THE ENGINEERS' REVIEW

LEADING THE WAY

THE HISTORY OF AIR FORCE CIVIL ENGINEERS, 1907-2012

U.S. Government Printing Office *"Leading the way describes how the men and women of Air Force civil engineering have provided the basing that enabled the Air Force to fly, fight, and win. This book depicts how engineers built hundreds of bases during World Wars I and II, Korea, Vietnam, the Gulf War, and Operations Enduring Freedom and Iraqi Freedom. At the same time, these engineers operated and maintained a global network of enduring, peacetime bases. It describes the engineers' role in special projects such as the ballistic missile program, the Arctic early warning sites, and construction of the U.S. Air Force Academy. Using hundreds of sources, this detailed narrative tells the story of how civil engineers have been organized, trained, equipped, and employed for more than 100 years. From the beaches of Normandy to the mountains of Afghanistan, civil engineers have forged an unmatched record of success and built a solid foundation for today's Air Force."--Back cover.*

TRIUMPH OF THE CITY

HOW OUR GREATEST INVENTION MAKES US RICHER, SMARTER, GREENER, HEALTHIER, AND HAPPIER

Penguin Shortlisted for the Financial Times and McKinsey Best Book of the Year Award in 2011 “A masterpiece.” —Steven D. Levitt, coauthor of *Freakonomics* “Bursting with insights.” —The New York Times Book Review A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest, greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future.

SEISMIC STRUCTURAL HEALTH MONITORING

FROM THEORY TO SUCCESSFUL APPLICATIONS

Springer This book includes a collection of state-of-the-art contributions addressing both theoretical developments in, and successful applications of, seismic structural health monitoring (S2HM). Over the past few decades, Seismic SHM has expanded considerably, due to the growing demand among various stakeholders (owners, managers and engineering professionals) and researchers. The discipline has matured in the process, as can be seen by the number of S2HM systems currently installed worldwide. Furthermore, the responses recorded by S2HM systems hold great potential, both with regard to the management of emergency situations and to ordinary maintenance needs. The book's 17 chapters, prepared by leading international experts, are divided into four major sections. The first comprises six chapters describing the specific requirements of S2HM systems for different types of civil structures and infrastructures (buildings, bridges, cultural heritage, dams, structures with base isolation devices) and for monitoring different

phenomena (e.g. soil-structure interaction and excessive drift). The second section describes available methods and computational tools for data processing, while the third is dedicated to hardware and software tools for S2HM. In the book's closing section, five chapters report on state-of-the-art applications of S2HM around the world.

HVDC AND FACTS CONTROLLERS

APPLICATIONS OF STATIC CONVERTERS IN POWER SYSTEMS

Springer Science & Business Media *HVDC and FACTS Controllers: Applications of Static Converters in Power Systems* focuses on the technical advances and developments that have taken place in the past ten years or so in the fields of High Voltage DC transmission and Flexible AC transmission systems. These advances (in HVDC transmission and FACTS) have added a new dimension to power transmission capabilities. The book covers a wide variety of topics, some of which are listed below: -Current Source and Voltage Source Converters, -Synchronization Techniques for Power Converters, -Capacitor Commutated Converters, -Active Filters, -Typical Disturbances on HVDC Systems, -Simulation Techniques, -Static Var Compensators based on Chain Link Converters, -Advanced Controllers, -Trends in Modern HVDC. In addition to EHV transmission, HVDC technology has impacted on a number of other areas as well. As an example, a chapter dealing with HVDC Light applications is included providing recent information on both on-shore and off-shore applications of wind farms.

THE URBAN RAIL DEVELOPMENT HANDBOOK

World Bank Publications *Cities across the globe are looking to develop affordable, environmentally friendly, and socially responsible transportation solutions that can meet the accessibility needs of expanding metropolitan populations and support future economic and urban development. When appropriately planned and properly implemented as part of a larger public transportation network, urban rail systems can provide rapid mobility and vital access to city centers from surrounding districts. High-performing urban rail services, when carefully approached as development projects, can help enhance quality of life by giving citizens access to employment opportunities, essential services, urban amenities, and neighboring communities. The purpose of this Handbook is to synthesize and disseminate knowledge to inform the planning, implementation, and operations of urban rail projects with a view towards: -- Emphasizing the need for early studies and project planning; -- Making projects more sustainable (economically, socially, and environmentally); -- Improving socioeconomic returns and access to opportunities for users; -- Maximizing the value of private participation, where appropriate; and -- Building capacity within project implementing and managing institutions This Handbook provides experiential advice to tackle the technical, institutional, and financial challenges faced by decision makers considering urban*

rail projects. It brings together the expertise of World Bank staff and the input of numerous specialists to synthesize international 'good practices' and recommendations that are independent of commercial, financial political, or other interests. The material presented is intended as an honest-broker guide to maximize the impact and manage the challenges of urban rail systems in cities in both developed and developing countries. Rather than identify a single approach, this Handbook acknowledges the complexities and context necessary when approaching an urban rail development by helping to prepare decision makers to ask the right questions, consider the key issues, perform the necessary studies, apply adequate tools, and learn from international good practice all at the right time in the project development process.

SETTING UP IN DUBAI

A COMPREHENSIVE HANDBOOK ON THE LEGAL ASPECTS OF ESTABLISHING A BUSINESS IN DUBAI

Cross Border Legal Book & CD. *Dubai is your ideal base for business in the Middle East region and beyond. Strategically located midway between the Far East and Europe, and between the former Soviet Union and Africa, this position places the Emirate in the hub of the dynamic trading environment of the Arabian Gulf. Nevertheless, even within a world-class trading centre, setting up a company necessarily entails a large number of complex procedures and regulations. Understanding these, and how to navigate your company through them is key to your future success. Dubai imposes no taxes on profit or income; it offers complete freedom of capital movement; it boasts a sophisticated financial and services sector; its communications facilities are excellent; and the cost structure for doing business is highly competitive. In the Jebel Ali Free Zone and the Dubai Airport Free Zone, overseas companies are permitted to set up wholly-owned ventures and can enjoy an array of incentives, including exemption from import duties. The Dubai Technology, E-commerce and Media Free Zone, allows 100% foreign ownership of companies. Aside from these, and many more economic advantages, business people can be assured that the city of Dubai offers a superb quality of life for themselves and their families. The book features information on: Housing and Accommodation; Health and Education; Transport; Leisure Activities; Local Customs and Traditions. The CD includes reference forms and select directory.*

A COMPANION TO ISLAMIC ART AND ARCHITECTURE

John Wiley & Sons *The two-volume Companion to Islamic Art and Architecture bridges the gap between monograph and survey text*

by providing a new level of access and interpretation to Islamic art. The more than 50 newly commissioned essays revisit canonical topics, and include original approaches and scholarship on neglected aspects of the field. This two-volume Companion showcases more than 50 specially commissioned essays and an introduction that survey Islamic art and architecture in all its traditional grandeur. Essays are organized according to a new chronological-geographical paradigm that remaps the unprecedented expansion of the field and reflects the nuances of major artistic and political developments during the 1400-year span. The Companion represents recent developments in the field, and encourages future horizons by commissioning innovative essays that provide fresh perspectives on canonical subjects, such as early Islamic art, sacred spaces, palaces, urbanism, ornament, arts of the book, and the portable arts while introducing others that have been previously neglected, including unexplored geographies and periods, transregional connectivities, talismans and magic, consumption and networks of portability, museums and collecting, and contemporary art worlds; the essays entail strong comparative and historiographic dimensions. The volumes are accompanied by a map, and each subsection is preceded by a brief outline of the main cultural and historical developments during the period in question. The volumes include periods and regions typically excluded from survey books including modern and contemporary art-architecture; China, Indonesia, Sub-Saharan Africa, Sicily, the New World (Americas)

DIGITAL TRANSFORMATION OF THE DESIGN, CONSTRUCTION AND MANAGEMENT PROCESSES OF THE BUILT ENVIRONMENT

Springer Nature *This open access book focuses on the development of methods, interoperable and integrated ICT tools, and survey techniques for optimal management of the building process. The construction sector is facing an increasing demand for major innovations in terms of digital dematerialization and technologies such as the Internet of Things, big data, advanced manufacturing, robotics, 3D printing, blockchain technologies and artificial intelligence. The demand for simplification and transparency in information management and for the rationalization and optimization of very fragmented and splintered processes is a key driver for digitization. The book describes the contribution of the ABC Department of the Polytechnic University of Milan (Politecnico di Milano) to R&D activities regarding methods and ICT tools for the interoperable management of the different phases of the building process, including design, construction, and management. Informative case studies complement the theoretical discussion. The book will be of interest to all stakeholders in the building process - owners, designers, constructors, and faculty managers - as well as the research sector.*

SMART CITIES IN THE GULF

CURRENT STATE, OPPORTUNITIES, AND CHALLENGES

Springer *In this edited volume, academics and practitioners from various disciplines investigate the challenges, opportunities and frameworks in the implementation of Smart Cities in the Gulf. The volume presents insightful analyses and identifies key lessons learned through case studies covering four main themes including smart city frameworks and governance, resources and infrastructure, information and communication technologies, and the social perspective. In doing so, the book provides policy recommendations related to smart governance, as well as overall frameworks that cities can adopt in their process of transition, and knowledge that is integral to bridge the gap between various stakeholders in the Smart City milieu. This edited volume comprises extended versions of papers presented at a workshop held at the University of Cambridge, UK titled "Smart Cities in the GCC: Current State, Opportunities and Challenges."*

PRACTICAL RESEARCH

PLANNING AND DESIGN

For undergraduate or graduate courses that include planning, conducting, and evaluating research. A do-it-yourself, understand-it-yourself manual designed to help students understand the fundamental structure of research and the methodical process that leads to valid, reliable results. Written in uncommonly engaging and elegant prose, this text guides the reader, step-by-step, from the selection of a problem, through the process of conducting authentic research, to the preparation of a completed report, with practical suggestions based on a solid theoretical framework and sound pedagogy. Suitable as the core text in any introductory research course or even for self-instruction, this text will show students two things: 1) that quality research demands planning and design; and, 2) how their own research projects can be executed effectively and professionally.

MARITIME LOGISTICS

A GUIDE TO CONTEMPORARY SHIPPING AND PORT MANAGEMENT

Kogan Page Publishers *Globalisation and the rapid increase in world trade in the past decade have contributed to greater demand for international transport and logistics and, consequently, the expansion of the maritime industry. The dramatic changes in the mode of world trade and cargo transportation make it more important than ever to have a clear understanding of the way in which freight is transported by sea and the role of ports in this exchange. At the cutting edge in its assessment of the industry, Maritime Logistics covers the whole scope of maritime logistics and examines latest logistical developments within the port and shipping industry. With a range of new international contributors, this new edition has been thoroughly revised and updated. There are new chapters on port centric logistics, hinterland logistics and global supply chains, maritime transport and logistics as a trade facilitator, and future trends and developments. Written by a team of international experts with over fifty years' experience in the field, Maritime Logistics provides a truly global perspective. The book covers everything that students of logistics, as well as those working within the industry, need to know about maritime logistics, including shipping lines, containers, tankers, dry bulk, port-centric logistics, and much more.*

SPACE, CULTURE AND POWER

NEW IDENTITIES IN GLOBALIZING CITIES

Large cities in both the North and the South are caught in the contradictory logics of globalization and localization. This work looks at how ethnic minorities, tribal groupings and marginalized subcultures in urban areas appropriate contemporary discourses - of consumerism, Islam, human rights - to voice new cultural alternatives. Through a variety of cities, including Beirut, Berlin, Cairo, Istanbul, Manila and Singapore, it explores how social and cultural boundaries are renegotiated as new social networks of global trade and finance create new opportunity spaces. It looks at the political agendas and strategies of groups who mobilize to seize upon these openings, and aims to show how the global is translated by different urban groups into practices which transform physical, social and cultural spaces."

STRATEGIC MANAGEMENT

CONCEPTS AND CASES, GLOBAL EDITION

For undergraduate and graduate courses in strategy. In today's economy, gaining and sustaining a competitive advantage is harder than ever. Strategic Management captures the complexity of the current business environment and delivers the latest skills and concepts with unrivaled clarity, helping students develop their own cutting-edge strategy through skill-developing exercises. The Fifteenth Edition has been thoroughly updated and revised with current research and concepts. This edition includes 29 new cases and end-of- chapter material, including added exercises and review questions. MyManagementLab for Strategic Management is a total

learning package. MyManagementLab is an online homework, tutorial, and assessment program that truly engages students in learning. It helps students better prepare for class, quizzes, and exams-resulting in better performance in the course-and provides educators a dynamic set of tools for gauging individual and class progress.
