Marine Diesel Engines Maintenance, Troubleshooting and Repair Adlard Coles Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.' Boatsense Lessons and Yarns from a Marine Writer's Life Afloat Seapoint Books Well-known author and sailor, Doug Logan, sets down his rare commonsense approach to being on the water, with his accumulation of smart tricks from a lifetime of devotion to boating and sailing. In the warm voice of a deeply knowledgeable friend, Doug describes the thoughts of an experienced boat operator handling the boat as they head out into open water, like a cop on the beat, looking for trouble on the guages, in the ship channel, keeping the crew involved. He addresses the seamanship needed to safely and joyously operate a small boat. With a lifetime of experience on boats, Doug has his favorite and most basic must-haves on a boat, not necessarily the usual GPS or the radar: he has a knife close to hand, a selection of rope, a bucket, and he can inspire every sailor, even the saltiest dockrat, to know which simple tools to have aboard, on powerboats and sailboats alike. More than how-to go boating, Doug writes for people who love boats, particularly sailboats, and describes the skills and sensibilities that a life around boats can help develop--things like self-reliance, adaptability, a sense of balance between daring and humility, and an appreciation of our place in the grand scheme. His collection of yarns, prescriptions, lists, avowals, and explorations establishes a poetic reverence for the life in a small boat on the water. Itchygooney Books Don't these boys get it? How many times must they get into trouble before they catch on? Best friends William and Thomas are back at it again with even more action and adventure. The poor community of Itchygooney isn't safe when William has a plan. This time there's an attack drone, a ghostly rocking chair, a slam-dunking wizard, and a UFO. Will these boys ever be stopped? Let's hope not! Back 4 More is the fourth book in the ongoing I Told You So series of humorous stories shared in short standalone bursts. If they were any longer you couldn't handle it! Boating Boating Cylinder components Properties, applications, materials Springer Science & Business Media As today's spark-ignition and diesel engines have to fulfil constantly increasing demands with regard to CO2 reduction, emissions, weight and lifetime, detailed knowledge of the components of an internal combustion engine is absolutely essential. Automotive engineers can no longer survive without such expertise, regardless of whether they are involved in design, development, testing or maintenance. This text book provides answers to questions relating to the design, production and machining of cylinder components in a comprehensive technical analysis. The Use of the Eyes in Movement Feldenkrais Resources The eyes initiate and control most motor behavior. Working with the relationship of the eyes to the rest of the body can be a powerful means to improve physical organization and functioning. Jack Heggie combines the theory and practice of "Awareness Through Movement"(r) with the vision improvement of Dr. William Bates and has developed 13 "Awareness Through Movement" vision exercises which reduce eye strain and improve posture, flexibility and visual acuity.
