Ducati Desmoquattro Superbikes

Motorbooks Ducati stunned the world in 1988 when the struggling, small Italian firm unleashed its Desmoquattro -- 8-valve, desmodromic -- Superbike. The bike found success on the world's racetracks right from the start. Road-going versions soon carried that success to the general public, proving this design wasn't just another noisy prototype. The Superbikes -- 748, 851, 888, 916, and 996 -- are now Ducati's best-selling machines in the United States; and the Desmoquattro engine found its way into the company's more pedestrian series such as the Monster roadster and ST4 sport-tour. This is the comprehensive volume on Ducati's ultimate performance motorcycles and replaces the out-of-print Ducati Super Bikes: 851, 888, 916.

Riding in the Zone

Advanced Techniques for Skillful Motorcycling

Motorbooks Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this

state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Motorcycle Road & Racing Chassis

A modern review of the best independents

Veloce Publishing Ltd This book is an account of the companies and individuals, who have played a major part in the design and advancement of motorcycle frame (chassis) performance. These independent companies began to spring up in the early postwar years, when motorcycle racing began to take place again. Due to the lack of available factory machines and the urge to improve performance of the now aged equipment, riders began to build their own frames around whatever engines were available. Success brought recognition, and people were soon wanting to buy winning machines, so fledgling companies began to spring up to satisfy the growing demand for custom chassis. Some of these companies soon began to grow, and others appeared in various European countries over the next few years. The state-of-the-art hand built frames were becoming a must for the discerning road bike rider, and so the independent motorcycle frame makers were beginning to put some designs into production, and a thriving business was beginning to emerge. In later years, with such a large choice of factory engines from around the world, the successful independent chassis manufacturers went from strength to strength and some are now producing highly prized road bikes, whilst building one-off machines as required. As the years have passed, one or two of the independent companies have disappeared, but in many cases their machines have become very collectable classics. The companies still thriving today, as well as producing modern machines with a wide range of engine options, are finding considerable business rebuilding and maintaining machines built in the earlier years. Some of the pioneer builders have become household names to the motorcycle fraternity, and those written about in this book include: Nico Bakker (The Netherlands), Bimota (Italy), Dresda Autos (United Kingdom), Egli (Switzerland), Harris Performance Products (United Kingdom), Hejira racing (United Kingdom), Magni (Italy), Maxton Engineering (United Kingdom), P&M Motorcycles (United Kingdom), Quasar (United Kingdom), Rickman UK (United Kingdom), Colin Seeley Racing (United Kingdom), Segale (Italy) and Spondon Engineering (United Kingdom). This book charts the history of these innovative companies with full specifications for many chassis, and is extensively illustrated throughout. A must for any motorcycle enthusiast, and a valuable reference for the trade.

Lone Rider

The First British Woman to Motorcycle Around the World

Michael O'Mara Books In 1982, at the age of just twenty-three and halfway through her architecture studies, Elspeth Beard left her family and friends in London and set off on a 35,000-mile solo adventure around the world on her 1974 BMW R60/6. Reeling from a recent breakup and with only limited savings from her pub job, a tent, a few clothes and some tools, all packed on the back of her bike, she was determined to prove herself. She had ridden bikes since her teens and was well travelled. But nothing could prepare her for what lay ahead. When she returned to London nearly two and a half years later she was stones lighter and decades wiser. She'd ridden through unforgiving landscapes and countries ravaged by war, witnessed civil uprisings that forced her to fake documents, and fended off sexual attacks, biker gangs and corrupt police convinced she was trafficking drugs. She'd survived life-threatening illnesses, personal loss and brutal accidents that had left permanent scars and a black hole in her memory. And she'd fallen in love with two very different men. In an age before email, the internet, mobile phones, satnavs and, in some parts of the world, readily available and reliable maps, Elspeth achieved something that would still seem remarkable today. Told with honesty and wit, this is the extraordinary and moving story of a unique and life-changing adventure.

The Awakening of Latin America

Seven Stories Press This classic anthology on Latin America shows the Argentine-born revolutionary's cultural depth, rigorous intellect, and intense emotional engagement with a continent and its people. In a letter to his mother in 1954, a young Ernesto Guevara wrote, "The Americas will be the theater of my adventures in a way that is much more significant than I would have believed." In The Awakening of Latin America we have the story of those adventures, charting Che's evolution from an impressionable young medical student to the "heroic guerrilla," assassinated in cold blood in Bolivia. Spanning seventeen years, this anthology draws on from his family's personal archives and offers the best of Che's writing: examples of his journalism, essays, speeches, letters, and even poems. As Che documents his early travels through Latin America, his involvement in the Guatemalan and Cuban revolutions,

and his rise to international prominence under Fidel Castro, we see how his fervent commitment to social justice shaped and was shaped by the continent he called home. Nearly half of this book is published for the first time and pre-dates Che's arrival in Cuba with Fidel Castro's guerrilla expedition in 1956. Also included are his notes for his unfinished book, *The Social Role of Doctors in Latin America*.

Royal Enfield

The Complete Story

Crowood Press UK The firm of Royal Enfield was one of the best-known names of the British motorcycle industry, but curiously its products have never received the adulation bestowed on the products of Triumph, BSA and others. In this complete history, top motorcycle authority Mick Walker shows that there was, in fact, much for the Redditch-based firm to be proud of, in the shape of good-looking, innovative machines that inspired a generation. And what other company can boast a model still in popular production sixty years after its launch? Topics covered include: , Complete history of Royal Enfield, including Enfield India, Numerous specifications, Royal Enfields in competition About the Author: Mick Walker started his own business, Mick Walker Motorcycles, in 1969 and was a leading race sponsor during the 1970s. In 1994 he formed Mick Walker Racing, following the death of his son Gary at Brands Hatch that year. The team has achieved no fewer than five British Championship wins.
