SEXUAL HARASSMENT

THE TRAINING MANUALS

If you have tried to set up an employee training program on sexual harassment, you already know how time consuming & overwhelming such a task can be. The information that does exist is in bits & pieces, spread throughout literally hundreds of sources so that just pulling the information together is a major undertaking. Insuring that the information is up-to-date, designing the training sessions, & finally presenting the sessions to employees all require time & expertise that few people have available to them. There is widespread consensus that such training programs do have an impact on preventing &/or eliminating sexual harassment in the workplace. Employee training has been suggested by the Equal Employment Opportunity's 1980 Guidelines on Sexual Harassment as well as by federal courts. The purpose of this Training Manual is to allow individuals to set up sexual harassment training programs for employees in a number of days or weeks rather than the months usually required. It is a "how to" manual, with specific & detailed

instructions for accomplishing the entire training effort from beginning to end. The manual includes training materials for both trainer & trainees. When you purchase the Training Manual, you also receive the Resource Manual; they are sold as a set & should be used in conjunction with each other. While the Training Manual provides step-by-step instructions & materials, the Resource Manual provides background information to give the trainer the knowledge & understanding he or she should have before undertaking a training program.

CREATING A TRAINING MANUAL FOR A MIDWESTERN BOUTIQUE HOTEL

The purpose of this research project was to create a training manual for the front office operations of an independent boutique-style hotel in a campus town in the Midwest. Researchers met with the hotel's management team to review the current hotel policies and training material. Training manuals serve the important purpose of providing a consistent way to communicate instructions to employees about how to perform essential functions of their jobs. A review of professional hospitality and business articles on training and other resources revealed that experts perceived a strong correlation between training and many other factors in benefiting employee training. This study found employee training offered significant contributions to any organization in enhancing the abilities of their employees. Existing research has shown that hotel managers are reluctant to invest in proper training programs for their employees due to tight budgets and high turnover.
