TRANSPORTATION DECISION MAKING

PRINCIPLES OF PROJECT EVALUATION AND PROGRAMMING

John Wiley & Sons *This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects Performing an economic efficiency evaluation that accounts for such factors as travel time, safety, and vehicle operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's environmental impact, including air quality, noise, ecology, water resources, and aesthetics Evaluating alternative projects on the basis of multiple performance criteria Programming transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each*

chapter, readers are provided resources for detailed investigation of particular topics. These include Internet sites and publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decisionmaking. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is an ideal coursebook for the subject of transportation systems analysis and evaluation.

RACE TECH'S MOTORCYCLE SUSPENSION BIBLE

Motorbooks Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

MINDING EMOTIONS

CULTIVATING MENTALIZATION IN PSYCHOTHERAPY

Guilford Publications *Mentalization--the effort to make sense of our own and others' actions, behavior, and internal states--is something we all do. And it is a capacity that all psychotherapies aim to improve: the better we are at mentalizing, the more resilient and flexible we tend to be. This concise, engaging book offers a brief overview of mentalization in psychotherapy, focusing on how to help patients understand and reflect on their emotional experiences. Elliot Jurist integrates cognitive science research and psychoanalytic theory to break down "mentalized affectivity" into discrete processes that therapists can cultivate in session. The book interweaves clinical vignettes with discussions of memoirs by comedian Sarah Silverman, poet Tracy Smith, filmmaker Ingmar Bergman, and neurologist Oliver Sacks. A reproducible assessment instrument (the Mentalized Affectivity Scale) can be downloaded and printed in a convenient 8 1/2" x 11" size.*
