Interim Instructions for Installation of Eaw-20 Extendible Earth Anchor System

The instructions present information on the installation and maintenance of the EAW-20 Extendible Earth Anchor System and its associated equipment. Although versatile in its many possible practicable applications, the anchor information given is tailored primarily for the Short Airfield for Tactical Support (SATS) application for which the anchor was initially designed. It consists of the same three primary components as the EAW-20 Earth Anchor: anchor tube assembly, explosive cartridge, and grout. Each of these components has been redesigned to give the new system increased flexibility, safety, and reliability.

Health and Happiness

An Owner's Manual for the Mind and Body

AuthorHouse **Regardless of your age, race, religion, sex, political affiliation or national origin - we should all have one common denominator - Health. We only get one shot at life and when health is gone, nothing else matters. The human mind and body comprise the most sophisticated machine on earth. Our bodies are far more sensitive and complex than any automobile, DVD player or other man-made item; but unlike those products, we dont**

come with an instruction manual at birth. This Health and Happiness guide offers common sense advice to help the average person make better decisions regarding their mind and body. Health reform starts with the daily choices we make - choosing to read this book is the first step in the right direction.

A User's Manual for the FIT Program

A Model for Smoothing Raw Data

FIT is a Fortran 77 program which fits a smooth curve to raw data. The program finds the trends inherent in the data (the peaks, valleys, slopes, etc.) and produces a set of modified data points, which can be plotted using any available graphics package. It is easily used without much knowledge of the underlying techniques and can be employed repeatedly to the subsequent smoothed data sets to achieve any smoothness desired. However, some care must be taken, since the input data must be equally spaced in the independent variable with only a few missing data points. This report covers input preparation, output expectation, technique explanation and provides a program listing in the appendix.

Dog Owner's Manual

Important Stuff You Should Know about Your Pet, by Buster

Andrews McMeel Publishing **When considering their canine friends, what do dog owners really need to know? Important stuff, according to Buster, like how dogs would run the world if they were in charge (fleas would taste like hamburger, only dogs would be allowed to pick up dropped food). What**

they fantasize about (mostly steaks, open garbage cans, and female dogs). The rules that govern sniffing other dogs. Buster and his capable translator, David E. Carter, have created a most useful book that's also delightfully funny. Dog Owner's Manual will resonate with the millions of pooch possessors who secretly know-but won't always admit-who really owns who.

F-4 Phantom Pilot's Flight Operating Manual

Lulu.com One of the great aircraft of the Cold War era, the McDonnell Douglas F-4 Phantom II was the most heavily produced supersonic, all-weather fighter bomber. Capable of a top speed of Mach 2.23, it set sixteen world records including an absolute speed record of 1,606 mph and an altitude record of 98,557 feet. The F-4 flew Vietnam, in the Arab-Israeli conflict, and the Gulf War and amassed a record of 393 aerial victories. F-4s also flew as part of the USAF Thunderbirds and the U.S. Navy Blue Angels flight demonstration teams. Originally printed by McDonnell and the U.S. Navy in the 1960s, this flight operating handbook taught pilots everything they needed to know before entering the cockpit. Classified "restricted", the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted. Care has been taken however to preserve the integrity of the text.

Raw and Natural Nutrition for Dogs, Revised Edition

The Definitive Guide to Homemade Meals

North Atlantic Books **The definitive guide to feeding your dog a balanced and nutritious raw and home-cooked diet, from the founder of a natural pets product company with over thirty years of experience working with dogs. Many people want to prepare their dog's meals at home, but feel it is too complex. Raw and Natural Nutrition for Dogs provides a road map to the essentials of canine nutrition, written in easy-to-understand language. Pet owners seeking to give their dogs a better coat, better skin, and healthier teeth and gums, as well as longer lives and more stable temperaments, will benefit not only from the background data in this book, but also the step-by-step instructions and recipes for preparing these diets. The book includes charts with the recipes, instructions on keeping diets simple and balanced, guidelines on preparation, suggestions for finding ingredients, and how much to feed a dog by body weight. There are recipes for healthy adult dogs, as well as guidelines for puppies, senior dogs, and dogs with health conditions including pancreatitis, renal problems, gastric issues, allergies, heart disease, liver disease, and cancer. Tracing the history of feeding dogs, the author shows when commercial dog food rose and took hold of the market. She discusses canine nutritional needs and provides research on how home-prepared foods can meet pets' needs better than commercial, processed dog food. Written with thorough information for the seasoned raw feeder, this guide can also be easily followed by any newcomer to home-feeding. This revised edition includes new information on special care and feeding of pregnant, newborn, performance, and toy breed dogs as well as senior dog considerations and the safety of the raw food diet for dogs.**

Curious Devices and Mighty Machines

Exploring Science Museums

Reaktion Books **From their quirky origins to their contemporary role as centers of advocacy, a look at the secret lives of science museums—past, present, and future. Science museums have paradoxes at their core. They must be accessible and fun while representing increasingly complex science. They must be both historic and contemporary. Their exhibits attract millions, but most of their objects remain in deep storage, seldom seen. This book delves into these conflicts, revealing the secret lives of science curators; where science objects come from and who uses them; and, ultimately, what science museums are for. With an insider's eye, Samuel J. M. Alberti exposes the idiosyncratic past and intriguing current practices of these institutions—and sets out a map for their future.**

Low Power RF Circuit Design in Standard CMOS Technology

Springer Science & Business Media **Low Power Consumption is one of the critical issues in the performance of small battery-powered handheld devices. Mobile terminals feature an ever increasing number of wireless communication alternatives including GPS, Bluetooth, GSM, 3G, WiFi or DVB-H. Considering that the total power available for each terminal is limited by the relatively slow increase in battery performance expected in the near future, the need for efficient circuits is now critical. This book presents the basic techniques available to design low power RF CMOS analogue circuits. It gives circuit designers a complete guide of alternatives to optimize power consumption and explains the application of these rules in the most common RF building blocks: LNA, mixers and PLLs. It is set out using practical examples and offers a unique perspective as it targets designers working within the standard CMOS process and all the limitations inherent in these technologies.**

Manuela's Manual

Intimate Bodycasting for Adults

CreateSpace Discover the joy of genital casting. Manuela's manual demonstrates how to make a plaster sculpture of a vulva. This is a complete and well illustrated instruction manual showing how to make in a few steps a highly realistic, solid and durable representation of the vagina; a unique, personal, sensuous and very unusual ornament. The book will take you through all the steps necessary to complete the project, starting with a brief overview through to detailed instructions. Manuela Lollenbeck is a professional sculptor who has become a leading authority on this very unusual area of expertise. To illustrate this book she has asked two good friends to cast each other's vagina under her guidance while she was

taking photographs of the whole procedure. The method she describes is safe, quick, easy and inexpensive and the resulting artwork is absolutely fascinating of realism and deliciously indecent, the joyful portrait of a vulva. Delicately crafted labia make for a delightfully sinful display of raw sensuality. All you need is a willing model. This is a fun and sexy project for playful couples. Warning. The book contains graphic sexual content intended for a mature audience. "I personally find nothing offensive in the representation of the female sexual organs; I even find it incredibly beautiful. However, I have to abide by the rules of the world I live in and must therefore warn you that you will be seeing in this book many highly realistic images of female genitals." How is this done?. The procedure only requires minimum tools and materials. You simply apply an alginate or silicone rubber directly over the model's skin and then construct a rigid plaster bandages shell over this first layer. When everything has set, just 10 minutes later, you remove the mold and cast into it a batch of liquid plaster or other casting material, let it cure for a few hours, unmold and voila...! What does the manual cover?. The book covers everything you need to know including a step by step illustrated set of instructions which will allow you to make a successful casting at your first attempt. The book also tells you what to buy, how much to buy and where to buy it from. This will save you much money over buying a kit. "I hope that you will find it useful, entertaining and well worth the few dollars I am selling it for." How much does it all cost? Other than the cost of buying this book and depending on what you already have, it could cost you as little as \$30. How long does it take? Once you have collected all the necessary materials, you will need about one hour to make the mold and another hour to cast into the mold. Once the casting has set, you may need another hour to finish the sculpture. How much details can be seen? Our method will capture the most incredible level of details of the skin texture. Is this safe? The procedure is completely safe. Our method is using well proven and trusted products. Does it hurt? The whole procedure is completely painless and quite comfortable, even enjoyable some say. Is this solid and durable? This largely depends of the casting material you use. Plain plaster of Paris is durable but not very solid. The book recommends a number of very durable and robust alternatives.

Hello Me, Where Am I?

The Brutally Honest and Raw Emotional Stories of an Addict on the Path of Recovery and Discovery

Xlibris Corporation He wrote this book for all those who suffer from the same addictions and mental afflictions he and his family endured. Despite all his pain, Kevin never lost his faith. He wanted all of you who endured the same pain that he did to understand what many people struggle with in their daily lives. He urged you to speak up so that our society would be understanding to those in misery and to understand and to find help, in any way you can, for them. Kevin's message to you who are suffering was to seek help for yourself and your loved ones and realize that suicide hurts everyone: wives, children, parents, extended families, and even those whom you never met. He wanted you to also reach out to God every moment of every day. He wanted you to know that you are loved and that there can be help for you. Kevin's desire was that all those who suffer and read this book would be educated about these afflictions and realize they are understood and loved so that they need never be alone again. This book could be a miracle for yourself or someone you love. Kevin was like a son to me. I loved him. I wish I could have helped save him.
