Foreverland

On the Divine Tedium of Marriage

HarperCollins A Recommended Read from: Good Morning America • Good Housekeeping • Esquire • Shondaland • Atlanta Journal-Constitution • The Week • Lit Hub • Publishers Weekly An illuminating, poignant, and savagely funny examination of modern marriage from Ask Polly advice columnist Heather Havrilesky If falling in love is the peak of human experience, then marriage is the slow descent down that mountain, on a trail built from conflict, compromise, and nagging doubts. Considering the limited economic advantages to marriage, the deluge of other mate options a swipe away, and the fact that almost half of all marriages in the United States end in divorce anyway, why do so many of us still chain ourselves to one human being for life? In Foreverland, Heather Havrilesky illustrates the delights, aggravations, and sublime calamities of her marriage over the span of fifteen years, charting an unpredictable course from meeting her one true love to slowly learning just how much energy is required to keep that love aflame. This refreshingly honest portrait of a marriage reveals that our relationships are not simply “happy” or “unhappy,” but something much murkier—at once unsavory, taxing, and deeply satisfying. With tales of fumbled proposals, harrowing suburban migrations, external temptations, and the bewildering insults of growing older, Foreverland is a work of rare candor and insight. Havrilesky traces a path from daydreaming about forever for the first time to understanding what a tedious, glorious drag forever can be.

Public Education

Defending a Cornerstone of American Democracy

Teachers College Press In this important collection, eminent education scholars and practitioners remind us that our nation's system of free universal public education is under attack, putting our very democracy in jeopardy. Over and above preparing students for employability, American schools must prepare our youth to be informed citizens and active, constructive participants in the democratic process. These essayists, criticizing as well as lauding our educational system, believe that such a goal is best accomplished through a high-quality, public, free system of schooling designed to serve all our nations' children without regard to race, religion, gender, LGBTQ+ identity, (dis)ability, social class, citizenship status, or language. In the 100th anniversary year of Horace Mann, these thought leaders in education take stock of enduring principles, current dilemmas, and important forward directions. With privateers growing in numbers and seeking to take advantage of systemic breakdowns, this book will serve as a

rousing defense of our public schools for our nation's educators, parents, school board members, and politicians. **Book Features:** Reminds all Americans of the essential roles that schools serve in contemporary society, beyond simply learning the prescribed school curriculum. Presents a counterpoint to those who promote private or charter schooling at the expense of genuine public schools. Paints a complex and multi-faceted portrait of our public education system and provides a set of diverse and provocative remedies for many pressing contemporary problems of public schooling. **Contributors:** Michael W. The Well-Balanced Teacher

How to Work Smarter and Stay Sane Inside the Classroom and Out

ASCD You've probably heard the advice "put on your own oxygen mask before assisting others." This is true both in airplanes and in classrooms—you have to take care of yourself before you can help someone else. If teachers are stressed out and exhausted, how can they have the patience, positive energy, and enthusiasm to provide the best instruction for students? Author Mike Anderson asked that question as a teacher himself, and the answers he found form the basis of *The Well-Balanced Teacher*. He found that teachers need to take care of themselves in five key areas to keep themselves in shape to care for their students. In addition to paying proper attention to their basic needs for nutrition, hydration, sleep, exercise, and emotional and spiritual refreshment, teachers also need **Belonging**: Teachers need to feel positive connections with other people, both in school and outside school. **Significance:** Teachers want to

know that they make a positive difference through the work they do. **Positive engagement:** When teachers enjoy their work, they have great energy and passion for their teaching. **Balance:** Healthy teachers set boundaries and create routines so that they can have rich lives both in the classroom and at home. Anderson devotes a chapter to each of these needs, describing in frank detail his own struggles and offering a multitude of practical tips to help readers find solutions that will work for them. When teachers find ways to take care of their own needs, they will be healthier and happier, and they will have the positive energy and stamina needed to help their students learn and grow into healthy adults themselves.

A Year in the Life of a Third Space Urban Teacher Residency

Using Inquiry to Reinvent Teacher Education

Springer This book weaves together voices of faculty, residents, mentors, administrators, community organizers, and students who have lived together in a third space urban teacher residency program in Newark as they reinvent math and science teaching and teacher education through the lens of inquiry. Each chapter includes narratives from multiple perspectives as well as tools we have used within the program to support and build change, providing readers with both real cases of how an urban teacher residency can impact school systems, and concrete tools and examples to help the reader understand and replicate aspects of the process. Capturing both the successes but also the tensions and challenges, we offer a kaleidoscopic view of the rich, complex, and multi-layered ways in which multiple stakeholders work together to make enduring educational change in urban schools. Our third space NMUTR has been a fragile utopian enterprise, one that has relied on a shared commitment of all involved, and a deep sense of hope that working collaboratively has the potential, even if not perfect, to make a difference.
