INCLUSION IN URBAN EDUCATIONAL ENVIRONMENTS

ADDRESSING ISSUES OF DIVERSITY, EQUITY, AND SOCIAL JUSTICE

IAP This book is motivated by our experiences in working with students and their families in urban communities. We are particularly concerned about the urgent imperative to address the endemic educational and societal challenges that pervade the lives of urban students, particularly those who live in poverty, are of minority and immigrant backgrounds, and are otherwise marginalized within the current educational discourses and practices. In spite of the fact that over the last 3 decades policy makers, educators and communities across the globe have called for in depth structural changes, this is rarely evidenced in the discourses, practices, and structures within academic and practitioner spheres. This reluctance, despite articulations to the contrary, can be directly linked to normative theoretical and practical perspectives that are defined by assumptions that constrain urban students within restrictive boundaries. These narrow outsider worldviews based on notions of what ought to be, combined with ignorance of the realities of students' lives focus on deviance and deficits. They blind prospective change agents to the strengths and richness that students bring, and they delimit the transformative potential of social justice praxis within urban environments. The resulting discourse, in the form of deficit beliefs, thoughts, actions, and dialogues shapes urban research, theory, and practice. We contend that in order to counteract the debilitating impacts of these harmful constructions of urban and social justice, it is important to clarify this terminology.

COMMUNITIES IN ACTION

PATHWAYS TO HEALTH EQUITY

National Academies Press In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

LEARNER-CENTERED TEACHING

FIVE KEY CHANGES TO PRACTICE

John Wiley & Sons In this much needed resource, Maryellen Weimer—one of the nation's most highly regarded authorities on effective college teaching—offers a comprehensive work on the topic of learner-centered teaching in the college and university classroom. As the author explains, learner-centered teaching focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. *Learner-Centered Teaching* shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.

FICTION WITHOUT HUMANITY

PERSON, ANIMAL, THING IN EARLY ENLIGHTENMENT LITERATURE AND CULTURE

University of Pennsylvania Press Although the Enlightenment is often associated with the emergence of human rights and humanitarian sensibility, "humanity" is an elusive category in the literary, philosophical, scientific, and political writings of the period. *Fiction Without Humanity* offers a literary history of late seventeenth- and early eighteenth-century efforts to define the human. Focusing on the shifting terms in which human difference from animals, things, and machines was expressed, Lynn Festa argues that writers and artists treated humanity as an indefinite class, which needed to be called into being through literature and the arts. Drawing on an array of literary, scientific, artistic, and philosophical devices—the riddle, the fable, the microscope, the novel, and *trompe l'oeil* and still-life painting—*Fiction Without Humanity* focuses on experiments with the perspectives of nonhuman creatures and inanimate things. Rather than deriving species membership from sympathetic identification or likeness to a fixed template, early Enlightenment writers and artists grounded humanity in the enactment of capacities (reason, speech, educability) that distinguish humans from other creatures,

generating a performative model of humanity capacious enough to accommodate broader claims to human rights. In addressing genres typically excluded from canonical literary histories, *Fiction Without Humanity* offers an alternative account of the rise of the novel, showing how these early experiments with nonhuman perspectives helped generate novelistic techniques for the representation of consciousness. By placing the novel in a genealogy that embraces paintings, riddles, scientific plates, and fables, Festa shows realism to issue less from mimetic exactitude than from the tailoring of the represented world to a distinctively human point of view.
