PARENTOLOGY

EVERYTHING YOU WANTED TO KNOW ABOUT THE SCIENCE OF RAISING CHILDREN BUT WERE TOO EXHAUSTED TO ASK

Simon and Schuster An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

THE IOT HACKER'S HANDBOOK

A PRACTICAL GUIDE TO HACKING THE INTERNET OF THINGS

Apress Take a practioner's approach in analyzing the Internet of Things (IoT) devices and the security issues facing an IoT architecture. You'll review the architecture's central components, from hardware communication interfaces, such as UARTand SPI, to radio protocols, such as BLE or ZigBee. You'll also learn to assess a device physically by opening it, looking at the PCB, and identifying the chipsets and interfaces. You'll then use that information to gain entry to the device or to perform other actions, such as dumping encryption keys and firmware. As the IoT rises to one of the most popular tech trends, manufactures need to take necessary steps to secure devices and protect them from attackers. The IoT Hacker's Handbook breaks down the Internet of Things, exploits it, and reveals how these devices can be built securely. What You'll LearnPerform a threat model of a real-world IoT device and locate all possible attacker entry points Use reverse engineering of firmware binaries to identify security issues Analyze, assess, and identify security issues in exploited ARM and MIPS based binariesSniff, capture, and exploit radio communication protocols, such as Bluetooth Low Energy (BLE), and ZigBee Who This Book is For Those interested in learning about IoT security, such as pentesters working in different domains, embedded device developers, or IT people wanting to move to an Internet of Things security role.

MUSTANG BY DESIGN

GALE HALDERMAN AND THE CREATION OF FORD'S ICONIC PONY CAR

CarTech Inc p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} Without question, the 1964-1/2 Mustang is one of the most important and influential cars in automotive history. When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and, in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang. With stinging losses from the Edsel fresh in minds at Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a herculean task to convince Henry Ford II to take a risk on a new concept of automobile, but with the help of Hal Sperlich's detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca's, if it failed. The process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is retraced in insightful detail. During the process, many fascinating experimental cars, such as the Mustang I two-seater, Mustang II prototype, Mustang Allegro, and Shorty, were built. But eventually the Mustang, based on the existing Ford Falcon, received the nod for final production. In a gala event, it was unveiled at the 1964 World's Fair in New York. The Mustang received public accolades and critical acclaim, and soon it became a runaway hit. After the initial success, Ford designers and Gale Halderman designed and developed the first

fastback Mustangs to compliment the coupes. The classic Mustang muscle cars to follow, including the GT, Mach 1, and others, are profiled as well. The Mustang changed automotive history and ushered in the pony car era as a nimble, powerful, and elegantly styled sports coupe. But it could so easily have stumbled and wound up on the scrap pile of failed new projects. This is the remarkable and dramatic story of how the Mustang came to life, the demanding design and development process, and, ultimately, the triumph of the iconic American car.

BETTY LEE, SENIOR

THE WORLD SYNDICATE PUBLISHING CO. Betty Lee, Senior Betty Lee, who was sometimes jokingly called father's little goldfish, had acquired that title by reason of her ability to swim and her golden head, though that was usually covered tightly by a rubber cap. As her taking part in most of the swimming contests among the girls of Lyon High necessitated good bathing suits, Betty was already prepared in that respect for her visit at the seashore. Secrets were all very well. Betty had interest in everything. But her greatest interest was in the new experience ahead of her, the new country and the delights of the ocean. Her father warned her of new conditions, but she would quickly learn. Though there were no river current, there would be the undertow. Betty promised to use her common sense and swim within the boundaries allowed at the resort to which she was bound. With the highest anticipations, then, Betty accompanied the Gwynnes and Kathryn Allen on the fascinating trip East and to New England. Dick Lee was at a boys camp. His twin, Doris, would soon be at a corresponding girls' camp, for it "had to be fair," at the risk, said Mr. Lee, of depleting the treasury. Mother and Amy Lou would remain in the city with Father, but would take an outing with him later, when a business trip would take him East again. Then Betty, returning from the visit with Carolyn, would meet other girl friends at a "wonderful" Girl Reserve camp. Truly the summer could offer no more! Betty's former chum at the little town of Buxton, Janet Light, with whom Betty still corresponded fitfully, as her full life permitted, wrote Betty that she was a "lucky girl," and Betty thought so too.

They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. ANTISTATIC SPRAYS

Independently Published Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

WE ADORE

This book, "To Him Whom We Adore," first of all, was written as a way to pay homage to Almighty God for granting me salvation and mercy and especially during moments where my behavior warranted punishment. Yet, as we all know, God is most merciful and most forgiving. Secondly, as the old cliché goes; "God blesses little babies and old people and the damn fools." For the most part, I'll go on record and say that I was that damn fool. At any rate, this book was also written as a supplement to my morning and nightly prayers - where in the quietness of night I sought God's forgiveness for the intentional and unintentional acts that I perpetrated against good people. Moreover, this is applicable for those who are not believers - merely because God has not appeared in the physical, God is real. For example, we can hear Him communicating in the still of the night directing us to move confidently or chastising us for poor choices. Furthermore, when we look in the eyes of other people we can see God, and it goes without saying, when other people speak to us, in fact, we can hear God. That said, now you should better understand why this book is my way of giving praise to God, for all that has been done and continues to manifest in my life. So, get on the good foot, put your ego in check, drop down and give up the praise that God deserves.
