Against the Odds An Autobiography

Texere Publishing In this updated autobiography, the British inventor of the bagless vacuum cleaner tells the story of his incredible struggle to design and launch a machine that worked better than all others.

The Vacuum Cleaner A History

McFarland House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

Construction Methods and Management

Prentice Hall Comprehensive and up-to-date, the text integrates major construction management topics with an explanation of the methods of heavy/highway and building construction. It incorporates both customary U.S. units and metric (SI) units and is the only text to present concrete formwork design equations and procedures using both measurement systems. This edition features information on new construction technology, the latest developments in soil and asphalt compaction, the latest developments in wood preservation and major health, safety and environmental concerns.Explains latest developments in soil and asphalt compaction.

Presents the latest developments in wood preservation materials and techniques which respond to environmental concerns. Expanded and updated coverage of construction safety and major health hazards and precautions. Designed to guide construction engineers and managers in planning, estimating, and directing construction operations safely and effectively.

Invention

A Life

*Simon and Schuster Dyson has become a byword for high-performing products, technology, design, and invention. Now, James Dyson, the inventor and entrepreneur who made it all happen, tells his remarkable and inspirational story in *Invention: A Life*, “one of the year’s most relevant and revelatory business books” (*The Wall Street Journal*). Famously, over a four-year period, James Dyson made 5,127 prototypes of the cyclonic vacuum cleaner that would transform the way houses are cleaned around the world. In devoting all his resources to iteratively setbacks came hard-fought success. His products—including vacuum cleaners, hair dryer and hair stylers, and fans and purifiers—are not only revolutionary technologies, but design classics. This was a legacy of his time studying at the Royal College of Art in the 1960s, when he was inspired by some of the most famous artists, designers, and inventors of the era, as well as his engineering heroes such as Frank Whittle and Alex Issigonis. In *Invention: A Life*, Dyson reveals how he came to set up his own company and led it to become one of the most inventive technology companies in the world. It is a compelling and dramatic tale, with many obstacles overcome. Dyson has always looked to the future, even setting up his own university to help provide the next generation of engineers and designers. For, as he says, “everything changes all the time, so experience is of little use.” Whether you are someone who has an idea for a better product, an aspiring entrepreneur, whether you appreciate great design or a page-turning read, *Invention: A Life* is an “entertaining and inspiring memoir” (*Kirkus Reviews*, starred review) that offers motivation, hope, and much more.*

Parasitology and Microbiology Research

BoD – Books on Demand The study of both unicellular and multicellular living beings and the diseases they produce from a biological point of view requires constant review of their relationship with their host and environment, given their indisputable sanitary importance. In this sense, in parasitology and microbiology, updated and concise information on life cycle, taxonomic classification,

clinical manifestations, diagnosis, treatment, epidemiological behavior, and control measures is of vital importance. This is what we pursue with this book. The approach to parasitology and microbiology and the research that is carried out on it is unquestionable because the associations between life forms have been present from the very beginning of life. Research in parasitology and microbiology is necessary and indispensable for controlling diseases that affect much of the world with serious economic and social consequences. The challenge is to promote research to keep these diseases at bay. This book shows what has been done up to now and what can be done in the future to combat infectious diseases.

Immortal

Penguin From the #1 New York Times bestselling author who has kept readers on the edge of their seats with her phenomenal Fallen Angels novels, comes one of the most heart-stirring and eagerly anticipated events in that acclaimed series. The Creator invented the game, and the stakes are nothing less than the fate of the quick and the dead: seven souls, seven crossroads. Reluctant savior Jim Heron has compromised himself, his body and his soul, and yet he's on the verge of losing everything... ...Including Sissy, the innocent he freed from Hell. Jim's determined to protect her—but this makes her a weakness the demon Devina can exploit. With Jim torn between the game and the woman he's sworn to defend, evil's more than ready to play dirty. Humanity's savior is prepared to do anything to win—even embark on a suicide mission into the shadows of Purgatory. True love is Jim's only hope for survival—and victory. But can a man with no heart and no soul be saved by something he doesn't believe in?

Fundamentals of Nursing and Midwifery Research

A practical guide for evidence-based practice

Routledge Nurses and midwives have a professional responsibility to keep up-to-date with current research impacting on their clinical practice. They require the skills and knowledge to read and understand research reports, evaluate the quality of the research, synthesise different research studies, apply the most appropriate findings to their clinical practice and be able to evaluate its effectiveness. This book presents a unique approach to teaching the principles of health research using practical case studies with which students can identify and engage. The book covers core concepts and principles including: - what evidence is and why understanding research is vital - finding reliable sources of evidence - the nature of the research process - understanding quantitative

and qualitative research - ethical considerations - using research to guide clinical practice. Throughout the book, activities, summaries and review questions help ground theory in real life scenarios, highlighting how evidence-based practice can be applied in every aspect of nursing care. 'The text is highly readable while achieving the aim of familiarising the reader with the language of, and process for, doing research. It is logically organised and ... guides reader learning using a variety of techniques that reinforce [the] information presented and challenge thinking.' Karen Francis, Professor of Nursing and Head of Nursing, University of Tasmania

Not the Same But Just As Good

Createspace Independent Publishing Platform "NOT THE SAME but JUST AS GOOD" is the third and final installment of Pat's 'Compassion Series', along with: 'Sometimes My Friends Don't Look Like Me... Sometimes They Don't Look Like You' and 'A Reflection of We'. A few quotes from 'NOT THE SAME but JUST AS GOOD' : "We won't always end up in the same place because not everyone has the same start. But to decide that we are better than others is just unkind and not very smart." "If I don't do as well in our school or get the same marks that you get. It could just mean that I'm great in other things or just haven't found my talent as yet." "It's not fair to decide that you know someone because of what people on your screen may say. So you must ask yourself this big question: If someone does something very wrong, does that mean everyone who looks like them is also that way?" Important, relevant book for all children and adults. Provides tools for healthy emotional and social development, as it promotes self-esteem and understanding of others in a gentle, yet strong delivery of ways to deal with increasingly relevant issues. For pre and elementary school levels, but may easily be used in higher grades to discuss social issues, bullying, kindness and tolerance. Characters are multi-faceted and multiracial. Stunning and captivating illustrations by Korey Scott.

South Asia at a Crossroads

Conflict Or Cooperation in the Age of Nuclear Weapons,

Missile Defense, and Space Rivalries

Nomos Verlagsgesellschaft Mbh & Company "This volume explores some of the 21st century's most challenging questions in international peace and security, with a focus on a crucial region: South Asia. The authors have done a great public service by straightforwardly and lucidly presenting their penetrating analyses to a general readership." Lee H. Hamilton, President and Director of the Woodrow Wilson International Center for Scholars and former Vice Chairman of the 9/11 Commission. "South Asia at a Crossroads is an important contribution to the literature on global peace and security. The book brings together a broad range of perspectives - both global and regional - on complex security challenges, especially those underlined by science and technology. The book should be a valuable resource for all those who want to better understand the various dimensions of the conflict in South Asia." Professor Paolo Cotta-Ramusino is the Secretary General of the International Pugwash Conferences on Science and World Affairs, which was awarded the Nobel Peace Prize in 1995. He is a Professor of Physics at the University of Milan, Italy.

Illustrated with material from Hunter's remarkable private collection of artefacts and memorabilia, this is the definitive Beatles treasure.

Special Relativity for Beginners

A Textbook for Undergraduates

World Scientific This book, first appearing in German in 2004 under the title *Spezielle Relativitätstheorie für Studienanfänger*, offers access to the special theory of relativity for readers with a background in mathematics and physics comparable to a high school honors degree. All mathematical and physical competence required beyond that level is gradually developed through the book, as more advanced topics are introduced. The full tensor formalism, however, is dispensed with as it would only be a burden for the problems to be dealt with. Eventually, a substantial and comprehensive treatise on special relativity emerges which, with its gray-

shaded formulary, is an invaluable reference manual for students and scientists alike. Some crucial results are derived more than once with different approaches: the Lorentz transformation in one spatial direction three times, the Doppler formula four times, the Lorentz transformation in two directions twice; also twice the unification of electric and magnetic forces, the velocity addition formula, as well as the aberration formula. Beginners will be grateful to find several routes to the goal; moreover, for a theory like relativity, it is of fundamental importance to demonstrate that it is self-contained and without contradictions. Cathedral

a novel

*Europa Editions UK ***LONGLISTED: THE HWA GOLD CROWN 2021*** ***A Sunday Times BOOK OF THE YEAR 2021: "An ambitious, epic debut."*** ***A NEW YORK TIMES BEST BOOK OF THE YEAR 2021*** A Times BOOK OF THE MONTH: "Beautifully written and profoundly insightful." "A memorable tapestry of politics, religion and conflicting human desires." —The Sunday Times "Cathedral is a masterpiece, one of the best historical novels I've read in a long time. Spellbinding and so evocative of place and time. A triumph." —Dan Jones "Fascinating, fun, and gripping to the very end." —Roddy Doyle A sweeping story about obsession, mysticism, art, and earthly desire. At the centre of this story, is the Cathedral. Its design and construction in the 12th and 13th centuries in the fictional town of Hagenburg unites a vast array of unforgettable characters whose fortunes are inseparable from the shifting political factions and economic interests vying for supremacy. From the bishop to his treasurer to local merchants and lowly stonecutters, everyone, even the town's Jewish denizens, is implicated and affected by the slow rise of Hagenburg's Cathedral, which in no way enforces morality or charity. Around this narrative core, Ben Hopkins has constructed his own monumental edifice, a choral novel that is rich with the vicissitudes of mercantilism, politics, religion, and human enterprise. Ambitious, immersive, a remarkable feat of imagination, Cathedral deftly combines historical fiction, the literary novel of ideas, and a tale of adventure and intrigue. Fans of authors like Umberto Eco, Elif Shafak, Hilary Mantel, Ken Follett and Jose Saramago will delight at the atmosphere, the beautiful prose, and the vivid characters of Ben Hopkins's Cathedral.*

Environmentally-Friendly Product Development

Methods and Tools

Springer Science & Business Media Development of environmentally friendly products gains an increasing importance in science and in industry. While product development was strongly dedicated to achieve quality, cost and time targets, environmental issues indirectly had always been under consideration by engineers, see Fig. 1. Furthermore a methodology for the development of environmentally sound products was missing. Despite of significant progress in using computer aided tools for product development and design, environmental aspects were not attended. Computer aided tools typically do not include methods for considering environmental issues enabling the designer to assess a product's environmental effects. Fig. 1. Vision of Environment as a key target for product development v vi Preface Product related environmental issues are getting more and more political and public awareness. Development of environmentally friendly products has become an action item for both, politics and industry (UNFCCC 1997). Energy consumption is on the agenda and covers pollution and resource saving. Typical topics of directives of the European Union are waste, noise, air pollution, water, nature and biodiversity, soil protection, civil protection and climate change. After the translation into national law the development of environmentally friendly products is a basic approach to contribute to the fulfilment of the topics mentioned above. In the European Community a "Communication from the Commission to the Council and the European Parliament" on "Integrated Product Policy" was adopted on the 18 June 2003 (EC 2003).

The Durable Use of Consumer Products

New Options for Business and Consumption

Springer Science & Business Media Do we need a new car or a new refrigerator every ten years? What happens to our PC which is exchanged for a new model every three years? Why do our shoes last only a year or so, while those of our great grandfather served for a generation? Are businesses deliberately marketing products in a way which encourages sub-optimal use and induces consumers to buy new products? More and more consumers respond "yes" objecting to the business practices which reduce the life span of a product or pay no attention to efficiency in consumption. The growing concern with sub-optimal use of consumer durables arises as a response to the volume of waste, as well as to the growing conviction that over-consumption is encouraged by marketing techniques and approaches that favor lesser durability and sub-optimal use. There are signs that those things will have to change. Firstly, client orientation - a condition sine qua non of marketing success in the saturated markets of rich countries - is gaining popularity. Consumers are better informed and more influential and "intelligent consumption" is on the rise. Buyers are becoming more and more hostile towards marketing manipulation, inducing them to consume faster, more and at higher prices. The public increasingly resists messages in advertisements (preventive resistance) which are predominantly persuasive (rather than educational or informative) and conceived to stimulate demand for the "new", the superficial and the fashionable.

A Journey

A Journey is a short story by Edith Wharton. Edith Wharton (born Edith Newbold Jones; January 24, 1862 – August 11, 1937) was a Pulitzer Prize-winning American novelist, short story writer, and designer. She was nominated for the Nobel Prize in Literature in 1927, 1928 and 1930. Wharton combined her insider's view of America's privileged classes with a brilliant, natural wit to write humorous, incisive novels and short stories of social and psychological insight. She was well acquainted with many of her era's other literary and public figures, including Theodore Roosevelt. Wharton was born to George Frederic Jones and Lucretia Stevens Rhineland in New York City. She had two brothers, Frederic Rhineland and Henry Edward. The saying "Keeping up with the Joneses" is said to refer to her father's family. She was also related to the Rensselaer family, the most prestigious of the old patroon families. She had a lifelong friendship with her Rhineland niece, landscape architect Beatrix Farrand of Reef Point in Bar Harbor, Maine. In 1885, at 23, she

married Edward (Teddy) Robbins Wharton, who was 12 years older. From a well-established Philadelphia family, he was a sportsman and gentleman of the same social class and shared her love of travel. From the late 1880s until 1902, he suffered acute depression, and the couple ceased their extensive travel. At that time his depression manifested as a more serious disorder, after which they lived almost exclusively at The Mount, their estate designed by Edith Wharton. In 1908 her husband's mental state was determined to be incurable. She divorced him in 1913. Around the same time, Edith was overcome with the harsh criticisms leveled by the naturalist writers. Later in 1908 she began an affair with Morton Fullerton, a journalist for The Times, in whom she found an intellectual partner. In addition to novels, Wharton wrote at least 85 short stories. She was also a garden designer, interior designer, and taste-maker of her time. She wrote several design books, including her first published work, The Decoration of Houses of 1897, co-authored by Ogden Codman. Another is the generously illustrated Italian Villas and Their Gardens of 1904.

By the Waters of Liverpool

HarperCollins The third volume in the classic story of Helen Forrester's childhood and adolescence in poverty-stricken Liverpool during the 1930s. Helen Forrester continues the moving story of her early poverty-stricken life with an account of her teenage years and the devastating effect of the Second World War on her hometown of Liverpool. At seventeen, Helen Forrester's parents are still as irresponsible as ever, wasting money while their children still lack adequate food and clothing. But for Helen, having won a small measure of independence, things are looking up. Having educated herself at night school and now making friends in her first proper job, she meets a handsome seaman and falls in love for the first time. But the storm clouds of war are gathering and Helen will experience at first hand the horror of the blitz and the terrible toll that the war exacted on ordinary people. As ever, Helen faces the future with courage and determination.

Loose Leaf for Thermodynamics: An Engineering Approach

McGraw-Hill Education Thermodynamics, An Engineering Approach, covers the basic principles of thermodynamics while presenting a wealth of real-world engineering examples, so students get a feel for how thermodynamics is applied in engineering practice. This text helps students develop an intuitive understanding by emphasizing the physics and physical arguments. Cengel and Boles explore the various facets of thermodynamics through careful explanations of concepts and use of numerous practical examples and figures, having students develop necessary skills to bridge the gap between knowledge, and the confidence to properly apply their knowledge. The 9th edition offers new video and applet tools inside Connect. McGraw-Hill Education's Connect, is also available as an optional, add on item. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, how they need it, so that class time is more effective. Connect allows the professor to assign homework, quizzes, and tests easily and automatically grades and records the scores of the student's work. Problems are randomized to prevent sharing of answers and may also have a "multi-step solution" which helps move the students' learning along if they experience difficulty.
