Financing of Higher Education

SAGE Publications India In the last few decades, India has experienced several shifts in the policies pertaining to the financing of higher education. These shifts include a move from public financing to keep pace with the expansion requirements of the sector; the strengthening of market forces in higher education both through privatisation of public institutions and operation of private institutions; and a move from the financing of institutions to the financing of students. The Centre for Policy Research in Higher Education (CPRHE) has initiated major research activities to understand how the recent changes have affected the financing of higher education in India and how the higher education institutions cope with and respond to these changes. India Higher Education Report 2018, the fourth volume in the series, presents this study to provide a comprehensive analysis of financing of higher education in India. This book investigates the changing dynamics and related key issues including state-market dynamics, university-industry linkages, foreign aid, institutional strategies to overcome shortages in funding, issues with self-financing courses, educational loans and fee reimbursement schemes, expansion and

financing of private higher education.

Hybrid Intelligence for Image Analysis and Understanding

John Wiley & Sons A synergy of techniques on hybrid intelligence for real-life image analysis Hybrid Intelligence for Image Analysis and Understanding brings together research on the latest results and progress in the development of hybrid intelligent techniques for faithful image analysis and understanding. As such, the focus is on the methods of computational intelligence, with an emphasis on hybrid intelligent methods applied to image analysis and understanding. The book offers a diverse range of hybrid intelligence techniques under the umbrellas of image thresholding, image segmentation, image analysis and video analysis. Key features: Provides in-depth analysis of hybrid intelligent paradigms. Divided into self-contained chapters. Provides ample case studies, illustrations and photographs of real-life examples to illustrate findings and applications of different hybrid intelligent paradigms. Offers new solutions to recent problems in computer science, specifically in the application of hybrid intelligent techniques for image analysis and understanding, using well-known contemporary algorithms. The book is essential reading for lecturers, researchers and graduate students in electrical engineering and computer science.

International Engineering Education

Proceedings of the INAE-CAETS-IITM Conference

World Scientific This book captures the perspectives on international engineering education of fellows from nine member academies of the Council of Academies of Engineering and Technological Sciences (CAETS). The volume includes papers on the challenges and opportunities facing the education of engineers in the 21st century, and papers relating to globalization and its impact on engineering education worldwide. The response to and exploitation of change by the European engineering education system are described, and the Chinese initiatives in promoting innovation in engineering and architecture are revealed. It also includes a perspective on engineering education in Canada, and describes in detail the groundbreaking Indian National Programme on Technology-Enhanced Learning. The highly topical issues relating to engineering ethics are dealt with from the Japanese and Indian perspectives. This volume brings together the viewpoints of the international engineering education community which assume enhanced significance in the 'flattening' world of today and tomorrow.

Advances in Geotechnics and Structural Engineering

Select Proceedings of TRACE 2020

Springer Nature This book comprises select proceedings of the International Conference on Trends and Recent Advances in Civil Engineering (TRACE 2020). The book focuses on the latest research developments in structural engineering, structural health monitoring, rehabilitation and retrofitting of structures, geotechnical engineering, and earthquake-resistant structures. The contents also cover the latest innovations in building repair and maintenance, and sustainable materials for rehabilitation and retrofitting. The contents of this book are useful for students, researchers, and professionals working in structural engineering and allied areas.

Fundamentals of Sustainability in Civil Engineering

CRC Press This book provides a foundation to understand the development of sustainability in civil engineering, and tools to address the three pillars of sustainability: economics, environment, and society. It includes case studies in the five major areas of civil engineering: environmental, structural, geotechnical, transportation, and construction management. This second edition is updated throughout and adds new chapters on construction engineering as well as an overview of the most common certification programs that revolve around environmental sustainability. Features: Updated throughout and

adds two entirely new chapters Presents a review of the most common certification programs in sustainability Offers a blend of numerical and writing-based problems, as well as numerous application-based examples that utilize concepts found on the Fundamentals of Engineering (FE) exam Includes several practical case studies Offers a solution manual for instructors Fundamentals of Sustainability in Civil Engineering is intended for upper-level civil engineering sustainability courses. A unique feature is that concepts found in the Fundamentals of Engineering (FE) exam were targeted to help senior-level students refresh and prepare.

Open and Distance Education in Asia, Africa and the Middle East

National Perspectives in a Digital Age

Springer This book is open access under a CC BY 4.0 license. This book describes the history, structure and institutions of open and distance education in six countries: China, India, Russia, Turkey, South Africa and South Korea. It describes how open and distance education is evolving in a digital age to reflect the needs and circumstances of the national higher education systems in these countries. It also explores the similarities and differences between how their open and distance higher education systems are managed and structured. This book is the second in a series, following Open and Distance Education in Australia, Europe and the Americas (Springer 2018). Both books compare and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era characterized by the growing use of online, open and distance education, this book will prove particularly valuable for policy-makers and senior administrators who want to learn about establishing or expanding open and distance education services. In addition, it offers a valuable reference guide for researchers, academics and students interested in understanding the different approaches to open and distance education.

The Social Sciences in a Global Age

Decoding Knowledge Politics

Taylor & Francis The book focuses on the status and role of social sciences in the current millennium. Drawing inspiration from a range of theorists, it critically examines the key debates on the social science stream and focuses on its ir/relevance in our times in the background of changing state-market dialectics. It specifically scrutinises knowledge politics of the global times to reveal how the neoliberal project aligns and fuses steep economic 'conditionalities' with professional cultural parameters of higher academia to constrain autonomy and weaken radical expressions in social science pedagogy and research. Asserting that the humanistic core of social sciences has the potential to resist acts of reducing knowledge to a monochromatic form, the book argues that the social science stream can challenge and resist such hegemonic ambitions. It also identifies and analyses the contradictions, dilemmas, predicaments and false steps of social scientists, and avoids a reductive approach based on the 'west versus non-west' binary. The volume will be of interest to scholars and researchers of the social sciences in general, and of sociology/politics of knowledge, political theory, political sociology and education in particular.

Advanced Soil Mechanics, Second Edition

CRC Press This revised edition is restructured with additional text and extensive illustrations, along with developments in geotechnical literature. Among the topics included are: soil aggregates, stresses in soil mass, pore water pressure due to undrained loading, permeability and seepage, consolidation, shear strength of soils, and evaluation of soil settlement. The text presents mathematical derivations as well as numerous worked-out examples.

Introduction to Geotechnical Engineering

Cengage Learning Written in a concise, easy-to-understand manner, INTRODUCTION TO GEOTECHNICAL ENGINEERING, 2e, presents intensive research and observation in the field and lab that have improved the science of foundation design. Now providing both U.S. and SI units, this non-calculus-based text is designed for courses in civil engineering technology programs where soil mechanics and foundation engineering are combined into one course. It is also a useful reference tool for civil engineering practitioners. Transitions from Education to Work

Workforce Ready Challenges in the Asia Pacific

Routledge Labour markets are becoming more dynamic in response to pressures from globalisation, new technologies and trade agreements, as well as cross-border migration, inter-generation differences, changing education imperatives and employer expectations. By focusing on several Asia Pacific countries, this book explores the differences in their workforces: ageing, or abundant in labour but lacking in skilled employees. One similarity these countries share is the difficulty in attracting and retaining employees with the required skillset and capabilities, and these constraints can stymie national economic growth and long term development. This book brings together national and international perspectives on employability challenges faced by selected countries in the Asia Pacific region. While the region is forecast to enjoy high growth in the coming decade, a recurring challenge is addressing skill shortages and ensuring effective transition from training colleges and universities into employment. Consequently, the book focuses on the roles of multiple stakeholders, primarily: governments, education providers and employers - in more effectively addressing these key socio-economic challenges.
