a revolution in financial services, banking, and technology that has already begun. Are you ready?
