Essays in Honour of Winton Dean

Cambridge University Press This volume of eleven essays, compiled as a tribute to Winton Dean on his seventieth birthday, focuses on that area which has absorbed Winton Dean's interest throughout his distinguished career: opera and other theatre music. The first half of the book covers the period from the late seventeenth century to the mid-eighteenth. The second half of the book ranges over later opera: operacomique; Mendelssohn's operas; the influence of Wagner; the finales of Janáček's operas; and Britten's first two major operas, Peter Grimes and The Rape of Lucretia.

A History of the Oratorio: The oratorio in the classical era

UNC Press Books The Oratorio in the classical Era is the third volume of Howard Smither's monumental History of the Oratorio, continuing his synthesis and critical appraisal of the oratorio. His comprehensive study surpasses in scope and treatment all previous works on the subject. A fourth and final volume, on the oratorio in the nineteenth and twentieth centuries, is forthcoming. In this volume Smither discusses the Italian oratorio from the 1720s to the early nineteenth century and oratorios from other parts of Europe from the 1750s to the nineteenth century. Drawing on works that represent various types, languages, and geographical areas, Smither treats the general characteristics of oratorio libretto and music and analyzes twenty-two oratorios from Italy, England, Germany, France, and Russia. He synthesizes the results of specialized studies and contributes new material based on firsthand study of eighteenth-century music manuscripts and printed librettos. Emphasizing the large number of social contexts within which oratorios were heard, Smither discussed examples in Italy such as the Congregation of the Oratory, lay contrafraternities, and educational institutions. He examines oratorio performances in German courts, London theaters and English provincial festivals, and the Parisian Concert spirituel. Though the volume concentrates primarily on eighteenth-century oratorio from the early to the late Classical styles, Smither includes such transitional works as the oratorios of Jean-Francios le Seur in Paris and Stepan Anikievich Degtiarev in Moscow. A History of the Oratorio is the first full-length history of the genre since Arnold Schering's 1911 study. In addition to synthesizing current thought about the oratorio, this volume contributes new information on relationships between oratorio librettos and contemporary literary and religious thought, and on the musical differences among oratorios from different geographical-cultural regions. The Oxford Handbook of the Georgian Theatre 1737-1832

OUP Oxford The Oxford Handbook of the Georgian Theatre 1737-1832 provides an essential guide to theatre in Britain between the passing of the Stage Licensing Act in 1737 and the Reform Act of 1832 — a period of drama long neglected but now receiving significant scholarly attention. Written by specialists from a range of disciplines, its forty essays both introduce students and scholars to the key texts and contexts of the Georgian theatre and also push the boundaries of the field, asking questions that will animate the study of drama in the eighteenth and early nineteenth centuries for years to come. The Handbook gives equal attention to the range of dramatic forms — not just tragedy and comedy, but the likes of melodrama and pantomime — as they developed and overlapped across the period, and to the occasions, communities, and materialities of theatre production. It includes sections on historiography, the censorship and regulation of drama, theatre and the Romantic canon, women and the stage, and the performance of race and empire. In doing so, it shows the centrality of theatre to Georgian culture and politics, and paints a picture of a stage defined by generic fluidity and experimentation; by networks of performance that spread far beyond London; by professional women who played pivotal roles in every aspect of production; and by its complex mediation of contemporary attitudes of class, race, and gender.

Power and Ceremony in European
History
Rituals, Practices and
Representative Bodies since the
Late Middle Ages

Bloomsbury Publishing From oaths and hand-kissing to coronations and baptisms, Power and Ceremony in European History considers the governing practices, courtly rituals, and expressions of power prevalent in Europe and the Ottoman Empire from the medieval age to the modern era. Bringing together political and art historical approaches to the study of power, this book reveals how ceremonies and rituals - far from simply being ostentatious displays of wealth - served as a primary means of communication between different participants in political and courtly life. It explores how ceremonial culture changed over time and in different regions to provide readers with a nuanced comparative understanding of rituals and ceremonies since the middle ages, showing how such performances were integral to the evolution of the state in Europe. This collection of essays is of immense value to both historians and art historians interested in representations of power and the political culture of Europe from 1450 onwards.

Tracing the Path of Tolerance

History and Critique from the Early
 Modern Period to the Present Day

Cambridge Scholars Publishing In the globalized, postmodern world, the production of encounters and clashes between dissimilar cultures, ways of life, and systems of values has drastically increased in number. More and more frequently, they originate harsh conflicts, exhibiting the existence of alternative and apparently incompatible ways of living and thinking – culturally, religiously, economically and politically speaking. In this context, words as tolerance and intolerance have been put at the heart of the political debate. However, what is the real meaning of these political concepts? Why did they originate and how did they developed over time? Do they still represent a valid resource for comprehending our current societies and dealing with them? Through the different voices of several scholars in the

humanities, this book traces the history of tolerance since the wars of religion to the contemporary age, combining the historical reconstruction with a theoretical and critical analysis of the idea and practice of tolerance in different epochs and places. The obstacle course depicted here reveals the constitutive fragility of this concept that, however, cannot be totally dismissed from our political vocabulary.
